

**SENATE BILL No. 187**

By Committee on Public Health and Welfare

2-10

1 AN ACT enacting the Kansas safe access act; providing for the safe, legal,  
2 humanitarian and therapeutic use of cannabis for medical conditions;  
3 providing for the registration and functions of compassion centers;  
4 authorizing the issuance of identification cards; establishing the  
5 compassion board; providing for administration of the act by the  
6 department of health and environment.  
7

8 WHEREAS, Cannabis has been used as a medicine for at least 5,000  
9 years and can be effective for serious medical conditions for which  
10 conventional medications fail to provide relief; and

11 WHEREAS, Modern medical research has shown that cannabis can  
12 slow the progression of such serious diseases as Alzheimer's and  
13 Parkinson's, stop HIV and cancer cells from spreading; has both anti-  
14 inflammatory and pain-relieving properties; can alleviate the symptoms of  
15 epilepsy, post traumatic stress disorder and multiple sclerosis; is useful in  
16 the treatment of depression, anxiety and other mental disorders; and can  
17 help reverse neurological damage from brain injuries and stroke; and

18 WHEREAS, The world health organization has acknowledged the  
19 therapeutic effects of cannabinoids, the primary active compounds found  
20 in cannabis, including as an anti-depressant, appetite stimulant,  
21 anticonvulsant and anti-spasmodic, and identified cannabinoids as  
22 beneficial in the treatment of asthma, glaucoma, and nausea and vomiting  
23 related to illnesses such as cancer and AIDS; and

24 WHEREAS, The national institutes of health, the institute of medicine  
25 and the American college of physicians have issued statements of support  
26 for further research and development of cannabis medicine; and

27 WHEREAS, The American medical association has called for the  
28 review of the classification of cannabis as a schedule I controlled  
29 substance to allow for clinical research and the development of  
30 cannabinoid-based medicines; and

31 WHEREAS, The national cancer institute has concluded that cannabis  
32 has antiemetic effects and is beneficial for appetite stimulation, pain relief  
33 and improved sleep among cancer patients; and

34 WHEREAS, The American herbal pharmacopoeia and the American  
35 herbal products association have developed qualitative standards for the  
36 use of cannabis as a botanical medicine; and

1 WHEREAS, The United States supreme court has long noted that states  
2 may operate as "laboratories of democracy" in the development of  
3 innovative public policies; and

4 WHEREAS, Twenty-eight states and the District of Columbia have  
5 enacted laws that allow for the medical use of cannabis; and

6 WHEREAS, Seventeen additional states have enacted laws authorizing  
7 the medical use of therapeutic compounds extracted from the cannabis  
8 plant; and

9 WHEREAS, More than 17 years of state-level experimentation  
10 provides a guide for state, and federal law and policy related to the  
11 medical use of cannabis; and

12 WHEREAS, the American legion, America's oldest veteran  
13 organization, has passed a resolution calling on congress to amend its laws  
14 to "at a minimum recognize cannabis as a drug with potential medical  
15 value"; and

16 WHEREAS, Accredited educational curricula concerning the medical  
17 use of cannabis have been established, which meet continuing medical  
18 education requirements for practicing physicians; and

19 WHEREAS, Congress has prohibited the federal department of justice  
20 from using funds to interfere with and prosecute those acting in  
21 compliance with their state medical cannabis laws, and the department of  
22 justice has issued guidance to U.S. attorneys indicating that enforcement  
23 of the controlled substances act is not a priority when individual patients  
24 and their medical care providers are in compliance with state law, and that  
25 federal prosecutors should defer to state and local enforcement so long as a  
26 viable state regulatory scheme is in place; and

27 WHEREAS, Data from the federal bureau of investigation's uniform  
28 crime reports and the compendium of federal justice statistics show that  
29 approximately 99 out of every 100 cannabis arrests in the United States are  
30 made under state law, rather than under federal law therefore,  
31 consequently, changing state law will have the practical effect of  
32 protecting from arrest the vast majority of seriously ill patients who have a  
33 medical need to use cannabis.

34 Now, therefore:

35 *Be it enacted by the Legislature of the State of Kansas:*

36 Section 1. (a) Sections 1 through 25, and amendments thereto, shall  
37 be known and may be cited as the Kansas safe access act.

38 (b) The legislature of the state of Kansas declares that the Kansas safe  
39 access act is enacted pursuant to the police power of the state to protect the  
40 health of its citizens, which is reserved to the state of Kansas and its  
41 people under the 10<sup>th</sup> amendment to the constitution of the United States.

42 Sec. 2. As used in the Kansas safe access act, unless the context  
43 requires otherwise:

1 (a) "Adverse employment action" means refusing to hire or employ a  
2 qualified registered patient, barring or discharging a qualified registered  
3 patient from employment, requiring a qualified registered patient to retire  
4 from employment or discriminating against a qualified registered patient in  
5 compensation or in terms, conditions or privileges of employment.

6 (b) "Cannabis" means all parts of all varieties of the plant cannabis  
7 whether growing or not, the seeds thereof, the resin extracted from any  
8 part of the plant and every compound, manufacture, salt, derivative,  
9 mixture or preparation of the plant, its seeds or resin. It does not include  
10 the mature stalks of the plant, fiber produced from the stalks, oil or cake  
11 made from the seeds of the plant, any other compound, manufacture, salt,  
12 derivative, mixture or preparation of the mature stalks, except the resin  
13 extracted therefrom, fiber, oil, cake or the sterilized seed of the plant,  
14 which is incapable of germination.

15 (c) "Cannabis compliance agency" means the agency created under  
16 section 21, and amendments thereto. The cannabis compliance agency  
17 oversees all components of licensing, compliance and regulation  
18 enforcement, is not a resource for the growing process and does not have  
19 to give information pertaining to the growing process to patients or  
20 caregivers as part of this act. The agency works in consultation with the  
21 compassion board and is established as a division under the department of  
22 health and environment.

23 (d) "cannabis-infused products" means products infused with medical  
24 cannabis.

25 (e) "Child-resistant" means special packaging that is designed or  
26 constructed to be significantly difficult for children under five years of age  
27 to open, and not difficult for normal adults to use properly as defined by  
28 16 C.F.R. 1700.20 (1995) and ASTM classification standard D3475-13.

29 (f) "Compassion board" means the board created under section 13,  
30 and amendments thereto. The compassion board will: Report to the  
31 department of health and environment; be responsible for guiding policy  
32 on behalf of patients, medical providers and the public, with focus on  
33 continuous process improvement to better serve the needs of all; facilitate  
34 research and work with researchers; liaison with other Kansas agencies  
35 and organizations; and liaison with law enforcement and the cannabis  
36 compliance agency.

37 (g) "Compassion center" means a local, government-regulated  
38 physical location in which a person can purchase medical cannabis and  
39 medical cannabis products for therapeutic use. A patient receives cannabis  
40 medication as allowed per the patient's medical provider's  
41 recommendation.

42 (h) "Compassion center employee" means a principal officer, board  
43 member, employee, volunteer or agent of a compassion center who has

1 been issued and possesses a valid identification card.

2 (i) "Cultivation caregiver" means the individual or entity designated  
3 by a registered qualifying patient with an identification card, or primary  
4 caregiver with an identification card, able to cultivate a patient's  
5 recommended amount of medical cannabis on their behalf. Cultivating  
6 caregivers shall not exceed a limit of five patients without purchasing and  
7 implementing a seed to sale tracking system and following ecologically  
8 sustainable guidelines.

9 (j) "Cultivation facility" means an entity licensed to cultivate, prepare  
10 and package medical cannabis and sell to compassion centers and medical  
11 cannabis product manufacturers but not to consumers.

12 (k) "Cultivation facilities" means any location where medical  
13 cannabis is grown for multiple patients, such as medical cannabis  
14 cultivation facilities, registered qualifying patient sites or cultivating  
15 caregiver sites.

16 (l) "Department" means the department of health and environment.

17 (m) "Distillation process material" means food grade alcohol and  
18 CO<sub>2</sub>, a liquid that has a flashpoint below 100 degrees fahrenheit.

19 (n) "Ecologically sustainable pesticides" means pesticides approved  
20 for organic agriculture under EPA, WSDA organic program, CDFA organic  
21 input material program, OMRI or other USDA accredited materials review  
22 programs. Banned pesticides include, but are not limited to, myclobutanil,  
23 imidacloprid, avermectin, bifentazate, etoxazole and azadirachtin.

24 (o) "Extract" means the final product, derived by various methods, of  
25 separating plant material from chemical compounds.

26 (p) "Harvest batch lot" means a specifically identified quantity of  
27 processed medical cannabis that is uniform in strain, cultivated using the  
28 same ecologically sustainable herbicides, pesticides and fungicides and  
29 harvested at the same time.

30 (q) "Identification card" means a document issued by the department  
31 that identifies a person as a registered qualifying patient, registered  
32 designated primary caregiver or a registered principal officer, board  
33 member, employee, volunteer or agent of a registered compassion center.

34 (r) "Identity statement and standardized graphic symbol" or "identity  
35 statement" means the name or logo of the business as it is commonly  
36 known and used in market positioning. A licensee may elect to have its  
37 identity statement also serve as its standardized graphic symbol for  
38 purposes of complying with this act. The licensee shall maintain a record  
39 of its identity statement and standardized graphic symbol and make such  
40 information available to the cannabis compliance agency upon request.

41 (s) "Licensee" means any person or entity holding a license to operate  
42 a compassion center, medical cannabis cultivation facility or manufacture  
43 medical cannabis products.

1 (t) "Medical cannabis concentrate" means a medical cannabis  
2 concentrated form manufactured by extraction, decoction or distillation,  
3 available for purchase at compassion centers.

4 (u) "Medical cannabis products manufacturing facility" means any  
5 site that manufactures medical cannabis-infused products.

6 (v) "Medical condition" means either a temporary disability or illness,  
7 due to injury or surgery, or a permanent disability or illness that:

8 (1) Substantially limits the ability of the person to conduct one or  
9 more major life activities as defined in the Americans with disabilities act  
10 of 1990 (ADA) (public law 101-336); or

11 (2) if not alleviated, may cause serious harm to the patient's safety,  
12 physical or mental health.

13 (w) "Medical provider" means a physician who holds a license to  
14 practice medicine and surgery issued by the state board of healing arts or  
15 an advanced practice registered nurse who holds a license to practice as an  
16 advanced practice registered nurse from the state board of nursing and who  
17 has taken responsibility for an aspect of the medical care, treatment,  
18 diagnosis, counseling or referral of a patient and who has conducted a  
19 medical examination of that patient before recording in the patient's  
20 medical record the physician's or advanced practice registered nurse's  
21 assessment of whether the patient has a medical condition where the  
22 medical use of cannabis is appropriate.

23 (x) "Occupational licensee" means an individual trained in various  
24 aspects of cannabis compliance or cannabis product manufacturing  
25 compliance.

26 (y) "Optional premises" means a site for cultivation or manufacturing  
27 other than the primary business site of a licensee.

28 (z) "Patient," "qualifying patient" or "registered qualifying patient"  
29 means a person who has been diagnosed by a medical provider as having a  
30 debilitating medical condition and, as such, have qualified for coverage  
31 under the Kansas safe access act, whether a temporary disability or illness,  
32 due to injury or surgery, or a permanent disability or illness which  
33 substantially limits the ability of the person to conduct one or more major  
34 life activities, as defined in the Americans with disabilities act of 1990  
35 (ADA) (public law 101-336), or if not alleviated, may cause serious harm  
36 to the patient's safety or physical or mental health.

37 (aa) "Patient owned collective" means an organization that merely  
38 facilitates the collaborative efforts of patient and caregiver members,  
39 including the allocation of costs and revenues. As such, a collective is not  
40 a statutory entity, but might have to organize as some form of business to  
41 carry out its activities. The collective should not purchase medical  
42 cannabis from, or sell to, non-members, instead, it may only provide a  
43 means for facilitating or coordinating transactions between members. Not

1 every member of a collective has to participate in cultivation. Cities are  
2 prohibited from using nuisance abatement ordinances to impose a blanket  
3 ban on collectives, if the collective cultivates on-site.

4 (bb) "Philanthropic equity investors" means enterprise level investors  
5 seeking to provide nonprofits with the capital they need to scale impact  
6 and that is intended to subsidize organizations until they reach a point  
7 when their activities are fully sustained by donors.

8 (cc) "Primary caregiver" means the individual or entity, designated by  
9 a registered qualifying patient who has consistently assumed responsibility  
10 for the housing, health or safety of that patient or person, and may include  
11 a licensed clinic, a licensed state government institution clinic, a licensed  
12 health care facility, a licensed residential care facility for persons with  
13 chronic life-threatening illness, a licensed residential care facility for the  
14 elderly, a hospice or a licensed home health agency, the owner or operator  
15 and any trained employee of a licensed clinic, facility, hospice or home  
16 health agency or an individual group home, halfway house or an individual  
17 if designated as a primary caregiver by a registered qualifying patient.

18 (1) A primary caregiver shall be at least 18 years of age, unless the  
19 primary caregiver is the parent of a minor child who is a registered  
20 qualifying patient, or a person otherwise entitled to make medical  
21 decisions under state law, or it can be proven to the cannabis compliance  
22 agency to full satisfaction that no other viable option for a caregiver is  
23 available.

24 (2) Primary caregiver entities shall utilize an in-house patient  
25 medication tracking system when the caregiver is not growing but only  
26 dispensing. If these entities become cultivating caregivers, they are bound  
27 by regulations adopted pursuant to section 10, and amendments thereto.

28 (dd) "Production batch lots" means a group of medical cannabis-  
29 infused products created from the same production run.

30 (ee) "Seed to sale tracking system" means a technology platform  
31 designed specifically for governments and regulatory agencies that will  
32 collect and monitor the critical data needed to track compliance with  
33 jurisdictional rules, laws and rules and regulations governing cannabis-  
34 related businesses that includes a software tracking system used to track  
35 the production, transportation, destruction and sales of legal cannabis in a  
36 system, allowing regulatory and law enforcement agencies to view reports  
37 in real time, allowing medical cannabis businesses to utilize the  
38 commercial system as a business platform that supports them in remaining  
39 fully compliant when tracking all aspects of their day-to-day operations.

40 (ff) "Shipping container" means any container or wrapping used  
41 solely for the transport of medical cannabis or medical cannabis-infused  
42 product in bulk, or in a quantity for other medical cannabis business.

43 (gg) "Third-party certification agencies" means third-party

1 certification agencies offering certification for producers of ecologically  
2 sustainable grown cannabis products to a private standard that is similar to  
3 internationally accepted organic standards.

4 (hh) "Verification system" means a secure, password-protected, web-  
5 based system that is operational 24 hours each day that law enforcement  
6 personnel and compassion center employees shall use to verify  
7 identification cards and that shall be established and maintained by the  
8 cannabis compliance agency pursuant this act.

9 (ii) "Visiting qualifying patient" means a patient with a debilitating  
10 medical condition who is not a resident of Kansas or who has been a  
11 resident of Kansas for less than 30 days.

12 (jj) "Written documentation" means accurate reproductions of those  
13 portions of a patient's medical records that have been created by the  
14 attending medical provider that contain the information that the patient  
15 may submit to the cannabis compliance agency or its designee as part of an  
16 application for an identification card.

17 Sec. 3. (a) The purpose of this act is to:

18 (1) Provide legal protections to persons with medical conditions who  
19 medicate with cannabis to alleviate the symptoms of such medical  
20 conditions under the supervision of a medical provider and deem the laws  
21 relating to the unlawful possession or cultivation of cannabis in applicable  
22 to a patient's primary caregiver who possesses or cultivates cannabis for  
23 the medical purposes of the patient upon the written recommendation of  
24 their medical provider;

25 (2) allow for the regulated cultivation, processing, manufacture,  
26 delivery, distribution, possession and use of cannabis as permitted by this  
27 act;

28 (3) Notwithstanding any other provision of law, make illegal the  
29 property seizure and forfeiture of the homes of qualifying patients who use  
30 cannabis as a medical treatment, family members, the personal caregivers  
31 who may assist those patients, the physicians and healthcare professionals  
32 who certify patients as qualifying for medical use, or the individuals who  
33 provide medical cannabis to qualified patients or otherwise participate in  
34 accordance with state law and regulations in the medical cannabis  
35 program;

36 (4) establish that neither the presence of cannabinoid components or  
37 metabolites in a person's bodily fluids, nor conduct related to the medical  
38 use of cannabis by a custodial or noncustodial parent, grandparent,  
39 pregnant woman, breastfeeding mother, legal guardian or other person  
40 charged with the well being of a child, or infant, shall form the sole or  
41 primary basis for any action or proceeding by a child welfare agency,  
42 family or juvenile court, because their child or ward, is a medical cannabis  
43 patient, or a newborn, or child of breastfeeding mother has presence of

1   cannabinoids, because the mother is a medical cannabis patient. This  
2   subsection shall apply only to conduct in compliance with the Kansas safe  
3   access act;

4       (5) establish patient protection for the purposes of medical care,  
5   including organ transplants, and that a qualifying patient's medical use of  
6   cannabis does not constitute the use of an illicit substance or otherwise  
7   disqualify a registered qualifying patient from medical care, nor be used to  
8   violate a registered qualifying patient on probation or parole;

9       (6) establish protection for patients and caregivers that, unless  
10   required by federal law or required to obtain federal funding, no landlord  
11   may refuse to rent a dwelling unit to a person or take action against a  
12   tenant solely on the basis of an individual's status as a qualifying patient or  
13   identification cardholder under this act;

14       (7) ensure that patient and caregiver insurance coverage as any type  
15   shall not be endangered because of a person's status as a medical cannabis  
16   patient;

17       (8) guarantee that medicine availability to any patient shall not be  
18   restricted and that it shall be available to all medical cannabis patients in  
19   any environment where other medications are allowed;

20       (9) establish that a patient or caregiver may assert the medical  
21   purpose for using cannabis as a defense, or appeal, to any prosecution or  
22   conviction of an offense involving cannabis intended for the patient's  
23   medical use, and that this defense shall be presumed valid where the  
24   evidence shows that:

25       (A) A medical provider has stated that, in the medical provider's  
26   professional opinion, after having completed a full assessment of the  
27   patient's medical history and current medical condition, the patient is likely  
28   to receive, or would have received, therapeutic or palliative benefit from  
29   the medical use of cannabis to treat or alleviate the patient's medical  
30   condition or symptoms associated with the patient's medical condition;

31       (B) the patient and the patient's designated primary caregiver, or  
32   cultivating caregiver, if any, were collectively in possession of a quantity  
33   of cannabis that was not more than reasonably necessary to ensure the  
34   uninterrupted availability of cannabis for the purpose of treating or  
35   alleviating the patient's medical condition or symptoms associated with the  
36   patient's medical condition; and

37       (C) the registered qualifying patient, cultivating caregiver or  
38   designated primary caregiver was engaged in the acquisition, possession,  
39   cultivation, manufacture, use or transportation of cannabis or  
40   paraphernalia, or both, relating to the administration of cannabis solely to  
41   treat or alleviate the patient's medical condition or symptoms associated  
42   with the patient's medical condition.

43       The person may assert the medical purpose for using cannabis in a

1 motion to dismiss, and the charges shall be dismissed following an  
2 evidentiary hearing where the person shows the elements listed in  
3 paragraphs (A), (B) and (C); and if a patient demonstrates the patient's  
4 medical purpose for using cannabis pursuant to this section, the patient and  
5 the patient's designated caregiver, or cultivating caregiver, shall not be  
6 subject to the following for the registered qualifying patient's use of  
7 cannabis for medical purposes:

8 (i) Disciplinary action by an occupational or professional licensing  
9 board or bureau; or

10 (ii) forfeiture of any interest in or right to property.

11 (10) recognize established federal protection for native American  
12 growers, collectives and compassion centers. Kansas shall in no way  
13 impede the rights of indigenous peoples;

14 (11) recognize that workers compensation should cover medical  
15 cannabis as it would all other medications;

16 (12) guarantee that medical cannabis patients shall fully retain all  
17 rights, including their second amendment rights;

18 (13) establish that medical cannabis patients will be protected from  
19 warrantless drug enforcement administration's medical record searches;  
20 and

21 (14) remove cannabis, and all places listed as medical cannabis, and  
22 all parts of all varieties of the plant cannabis whether growing or not, the  
23 seeds thereof, the resin extracted from any part of the plant, and every  
24 compound, manufacture, salt, derivative, mixture or preparation of the  
25 plant, its seeds or resin. It does not include the mature stalks of the plant,  
26 fiber produced from the stalks, oil or cake made from the seeds of the  
27 plant, any other compound, manufacture, salt, derivative, mixture or  
28 preparation of the mature stalks, the resin extracted therefrom, fiber, oil, or  
29 cake or the sterilized seed of the plant, which is incapable of germination,  
30 chapter 65 article 41 of the Kansas Statutes Annotated, and amendments  
31 thereto, as listed in K.S.A. 65-4105(d)(16), 65-4101(o), 65-4107, 65-4109,  
32 65-4111 and 65-4113, and amendments thereto.

33 (b) The Kansas safe access act shall not prevent the seizure or  
34 forfeiture of cannabis exceeding the amounts allowed under this act and  
35 not meeting exceptions listed in section 8, and amendments thereto.

36 (c) Any cannabis, cannabis paraphernalia, illicit property or interest  
37 in illicit property that is possessed, owned or used in connection with the  
38 medical use of cannabis as allowed under the Kansas safe access act, or  
39 acts incidental to such use, shall not be seized or forfeited.

40 (d) A person shall not be subject to arrest, prosecution or penalty in  
41 any manner or be denied any right or privilege, including, but not limited  
42 to, civil penalty or disciplinary action by a court or occupational or  
43 professional licensing board or bureau, simply for being in the presence or

1 vicinity of the medical use of cannabis as allowed under the Kansas safe  
2 access act or for assisting a patient with using or administering cannabis. A  
3 person shall not be subject to arrest, prosecution or penalty in any manner,  
4 or be denied any right or privilege, including, but not limited to, civil  
5 penalty or disciplinary action by a court or occupational or professional  
6 licensing board or bureau for providing a registered qualifying patient, a  
7 registered designated primary caregiver or cultivating caregiver with  
8 cannabis paraphernalia for purposes of a registered patient's medical use of  
9 cannabis.

10 (e) Fraudulent representation to a law enforcement official of any fact  
11 or circumstance relating to the medical use of cannabis to avoid arrest or  
12 prosecution shall be punishable by a fine of \$500, which shall be in  
13 addition to any other penalties that may apply for making a false statement  
14 or for the use of cannabis other than use undertaken pursuant to the Kansas  
15 safe access act.

16 (f) Any identification cardholder who sells cannabis to a person who  
17 may not possess cannabis for medical purposes under the Kansas safe  
18 access act shall result in the cardholder's identification card being revoked  
19 and such identification cardholder's shall be subject to other penalties for  
20 the unauthorized sale of cannabis.

21 (g) Where a state-funded or locally funded law enforcement agency  
22 encounters an individual who, during the course of the investigation,  
23 credibly asserts that such individual is an identification cardholder or an  
24 entity whose personnel credibly asserts that it is a compassion center, the  
25 law enforcement agency shall not provide any information from any  
26 cannabis-related investigation of the person to any law enforcement  
27 authority that does not recognize the protection of the Kansas safe access  
28 act, and any prosecution of the individual, individuals or entity for a  
29 violation of the Kansas safe access act shall be conducted pursuant to  
30 the laws of this state.

31 (h) The act also protects card holding-non resident patients traveling  
32 through the state of Kansas.

33 (i) If the department fails to adopt temporary rules and regulations to  
34 implement the Kansas safe access act within 180 days of the effective date  
35 of the Kansas safe access act, a patient, prospective board member or  
36 prospective principal officer of a compassion center may commence an  
37 action in a court of competent jurisdiction to compel the department to  
38 perform the actions mandated pursuant to the provisions of the Kansas safe  
39 access act.

40 (j) If the cannabis compliance agency fails to issue a valid  
41 identification card in response to a valid application or renewal submitted  
42 pursuant to the Kansas safe access act within 20 days of its submission, the  
43 identification card shall be deemed granted and a copy of the identification

1 application, copy of renewal application, receipt from application  
2 submittal or receipt from application renewal shall be deemed a valid  
3 identification card.

4 (k) If, at any time after the 180 days following the effective date of  
5 the Kansas safe access act, the department is not accepting applications,  
6 including if it has not created rules and regulations allowing patients to  
7 submit applications, a notarized statement by a patient containing the  
8 information required in an application, pursuant to section 5, and  
9 amendments thereto, together with a written certification from their  
10 medical provider, shall be deemed a valid identification card.

11 (l) An interim process shall be developed by the cannabis compliance  
12 agency allowing approved patients to legally purchase medical cannabis  
13 and medical cannabis products from legal states until such products are  
14 made fully available in Kansas.

15 (m) The provisions of law making the possession, therapeutic use,  
16 manufacture, cultivation of cannabis unlawful shall not apply to a  
17 registered qualifying patient or to a registered qualifying patient's primary  
18 caregiver or cultivating caregiver who possesses or cultivates cannabis for  
19 the personal medical purposes of the patient upon the written or oral  
20 recommendation or approval of a medical provider.

21 (n) Nothing in this act shall be construed as granting to the cannabis  
22 compliance agency, the compassion board or the Kansas department of  
23 health and environment the power to fix prices for medical cannabis, but  
24 such entities shall monitor pricing to prevent price gouging and protect the  
25 interests of patients. No price caps may be instituted without the  
26 consultation of the compassion board.

27 (o) Patient-owned collectives may grow, distribute or sell, or both  
28 distribute and sell, medical cannabis and medical cannabis products on a  
29 non-profit basis to their members.

30 (p) Duly designated primary caregivers, and cultivating caregivers,  
31 who consistently attend to registered qualifying patients' needs, may  
32 charge for their labor and services in providing medical cannabis.

33 (q) Nothing in this act shall be construed as interfering with a Kansas  
34 citizen's right to purchase hemp-based products as otherwise authorized by  
35 law.

36 Sec. 4. (a) The purpose of this section is to prohibit any medical  
37 provider from being punished or denied any right or privilege for having  
38 recommended cannabis for medical therapeutic use to a qualifying patient.  
39 This section sets forth general standards and requirements for medical  
40 providers, and establishes guidelines for diagnosing registered qualifying  
41 patients as having a debilitating medical condition and, as such, shall have  
42 coverage under the Kansas safe access act, whether it is temporary  
43 disability or illness, due to injury or surgery, or a permanent disability or

1 illness that substantially limits the ability of the person to conduct one or  
2 more major life activities, as defined in the Americans with disabilities act  
3 of 1990 (ADA) (public law 101-336); or if not alleviated, may cause  
4 serious harm to the patient's safety or physical or mental health. The  
5 cannabis compliance agency intends the guidelines in this section to help  
6 maintain the integrity of Kansas medical providers recommending medical  
7 cannabis.

8 (b) A medical provider shall not be subject to arrest, prosecution or  
9 penalty in any manner or be denied any right or privilege, including, but  
10 not limited to, civil penalty or disciplinary action by the state board of  
11 healing arts or by any other occupational or professional licensing board or  
12 bureau solely for providing written certifications, or otherwise stating that  
13 in the medical provider's professional opinion a patient is likely to receive  
14 therapeutic benefit from the medical use of cannabis in treating or  
15 alleviating the patient's medical condition or symptoms associated with the  
16 medical condition.

17 (c) Nothing in the Kansas safe access act shall prevent a professional  
18 licensing board from sanctioning a medical provider for failing to properly  
19 evaluate a patient's medical condition or otherwise violating the standard  
20 of care for evaluating medical conditions.

21 (d) For medical providers to qualify to recommend medical cannabis,  
22 they must fulfill requirements as outlined by the cannabis compliance  
23 agency.

24 (e) Continuing education units covering medical cannabis are  
25 available online, and, if approved by the board of healing arts or the board  
26 of nursing, medical providers will be encouraged to take courses in the  
27 endocannabinoid system (ECS), basic cannabis science, cannabis and  
28 palliative care and classes on dosage and delivery systems.

29 (f) Seminars on Kansas safe access act compliance shall be made  
30 available by the cannabis compliance agency in every county for all  
31 medical providers and first responders, either in person or by  
32 teleconference.

33 (g) All medical provider educational and seminar information shall be  
34 provided on the cannabis compliance agency webpages.

35 (h) Medical providers must reevaluate registered qualifying patients  
36 annually and provide the registered qualifying patient with an updated  
37 recommendation.

38 (i) Recommendations shall not be for any specific total weight or  
39 amount of end product, but shall be for targeted therapeutic levels and  
40 actionable metrics of cannabinoids.

41 Sec. 5. (a) The purpose of this section is to set forth general standards  
42 and requirements for the issuance of medical cannabis patient and  
43 caregiver identification cards. This section provides unimpeded and legal

1 access to medical cannabis patients, and prevents the diversion of medical  
2 cannabis to the black market.

3 (b) The department shall establish and maintain a program under the  
4 cannabis compliance agency for the issuance of identification cards to  
5 registered qualified patients or primary caregivers who submit the  
6 following in accordance with the cannabis compliance agency's rules and  
7 regulations:

8 (1) A written certification;

9 (2) an application with a \$10 fee or \$10 renewal fee;

10 (3) the name, address and date of birth of the qualifying patient,  
11 except that if the applicant is homeless, no address is required;

12 (4) the name, address and telephone number of the qualifying  
13 patient's medical provider;

14 (5) the name, address and date of birth of the designated primary  
15 caregiver, if any, by the qualifying patient;

16 (6) a statement signed by the registered qualifying patient, pledging  
17 not to divert cannabis to anyone who may not possess cannabis pursuant to  
18 the Kansas safe access act; and

19 (7) a signed statement from the designated primary caregiver, if any, a  
20 statement signed by the cultivating caregiver, if any, agreeing to be  
21 designated as the patient's designated primary caregiver or cultivating  
22 caregiver and pledging not to divert cannabis to anyone who may not  
23 possess cannabis pursuant to the Kansas safe access act.

24 (c) The cannabis compliance agency shall not issue an identification  
25 card to a qualifying patient who is younger than 18 years of age unless:

26 (1) The qualifying patient's medical provider has explained the  
27 potential risks and benefits of the medical use of cannabis to the custodial  
28 parent or legal guardian with responsibility for health care decisions for  
29 the qualifying patient; and

30 (2) the custodial parent or legal guardian with responsibility for  
31 health care decisions for the qualifying patient consents in writing to:

32 (A) Allow the qualifying patient's medical use of cannabis;

33 (B) serve as the qualifying patient's designated primary caregiver; and

34 (C) control the acquisition of the cannabis, the dosage and the  
35 frequency of the medical use of cannabis by the qualifying patient.

36 (3) the qualifying patient is an emancipated minor and has been held  
37 by the courts to be capable of conducting one's own affairs, including  
38 medical care.

39 (d) An identification card, or its equivalent, that is issued under the  
40 laws of another state, district, territory, commonwealth or insular  
41 possession of the United States that allows, in the jurisdiction of issuance,  
42 a visiting qualifying patient to possess cannabis for medical purposes shall  
43 have the same force and effect as an identification card issued by the

1 cannabis compliance agency.

2 (1) Upon verification by the state of origin verification system, or  
3 documents sent by the state of origin governing medical cannabis to the  
4 cannabis compliance agency, out-of-state patients can purchase medicine,  
5 per the recommendation of their home state provider, or per home state  
6 regulations.

7 (2) A copy of their card and all other information will be entered into  
8 the compassion center patient database and also kept in hard copy.

9 (3) All files must be retained for as long as the compassion center is  
10 operational.

11 (4) If the compassion center should close, the cannabis compliance  
12 agency and the compassion board are to have a process in place within 180  
13 days of the effective date of this act for either secure destruction or storage  
14 of registered qualifying patient files.

15 (e) The cannabis compliance agency shall verify the information  
16 contained in an application or renewal submitted pursuant to this section  
17 and shall approve or deny an application or renewal within 15 days of  
18 receipt.

19 (1) The cannabis compliance agency may not deny an application or  
20 renewal only if the applicant did not provide the information required  
21 pursuant to this section, but the application must be returned and the  
22 missing information provided. The application information will not be  
23 entered into the system and will be considered as a non-submittal.

24 (2) The cannabis compliance agency may deny an application if the  
25 applicant previously had an identification card revoked for violating the  
26 Kansas safe access act or if the cannabis compliance agency determines  
27 that the information provided was falsified.

28 (3) Applicants may appeal first rejections to the compassion board for  
29 review. Rejection of an application or renewal by the compassion board is  
30 considered a final department action subject to judicial review. All  
31 administrative proceedings are subject to the Kansas administrative  
32 procedure act and in accordance with the judicial review act.

33 (f) The cannabis compliance agency shall issue an identification card  
34 to the designated caregiver, if any, who is named in a qualifying patient's  
35 approved application, provided that the designated primary caregiver  
36 meets the requirements of section 5, and amendments thereto.

37 (1) The cannabis compliance agency shall notify the qualifying  
38 patient who has designated someone to serve as the patient's primary  
39 caregiver, if an identification card will not be issued to the designated  
40 primary caregiver.

41 (2) A designated primary caregiver shall be issued an identification  
42 card each time the designated primary caregiver is designated by a  
43 qualifying patient.

1 (g) The cannabis compliance agency shall issue temporary  
2 identification cards to qualifying patients and to designated primary  
3 caregivers at the time of approval and upon payment of a \$10 fee, and  
4 permanent cards within 30 days of approving an application or renewal.

5 (h) Each identification card shall expire one year after the date of  
6 issuance, unless the medical provider states in the written certification that  
7 the medical provider believes the qualifying patient would only benefit  
8 from medical cannabis until a specified earlier or later date, then the  
9 identification card shall expire on that date.

10 (i) Identification cards shall contain all of the following:

11 (1) The name, address and date of birth of the qualifying patient;

12 (2) the name, address and date of birth of the designated primary  
13 caregiver, if any;

14 (3) the date of issuance and expiration date of the identification card;

15 (4) a random 20-digit alphanumeric identification number, containing  
16 at least four numbers and at least four letters, that is unique to the  
17 cardholder;

18 (5) if the cardholder is a designated primary caregiver, the random  
19 identification number of the registered qualifying patient the designated  
20 caregiver is assisting;

21 (6) a photograph;

22 (7) a barcode for scanning; and

23 (8) a holographic seal.

24 (j) The following notifications and cannabis compliance agency  
25 responses are required:

26 (1) A registered qualifying patient shall notify the cannabis  
27 compliance agency of any change of name, address or designated primary  
28 caregiver, or if the registered qualifying patient ceases to have a  
29 debilitating medical condition, within 30 days of such change by the web  
30 pages or customer service phone number. A registered qualifying patient  
31 who fails to notify the cannabis compliance agency of any of these  
32 changes may be subject to a civil penalty of no more than \$150 levied by  
33 the department;

34 (2) any registered designated primary caregiver, cultivating caregiver  
35 or compassion center employee must notify the cannabis compliance  
36 agency of any change in name or address within 30 days of such change. A  
37 registered designated primary caregiver, cultivating caregiver or  
38 compassion center employee who fails to notify the cannabis compliance  
39 agency of any of these changes may be subject to a civil penalty of no  
40 more than \$150 levied by the cannabis compliance agency;

41 (3) when a cardholder notifies the cannabis compliance agency of any  
42 changes listed in this subsection, the cannabis compliance agency shall  
43 issue the cardholder a new identification card within 10 days of receiving

1 the updated information and a \$10 fee. If the person notifying the cannabis  
2 compliance agency is a registered qualifying patient, the cannabis  
3 compliance agency shall also issue the patient's registered designated  
4 caregiver, if any, a new identification card within 10 days of receiving the  
5 updated information;

6 (4) when a registered qualifying patient ceases to be a registered  
7 qualifying patient or changes the registered designated primary caregiver,  
8 or cultivating caregiver, the cannabis compliance agency shall notify the  
9 designated primary caregiver, or cultivating caregiver, within 10 days. The  
10 registered designated primary caregiver's or cultivating caregiver's  
11 protections under the Kansas safe access act as to that qualifying patient  
12 shall expire 10 days after notification by the cannabis compliance agency;  
13 and

14 (5) if a cardholder loses the identification card, the cardholder shall  
15 notify the cannabis compliance agency within 10 days of losing the  
16 identification card and submit a \$10 fee within 30 days of losing the card.  
17 Within five days after such notification, the cannabis compliance agency  
18 shall issue a new identification card.

19 (k) Mere possession of, or application for, an identification card shall  
20 not constitute probable cause or reasonable suspicion, nor shall it be used  
21 to support the search of the person or property of the person possessing or  
22 applying for the identification card. The possession of, or application for,  
23 an identification card shall not preclude the existence of probable cause if  
24 probable cause exists on other grounds.

25 (l) The following confidentiality rules shall apply, and all the health  
26 insurance portability and accountability act of 1996 (HIPAA; pub.l. 104–  
27 191, 110 stat. 1936, enacted August 21, 1996) guidelines shall be in force:

28 (1) Applications and supporting information submitted by the  
29 qualifying patient's designated primary caregivers, and including  
30 information regarding their designated primary caregivers and medical  
31 providers, are confidential;

32 (2) applications and supporting information submitted by compassion  
33 centers, and compassion center personnel operating in compliance with the  
34 Kansas safe access act, including the physical addresses of compassion  
35 centers, are confidential; and

36 (3) the cannabis compliance agency shall maintain a confidential list  
37 of the persons to whom the cannabis compliance agency has issued  
38 identification cards. Individual names and other identifying information on  
39 the list shall be confidential, exempt from the Kansas open records act, and  
40 not subject to disclosure, except to authorize employees of the cannabis  
41 compliance agency as necessary to perform official duties of the cannabis  
42 compliance agency.

43 (m) The verification system must include the following data security

1 features:

2 (1) Any time an authorized user enters five invalid registry  
3 identification numbers within five minutes, that user cannot log in to the  
4 system again for 10 minutes;

5 (2) the server must reject any log-in request that is not over an  
6 encrypted connection; and

7 (3) any hard drive containing cardholder information must be  
8 destroyed once it is no longer in use, and the department shall retain a  
9 signed statement from a department employee confirming the destruction.

10 (n) The application for qualifying patient's identification card shall  
11 include a question asking whether the patient would like the compassion  
12 board to notify the patient of any clinical studies regarding cannabis' risk  
13 or efficacy that seek human subjects. The compassion board shall inform  
14 those patients who answer in the affirmative of any such studies it is  
15 notified of that will be conducted in the United States.

16 (o) Medical providers must reevaluate a registered qualifying patient  
17 annually and provide the registered qualifying patient with an updated  
18 recommendation. The registered qualifying patient must provide the  
19 updated recommendation to the cannabis compliance agency for  
20 identification card renewal 30 days prior to expiration of the current  
21 identification card. Failure to register an updated recommendation with the  
22 cannabis compliance agency may result in suspended benefits.

23 (p) The cannabis compliance agency may make exceptions, at its  
24 discretion, based on hardship circumstances of registered qualifying  
25 patients or other considerations.

26 (q) The cannabis compliance agency may establish a sliding scale of  
27 patient application and renewal fees based upon a qualifying patient's  
28 family income and the department may accept donations from private  
29 sources in order to reduce the application and renewal fees.

30 Sec. 6. The purpose of this section is to set forth general standards  
31 and requirements for the licensing and regulation of compassion centers.  
32 This section is intended to provide safe and regulated access to medical  
33 cannabis and protect the health of patients by implementing and enforcing  
34 congruent standard operating procedures for all licensed compassion  
35 centers. The following provisions govern the registration of compassion  
36 centers:

37 (a) The cannabis compliance agency shall register a compassion  
38 center and issue a registration certificate, with a random 20-digit  
39 alphanumeric identification number, within 90 days of receiving an  
40 application for a compassion center if the following conditions are met:

41 (1) The prospective compassion center provided the following:

42 (A) An application or renewal fee;

43 (B) the legal name of the compassion center; and

1 (C) the physical address of the compassion center and the physical  
2 address of one additional location, if any, where cannabis will be  
3 cultivated, neither of which may be within 1,000 feet of real property  
4 comprising a public or private elementary, vocational or secondary school  
5 or a public or private college, junior college or university, or a playground  
6 or housing facility owned by a public housing authority, or within 100 feet  
7 of a public or private youth center, public swimming pool, drug treatment  
8 facility, commercial daycare or video arcade facility;

9 (D) the name, address and date of birth of each principal officer and  
10 board member of the compassion center;

11 (E) the name, address and date of birth of any person who is an agent  
12 of or employed by the compassion center;

13 (F) operating regulations that include procedures for the oversight of  
14 the compassion center, procedures to ensure accurate record-keeping,  
15 patient database security, security of patient paper files, and security  
16 measures to deter and prevent unauthorized entrance into areas containing  
17 cannabis and the theft of cannabis, and proof of compliance with any other  
18 oversight rules and regulations issued by the cannabis compliance agency  
19 under subsection (b);

20 (G) if the city or county in which the compassion center would be  
21 located has enacted reasonable zoning restrictions, a sworn and truthful  
22 statement that the registered compassion center would be in compliance  
23 with those restrictions;

24 (H) issuing the compassion center a registration would not be in  
25 violation of a reasonable limitation on the number of registered  
26 compassion centers that can operate in the jurisdiction in which it would  
27 operate; and

28 (I) principal officers and board members will be elected to office by  
29 patient and caregiver members of the collective and will be subject to a  
30 background check at the time of nomination.

31 (2) Principal officer and board member candidates cannot be  
32 excluded for any offense consisting of conduct for which the Kansas safe  
33 access act would likely have prevented a conviction, but the conduct either  
34 occurred prior to the enactment of the Kansas safe access act or was  
35 prosecuted by an authority other than the state of Kansas, whether as a  
36 patient or caregiver. Candidates who can prove their past convictions  
37 would have been negated by the Kansas safe access act by providing to the  
38 cannabis compliance agency medical records from the time of the  
39 conviction for the patient, or records that the patient was receiving care  
40 from a caregiver, cannot be excluded from consideration. None of the  
41 prospective principal officers or board members may serve as a principal  
42 officer or board member if they have served as a principal officer or board  
43 members for a registered compassion center that had its registration

1 certificate revoked. None of the principal officers or board members may  
2 be younger than 21 years of age.

3 (3) The compassion center has been approved for registration by the  
4 cannabis compliance agency.

5 (4) Not later than 180 days after the effective date of the Kansas safe  
6 access act the cannabis compliance agency, in consultation with the  
7 compassion board, shall adopt any further rules and regulations  
8 establishing application and renewal fees for registry identification cards  
9 and compassion center registration certificates, including reasonable rules  
10 and regulations governing:

11 (A) The form and content of compassion center registration and  
12 renewal applications;

13 (B) the minimum oversight requirements for registered compassion  
14 centers;

15 (C) the minimum record-keeping requirements for registered  
16 compassion centers;

17 (D) the minimum security requirements for registered compassion  
18 centers; and

19 (E) the procedures for suspending or terminating the registration of a  
20 registered compassion center that violates the provisions of the Kansas  
21 safe access act or the rules and regulations promulgated pursuant to this  
22 section.

23 (b) The cannabis compliance agency, in consultation with the  
24 compassion board, shall design rules and regulations with the goal of  
25 protecting against diversion and theft without imposing an undue burden  
26 on the registered compassion centers or compromising the confidentiality  
27 of registered qualifying patients and their registered designated primary  
28 caregivers.

29 (c) Any dispensation record that a registered compassion center is  
30 required to keep shall track transactions according to the registered  
31 qualifying patient's registered designated primary caregivers' and  
32 registered compassion centers' registry identification numbers, rather than  
33 their names, to protect their confidentiality.

34 (d) A registered compassion center shall not be subject to prosecution  
35 or search, except by the cannabis compliance agency pursuant to section 7,  
36 and amendments thereto, seizure or penalty in any manner or be denied  
37 any right or privilege, including, but not limited to, civil penalty or  
38 disciplinary action by a court or business licensing board or entity, solely  
39 for acting in accordance with the Kansas safe access act and cannabis  
40 compliance agency rules and regulations to acquire, possess, cultivate,  
41 manufacture, deliver, transfer, transport, supply or dispense cannabis,  
42 cannabis-based products or related supplies and educational materials to  
43 registered qualifying patients, to registered designated primary caregivers

1 on behalf of registered qualifying patients or to other registered  
2 compassion centers.

3 (e) A registered compassion center may not dispense, deliver or  
4 otherwise transfer cannabis to a person other than another registered  
5 compassion center, an identification card-carrying patient or an  
6 identification card-carrying patient's registered designated primary  
7 caregiver.

8 (f) A compassion center shall implement security measures to deter  
9 and prevent entry into and theft from restricted access areas containing  
10 cannabis or currency.

11 (g) A compassion center shall submit changes to the floor plan or  
12 security plan to the cannabis compliance agency for pre-approval.

13 (h) The compassion center shall implement security measures to  
14 protect the premises, registered qualifying patients, designated caregivers  
15 and compassion center agents including, but not limited to the following:

16 (A) Establish a locked door or barrier between the facility's entrance  
17 and the limited access area. The limited access area shall only be  
18 accessible to registered qualifying patients, designated caregivers,  
19 principal officers and agents, service professionals conducting business  
20 with the compassion center, and persons authorized by the act;

21 (B) prevent individuals from remaining on the premises if they are  
22 not engaging in activity permitted by the act;

23 (C) develop a policy that addresses the maximum capacity and patient  
24 flow in the waiting rooms and patient care areas;

25 (D) dispose of cannabis in accordance of this act;

26 (E) during hours of operation, store all cannabis in an established  
27 restricted access area accessible only to specifically authorized agents. The  
28 minimum number of compassion center agents essential for efficient  
29 operations shall be in the restricted access areas;

30 (F) when the compassion center is closed, store all cannabis and  
31 currency in a secure locked safe or vault and in a manner as to prevent  
32 diversion, theft or loss;

33 (G) keep all safes, vaults and any other equipment or cannabis  
34 storage areas securely locked and protected from unauthorized entry;

35 (H) keep an electronic daily log of compassion center agents with  
36 access to the safe or vault and knowledge of the access code or  
37 combination;

38 (I) keep all locks and security equipment in good working order and  
39 operational at all times;

40 (J) prohibit keys, if applicable, from being left in the locks, or stored  
41 or placed in a location accessible to persons other than specifically  
42 authorized personnel;

43 (K) prohibit accessibility of security measures, including combination

1 numbers, passwords or electronic or biometric security systems to persons  
2 other than specifically authorized agents;

3 (L) ensure that the outside perimeter of the compassion center  
4 premises is sufficiently lit to facilitate surveillance;

5 (M) ensure that trees, bushes and other foliage within direct  
6 proximity of the compassion center premises do not grow in abundance, so  
7 as to deter a person or persons from concealing themselves from sight;

8 (N) develop emergency policies and procedures for securing all  
9 product and currency following any instance of diversion, theft, or loss of  
10 cannabis, and conduct an assessment to determine whether additional  
11 safeguards are necessary; and

12 (O) develop sufficient additional safeguards in response to any  
13 special security concerns, or as required by the cannabis compliance  
14 agency.

15 (i) The cannabis compliance agency may request or approve  
16 alternative security provisions that it determines are an adequate substitute  
17 for a security requirement specified in this act. Any additional protections  
18 may be considered by the cannabis compliance agency in evaluating  
19 overall security measures.

20 (j) A compassion center shall provide additional security as needed  
21 and in a manner appropriate for the community where it operates.

22 (k) Restricted access areas:

23 (1) All restricted access areas must be identified by the posting of a  
24 sign that shall be a minimum of 12" x 12" and that states "Do not enter –  
25 restricted access area – access restricted to authorized personnel only" in  
26 lettering no smaller than one inch in height.

27 (2) All restricted access areas shall be clearly described in the floor  
28 plan of the registered premises, in the form and manner determined by the  
29 cannabis compliance agency, reflecting walls, partitions, counters and all  
30 areas of entry and exit. The floor plan shall show all storage, disposal and  
31 retail sales areas.

32 (3) All restricted access areas must be secure, with locking devices  
33 that prevent access from the limited access areas.

34 (4) All service professionals conducting business with the  
35 compassion center and visitors must obtain a numbered visitor  
36 identification badge prior to entering a restricted access area, and shall be  
37 escorted at all times by a compassion center agent authorized to enter the  
38 restricted access area. All visitors must be logged in and out, and that log  
39 shall be maintained for five years on-site and available for inspection by  
40 the cannabis compliance agency at all times. All visitor identification  
41 badges shall be returned upon exit.

42 (l) Security and alarm systems:

43 (1) A compassion center shall have an adequate security plan and

1 security system to prevent and detect diversion, theft or loss of cannabis,  
2 currency or unauthorized intrusion using commercial-grade equipment  
3 installed by a Kansas licensed private alarm contractor or private alarm  
4 contractor agency that shall, at a minimum, include:

5 (A) A perimeter alarm on all entry points and perimeter windows;

6 (B) a failure notification system that provides an audible, text or  
7 visual notification of any failure in the surveillance system. The failure  
8 notification system shall provide an alert to designated compassion center  
9 agents within five minutes after the failure, either by telephone, email or  
10 text message;

11 (C) a duress alarm, panic button and alarm, holdup alarm or after  
12 hours intrusion detection alarm that by design and purpose will directly or  
13 indirectly notify, by the most efficient means, the public safety answering  
14 point (PSAP) for the law enforcement agency having primary jurisdiction;

15 (D) unobstructed video surveillance of all enclosed compassion  
16 center areas, unless prohibited by law, including all points of entry and exit  
17 that shall be appropriate for the normal lighting conditions of the area  
18 under surveillance. The cameras shall be directed so all areas are captured,  
19 including, but not limited to, safes, vaults, sales areas and areas where  
20 cannabis is stored, handled, dispensed or destroyed. Cameras shall be  
21 angled to allow for facial recognition, the capture of clear and certain  
22 identification of any person entering or exiting the compassion center area  
23 and in lighting sufficient during all times of night or day;

24 (E) unobstructed video surveillance of outside areas, the storefront  
25 and the parking lot, that shall be appropriate for the normal lighting  
26 conditions of the area under surveillance. Cameras shall be angled so as to  
27 allow for the capture of facial recognition, clear and certain identification  
28 of any person entering or exiting the compassion center, the immediate  
29 surrounding area and license plates of vehicles in the parking lot;

30 (F) twenty-four hour recordings from all video cameras available for  
31 immediate viewing by the cannabis compliance agency upon request.  
32 Recordings shall not be destroyed or altered and retained for at least 90  
33 days. Recordings shall be retained as long as necessary if the compassion  
34 center is aware of the loss or theft of cannabis or a pending criminal, civil  
35 or administrative investigation or legal proceeding for which the recording  
36 may contain relevant information;

37 (G) the ability to immediately produce a clear, color still photo from  
38 the surveillance video, either live or recorded;

39 (H) a date and time stamp embedded on all video surveillance  
40 recordings. The date and time shall be synchronized and set correctly and  
41 shall not significantly obscure the picture;

42 (I) the ability to remain operational during a power outage and ensure  
43 all access doors are not solely controlled by an electronic access panel to

1 ensure that locks are not released during a power outage;

2 (J) all video surveillance equipment shall allow for the exporting of  
3 still images in an industry standard image format, including .jpg, .bmp and  
4 .gif. Exported video shall have the ability to be archived in a proprietary  
5 format that ensures authentication of the video and guarantees that no  
6 alteration of the recorded image has taken place. Exported video shall also  
7 have the ability to be saved in an industry standard file format that can be  
8 played on a standard computer operating system. All recordings shall be  
9 erased or destroyed prior to disposal;

10 (K) all security system equipment and recordings shall be maintained  
11 in good working order, in a secure location so as to prevent theft, loss,  
12 destruction or alterations;

13 (L) access to rooms where surveillance monitoring recording  
14 equipment resides shall be limited to persons that are essential to  
15 surveillance operations, law enforcement authorities acting within their  
16 jurisdiction, security system service personnel and the cannabis  
17 compliance agency. A current list of authorized compassion center agents  
18 and service personnel that have access to the surveillance room must be  
19 available to the cannabis compliance agency upon request;

20 (M) all security equipment shall be inspected and tested at regular  
21 intervals, not to exceed 30 calendar days from the previous inspection and  
22 test to ensure the systems remain functional;

23 (N) the security system shall provide protection against theft and  
24 diversion that is facilitated or hidden by tampering with computers or  
25 electronic records; and

26 (O) to monitor the facility and prevent unauthorized access to medical  
27 cannabis at the compassion center, the compassion center shall incorporate  
28 the following:

29 (i) Security equipment to deter and prevent unauthorized entrance  
30 into restricted access areas that includes devices or a series of devices to  
31 detect unauthorized intrusion that may include a signal system  
32 interconnected with a radio frequency method, cellular, private radio  
33 signals or other mechanical or electronic device;

34 (ii) electronic monitoring including:

35 (I) A video printer capable of immediately producing a clear still  
36 photo from any video camera image;

37 (II) video cameras recording all points of entry and exit from the  
38 compassion center, the limited access areas, the restricted access areas and  
39 that are capable of identifying activity occurring adjacent to the building,  
40 with a recording resolution that shall be sufficient to distinctly view the  
41 entire area under surveillance;

42 (III) a video camera or cameras recording at each point-of-sale  
43 location allowing for the identification of the compassion center agent

1 distributing the cannabis and any qualifying patient or designated  
2 caregiver purchasing medical cannabis. The camera or cameras shall  
3 capture the sale, the individuals and the computer monitors used for the  
4 sale;

5 (IV) a failure notification system that provides an audible and visual  
6 notification of any failure in the electronic monitoring system;

7 (V) sufficient battery backup for video cameras and recording  
8 equipment to support recording in the event of a power outage; and

9 (VI) all electronic video monitoring must be made available, within a  
10 reasonable timeframe, to the cannabis compliance agency upon its request.

11 (m) The compassion center shall maintain policies and procedures  
12 that include:

13 (1) Security plan with protocols for patient, caregiver and agent  
14 safety, and management and security of cannabis and currency;

15 (2) restricted access to the areas in the compassion center that contain  
16 cannabis that are allowed only to authorized agents;

17 (3) identification of authorized agents;

18 (4) controlled access and prevention of loitering both inside and  
19 outside the facility;

20 (5) conducting electronic monitoring; and

21 (6) use of a panic button.

22 Sec. 7. The purpose of this section is to set forth general standards  
23 and requirements for the certification and regulation of compassion center  
24 employment. This section is intended to provide safe and regulated access  
25 to medical cannabis and protect the health of patients by implementing  
26 and enforcing congruent standard operating procedures for all licensed  
27 compassion center employee members. The following provisions govern  
28 the registration of compassion center employees.

29 (a) Except as provided in section 7(b)(1), and amendments thereto,  
30 the cannabis compliance agency shall issue each compassion center  
31 employee an identification card and login information for the verification  
32 system within 10 days of receipt of the person's name, address, date of  
33 birth and a fee in an amount established by the department. Each card shall  
34 specify that the cardholder is a principal officer, board member, agent,  
35 volunteer or employee of a registered compassion center and shall contain  
36 the following:

37 (1) The legal name of the registered compassion center with which  
38 the compassion center employee is affiliated;

39 (2) a random 20-digit alphanumeric identification number that is  
40 unique to the cardholder;

41 (3) the date of issuance and expiration date of the identification card;

42 (4) a photograph;

43 (5) a barcode for scanning;

1 (6) a holographic seal; and

2 (7) a statement signed by the prospective principal officer, board  
3 member, agent, volunteer or employee pledging not to divert cannabis to  
4 anyone who may not possess cannabis pursuant to the Kansas safe access  
5 act.

6 (b) The cannabis compliance agency shall issue temporary  
7 identification cards to qualifying compassion center employees at the time  
8 of approval, and upon payment of a \$25 fee, and permanent cards within  
9 30 days of approving an application or renewal.

10 (1) Compassion center employees cannot be excluded from  
11 employment due to any offense consisting of conduct for which the  
12 Kansas safe access act would likely have prevented a conviction, but the  
13 conduct either occurred prior to the enactment of the Kansas safe access  
14 act or was prosecuted by an authority other than the state of Kansas,  
15 whether as a patient or caregiver. Compassion center employees who can  
16 prove their past convictions would have been negated by the Kansas safe  
17 access act by providing to the cannabis compliance agency medical  
18 records from the time of the conviction for the patient or records that the  
19 patient was receiving care from a caregiver cannot be excluded from  
20 consideration.

21 (2) The board of the compassion center will conduct a background  
22 check of each compassion center employee in order to carry out this  
23 provision.

24 (3) The board may exclude compassion centers employees for any  
25 conviction that may pose a safety or security threat to patients of the  
26 collective.

27 (4) The cannabis compliance agency shall notify the registered  
28 compassion center in writing of the reason for denying an identification  
29 card to any employee.

30 (c) The cannabis compliance agency shall issue identification cards in  
31 the following manner:

32 (1) It shall not issue an identification card to any principal officer,  
33 board member, agent, volunteer or employee of a registered compassion  
34 center who is younger than 21 years of age;

35 (2) the cannabis compliance agency may refuse to issue an  
36 identification card to a compassion center employee who has had a card  
37 revoked for violating the Kansas safe access act;

38 (3) a registered compassion center's registration certificate and the  
39 identification card for each compassion center employee shall expire one  
40 year after the date of issuance;

41 (4) the cannabis compliance agency shall issue a renewal compassion  
42 center registration certificate within 10 days to any registered compassion  
43 center that submits a renewal fee, so long as its registration is not

1 suspended and has not been revoked;

2 (5) The cannabis compliance agency shall issue a renewal  
3 identification card within 10 days to any compassion center employee who  
4 submits a \$25 renewal fee, except as provided by section 7(c)(2); and

5 (6) an identification card of a compassion center employee shall  
6 expire and the person's login information to the verification system shall  
7 be deactivated upon notification by a registered compassion center that  
8 such person ceased to work at the registered compassion center.

9 (A) A registered compassion center shall notify the cannabis  
10 compliance agency immediately, at the exact time of a compassion center  
11 employee termination, or when a compassion center employee voluntarily  
12 ceases to work at the registered compassion center.

13 (B) A registered compassion center shall notify the cannabis  
14 compliance agency in writing of the name, address and date of birth of any  
15 new compassion center employee and shall submit a fee in an amount of  
16 \$25 before a new compassion center employee begins working at the  
17 registered compassion center.

18 (C) The cannabis compliance agency shall issue temporary  
19 identification cards to qualifying compassion center employees at the time  
20 of approval, and permanent cards within 30 days of approving an  
21 application or renewal.

22 (d) Registered compassion centers are subject to reasonable  
23 inspection by the cannabis compliance agency.

24 (e) A registered compassion center shall be operated on a not-for-  
25 profit basis for the mutual benefit of its members and patrons.

26 (1) The bylaws of a registered compassion center or its contracts with  
27 patrons shall contain such provisions relative to the disposition of revenues  
28 and receipts as may be necessary and appropriate to establish and maintain  
29 its nonprofit character.

30 (2) A registered compassion center need not be recognized as tax  
31 exempt by the internal revenue service to qualify as a not-for-profit entity.

32 (3) If the entity makes a profit during any period, this excess must be  
33 returned to members by way of health support services, income-based  
34 pricing, sliding scale product pricing, free medicine for hospice patients,  
35 donated into the broader community or put back into the organization,  
36 based on the will of the members and board of directors expressed by vote.

37 (4) As long as wages of management and officers of a compassion  
38 center remain reasonable they can be increased by a vote of the  
39 compassion center board. Compassion centers must document the rationale  
40 for any raises and bonuses given, and must be in agreement with local  
41 ordinances.

42 (f) A registered compassion center is prohibited from acquiring,  
43 possessing, cultivating, manufacturing, delivering, transferring,

1 transporting, supplying or dispensing cannabis for any purpose except to  
2 assist registered qualifying patients with the medical use of cannabis  
3 directly or through the qualifying patient's designated primary caregivers.  
4 All principal officers and board members of a registered compassion  
5 center must be residents of the state of Kansas.

6 (g) All cultivation of cannabis must take place in a secured location  
7 or facility that can only be accessed by principal officers, board members,  
8 agents, volunteers or employees of the registered compassion center who  
9 are identification card-holders. Security should include, but not be limited to,  
10 to, cameras, security employees and secured doors.

11 (h) County and city governments may enact reasonable limits, taking  
12 into consideration the needs of their seriously ill residents and the  
13 community on the number of registered compassion centers that can  
14 operate in their jurisdictions and may enact zoning regulations that  
15 reasonably limit registered compassion centers to certain areas of their  
16 jurisdictions, after public hearings on the subject.

17 (i) Before cannabis may be dispensed to a designated primary  
18 caregiver or a registered qualifying patient, a compassion center employee  
19 must scan the identification card of the registered qualifying patient, or if  
20 applicable, the identification card of the designated primary caregiver  
21 transporting the cannabis to the patient, and must verify each of the  
22 following:

23 (1) That the identification card presented to the registered compassion  
24 center is valid;

25 (2) that the person presenting the card is the person identified on the  
26 identification card presented to the compassion center employee; and

27 (3) that the amount to be dispensed would not cause the registered  
28 qualifying patient to exceed such person's limit of obtaining the amount of  
29 cannabis recommended by the medical provider for any 30-day period.

30 (j) After verifying the information in section 7(i), and amendments  
31 thereto, but before dispensing cannabis to a registered qualifying patient or  
32 a registered designated primary caregiver on a registered qualifying  
33 patient's behalf, a compassion center employee must make an entry in the  
34 verification system:

35 (1) Specifying how much cannabis is being dispensed to the  
36 registered qualifying patient;

37 (2) whether it was dispensed directly to the registered qualifying  
38 patient or to the registered qualifying patient's registered designated  
39 caregiver:

40 (A) The entry must include the date and time the cannabis was  
41 dispensed;

42 (B) the batch number and harvest batch lot number;

43 (C) the strain names; and

1 (D) the dosage guidelines from their medical provider  
2 recommendation.

3 (3) upon first visit, the employee must also scan a copy of the  
4 patient's recommendation document, given by the patient's medical  
5 provider, into the compassion center patient data base, and keep a copy in  
6 a hard copy patient file. These must be updated every time a patient's  
7 recommended dosages are modified by the patient's medical provider;

8 (4) all electronic patient files must be backed up and kept within a  
9 secure server;

10 (5) all patient files will be given federal health insurance portability  
11 and accountability act protections under the health insurance portability  
12 and accountability act of 1996 (HIPAA; pub.l. 104–191, 110 Stat. 1936,  
13 enacted August 21, 1996); and

14 (6) if a patient wishes the employee of the compassion center to  
15 communicate with their medical provider, then release-of-information  
16 forms will need to be signed for both parties.

17 (k) No compassion center employees shall be subject to arrest,  
18 prosecution, search, seizure or penalty in any manner or denied any right  
19 or privilege, including, but not limited to, civil penalty or disciplinary  
20 action by a court or occupational or professional licensing board or entity,  
21 solely for working for a registered compassion center in accordance with  
22 the Kansas safe access act and cannabis compliance agency rules and  
23 regulations to acquire, possess, cultivate, manufacture, deliver, transfer,  
24 transport, supply or dispense cannabis, cannabis-based products, related  
25 supplies, and educational materials to registered qualifying patients, to  
26 registered designated primary caregivers on behalf of registered qualifying  
27 patients or to other registered compassion centers.

28 (l) All employees of a compassion center shall be residents of Kansas  
29 upon the date of their identification card application.

30 (m) A licensed compassion center may not sell medical cannabis over  
31 the internet but can allow registered qualifying patients to arrange delivery  
32 through the internet.

33 (n) The premises of a compassion center is the only place where an  
34 automatic dispensing machine that contains medical cannabis may be  
35 located. It must comply with all rules and regulations promulgated by the  
36 cannabis compliance agency for its use, including, but not limited to, real-  
37 time updates into the compassion center tracking system, registered  
38 qualifying patient cards must be scanned by kiosk at the beginning of a  
39 transaction. If the kiosk cannot read the card, or the card does not read as  
40 valid, the kiosk shall reject the transaction and a notify compassion center  
41 employee.

42 (o) Medical cannabis and medical cannabis products may not be  
43 consumed on the premises of the compassion center.

1 (p) Compassion centers selling clones and seedlings to compassion  
2 centers, researchers, patients, primary caregivers or cultivating caregivers  
3 are exempt from K.S.A. 2-2113 and 2-2120, and amendments thereto, and  
4 any other statutes.

5 (q) Potency quantifications for medical cannabis and medical  
6 cannabis products shall be accessible to compassion center patients in  
7 three ways:

8 (1) Labels in display cases;

9 (2) labels on products; and

10 (3) a book of complete testing results on each current batch number  
11 and harvest batch lot number available for sale, to be located at a  
12 compassion center.

13 (r) When medical cannabis is received from medical cannabis  
14 cultivation facilities, registered qualifying patient or cultivating caregivers  
15 for purchase, storage or donation consideration by the collective  
16 compassion center, and the medical cannabis has not already been tested at  
17 a certified testing facility, it must be subjected to an initial contaminants  
18 inspection before being sent out to a certified testing facility, or in the case  
19 of stored patient overages, be sent to storage:

20 (1) Certified and licensed product intake processors shall utilize a  
21 minimum 30X microscope for a first screening that analyzes and detects  
22 contamination of:

23 (A) Pathogenic molds;

24 (B) rot; and

25 (C) spider mites and other insects.

26 (2) In the event that the screening results indicate the presence of  
27 quantities of any substance determined to be injurious to health, such  
28 products shall be immediately quarantined and immediate notification  
29 made to the cannabis compliance agency shall be made, and the  
30 adulterated product shall be documented and properly destroyed.

31 (3) Food handling procedures must be followed by all processors.

32 (s) A compassion center shall establish written policies and  
33 procedures addressing inventory controls. The compassion center shall  
34 submit these written policies and procedures, including any updates, to the  
35 cannabis compliance agency prior to implementation.

36 Sec. 8. (a) The purpose of this section is to establish guidelines  
37 regarding the supply and allowances of cannabis for registered qualifying  
38 patients. It sets forth general standards and requirements for supply,  
39 storing, donations, damages, overages and emergency supply. This section  
40 is intended to help maintain an uninterrupted supply of medical cannabis  
41 and prevent any diversion to the black market.

42 (b) An identification card-carrying patient shall not directly, through a  
43 designated primary caregiver or through a compassion center, obtain more

1 than their medical-provider-recommended dosage of cannabis from  
2 registered compassion centers in any 30-day period. The exceptions to the  
3 30-day supply are:

4 (1) Medical patients who can prove that hardship, either financial or  
5 physical, would be imposed by monthly travel; or

6 (2) allowance for patient growers to store overages for out-of-season  
7 use, or donate to compassion center for indigent members free medicine  
8 program.

9 (A) Overages will be stored in rented lock boxes within compassion  
10 centers.

11 (B) Compassion centers will enter submissions into tracking database  
12 and generate receipts for patients.

13 (C) Patients will be able to withdraw from lock boxes per their 30-  
14 day supply.

15 (D) Patients must notify the compassion center of expected overages  
16 at least 30 days after harvesting and upon completion of the curing process  
17 and file an electronic overage form.

18 (E) The form will list the patient identification number, name and  
19 contact information, vehicle information, including license plate  
20 information, estimate of expected overage amount, estimated date of  
21 harvest and the estimated date the overage amount is expected to arrive at  
22 the compassion center.

23 (F) The form will be filed at the compassion center and the  
24 compassion center will send a copy to the cannabis compliance agency.  
25 The compassion center will note all form information into the patient  
26 database file accessible to law enforcement.

27 (G) The cannabis overage stock, once fully cured, must be stored in a  
28 sealed glass jar.

29 (H) The cannabis overage stock should be examined under a 30X  
30 microscope upon receipt at the compassion center. Any stock contaminated  
31 by mold, mites or pests must be disposed of per section 22. Patients can  
32 request the same testing upon receiving their overage stock out of storage.

33 (3) Patients do not have to take a full 30-day supply at any one visit.

34 (4) To guarantee a constant and uninterrupted supply, plants are  
35 allowed in all five stages of growth: Germinating, seedling, vegetative,  
36 flowering and curing.

37 (5) Crop failure or damage will be reported to the cannabis  
38 compliance agency within 24 hours by electronic form with accompanying  
39 pictures and supporting documentation. The cannabis compliance agency  
40 may require an onsite inspection. Upon verification, affected patient or  
41 patients of the primary caregiver, or cultivating caregiver, will be directed  
42 to the closest compassion center for any emergency medicine replacement  
43 needs.

1 (6) A registered compassion center may not obtain cannabis from  
2 outside the state of Kansas, except when collective medical cannabis  
3 cultivation facilities may negotiate for the use of proprietary strains from  
4 other states by seeds and cuttings.

5 (7) If the medical provider feels it is necessary for the patient to have  
6 an amount over their normal allotment, the exception will be granted, and:

7 (A) The medical provider will provide written documentation to the  
8 patient.

9 (B) The medical provider will provide written documentation to the  
10 cannabis compliance agency.

11 (C) The written documentation will be noted in the registry file.

12 (D) A copy of the written documentation will be kept in the registered  
13 qualifying patient file at the compassion center, if applicable, and posted at  
14 the registered qualifying patient grow site, or cultivating caregiver grow  
15 site, if applicable.

16 (E) A copy shall be on file in the home of the registered qualifying  
17 patient.

18 (F) A copy shall be on the person of the registered qualifying patient  
19 during transport.

20 Sec. 9. The purpose of this section is to establish guidelines regarding  
21 the cultivation of cannabis for general supply by a collective medical  
22 cannabis cultivation facility. It sets forth general standards and  
23 requirements for cultivation, best practices, security, workforce education  
24 and health and safety standards. This section is intended to help maintain  
25 an uninterrupted supply of pharmaceutical-grade medical cannabis,  
26 establish standard operating procedures and safety standards, promote  
27 sustainable agricultural practices and prevent any diversion to the black  
28 market.

29 (a) To qualify to label any product as "grown by ecologically  
30 sustainable standards" the medical cannabis cultivation facility must  
31 follow guidelines in subsection (b) and (c).

32 (b) The United States department of agriculture (USDA) will not  
33 inspect medical cannabis growing operations. Instead, cultivating  
34 caregivers with more than five patients and a medical cannabis cultivation  
35 facility must work with third-party certification agencies that offer  
36 certification for producers of ecologically sustainable cannabis products to  
37 a private standard that is similar to internationally accepted organic  
38 standards like the USDA organic standards and the EU organic standards.

39 (1) All medical cannabis crops must be inspected by a third-party  
40 ecologically sustainable certification agency inspector and earn their seal  
41 of approval to be sold in compassion centers.

42 (2) All agricultural products used must be materials that have been  
43 approved for use in organic farming or gardening by the EPA, WSDA

1 organic program, the CDFA organic input material program and other  
2 USDA accredited materials review programs.

3 (3) A medical cannabis cultivation facility must be ready to provide  
4 the following information to third-party inspectors:

5 (A) A detailed description of the operation to be certified;

6 (B) a history of substances applied to the land during the previous  
7 three years;

8 (C) the ecologically sustainable products grown, raised or processed;  
9 and

10 (D) a written ecologically sustainable system plan describing the  
11 practices and substances to be used.

12 (c) Environmentally protective practices shall be utilized to reduce  
13 the carbon footprint and environmental impact of any medical cannabis  
14 cultivation facility. Medical cannabis cultivation facilities must employ  
15 ecologically sustainable development practices. Such an inspection and  
16 rating program should be developed through the cannabis compliance  
17 agency.

18 (1) During growing season, outdoor gardens can be grown to reduce  
19 environmental impact. During out-of-growing season, medical cannabis  
20 cultivation facilities must use energy efficient greenhouses considering:

21 (A) The effects of glazing materials on heat loss and light  
22 transmission, ways to reduce infiltration and nighttime heating losses;

23 (B) using greenhouse heating units;

24 (C) the effect of heat distribution on heating costs;

25 (D) planning ways to maximize space utilization;

26 (E) using efficient circulation, basket and ventilation fans;

27 (F) using supplemental lighting to reduce energy requirements;

28 (G) using high efficiency condensing heaters;

29 (H) using control systems;

30 (I) implementing energy audits to reduce consumption;

31 (J) using curtain systems;

32 (K) using ventilating windows; and

33 (L) using ventilating roofs and open panel systems.

34 (2) LED lighting shall be the preferred method of medical cannabis  
35 cultivation facility lighting.

36 (3) Double-ended high intensity discharge bulbs (HID bulbs) are  
37 allowed in medical cannabis cultivation facility use, with all recycling  
38 costs to be incurred by the facility. Double-ended HID bulbs are allowed  
39 for cultivating caregivers.

40 (4) Solar, wind and other renewable energy sources shall be the main  
41 methods of power supply. No onsite fossil fuel generators may be used,  
42 except as backup emergency power, never as a main supply. Grid power is  
43 also allowed as backup energy source.

1 (5) Only 5, 4 and 2 hydro-safe resins may be used in aquaponics and  
2 hydroponic systems.

3 (6) Polystyrene beads shall not be used in hydroponic systems.

4 (7) Methods that are not allowed and may be subject to fines by the  
5 Kansas department of agriculture – water resources board are listed in the  
6 Kansas water appropriation act, K.S.A. 82a-701 et seq., and amendments  
7 thereto, and K.S.A. 42-303 and 42-313, and amendments thereto. The  
8 forgoing statutes should be consulted and followed regarding:

9 (A) Unpermitted grading, road construction and culvert crossings;

10 (B) illegal stream diversions and streams drying up;

11 (C) discharge of sediments, pollutants and human waste or trash;

12 (D) erosion or soil deposition;

13 (E) water contamination from pesticides, rodenticides, fungicides,  
14 fertilizers and fuels;

15 (F) capturing rain runoff from buildings, storing and filtering for  
16 watering which use is mandated and implemented pursuant to the  
17 guidelines in K.S.A. 42-313, and amendments thereto;

18 (G) greywater recycling and filtering which is mandated and  
19 implemented pursuant to all standards outlined in rules and regulations  
20 adopted by the cannabis compliance agency; and

21 (H) cisterns which are recommended.

22 (d) All collective medical cannabis cultivation facilities should be  
23 clearly marked with signs on all sides denoting the site as a medical  
24 growing operation in compliance with this statute.

25 (1) All cultivation facilities will utilize a seed-to-sale tracking system.

26 (2) All grows will be lot controlled. If specific strains are for a  
27 specific patient, or group of patients:

28 (A) Their member numbers will also be listed in the tracking system  
29 and the harvest batch lot associated with it;

30 (B) food-handling standards also apply to medical cannabis  
31 cultivation facility grows; and

32 (C) the site must be monitored 24 hours a day, utilizing:

33 (i) Cameras;

34 (ii) security employees;

35 (iii) alarms;

36 (iv) key card entry doors and gates;

37 (v) fencing at a six foot minimum, with concertina wire at the top;

38 and

39 (vi) optional biometric security technology.

40 (e) Food handling standards must apply to medical cannabis  
41 cultivation facility trim rooms and bagging rooms.

42 (f) All collective medical cannabis cultivation facilities will be placed  
43 in rural, low-population areas and may supply compassion centers located

1 in other areas.

2 (g) Medical cannabis cultivation facilities may sell the stalks and  
3 vegetation (leaves) of male or female plants to farmers for use as livestock  
4 feed, following all process requirements, to be defined by the cannabis  
5 compliance agency.

6 (h) Medical cannabis cultivation facilities must comply with all laws  
7 on environmental audits in K.S.A. 60-3332, 60-3334 and 60-3338, and  
8 amendments thereto.

9 (i) Crops must be a minimum of six feet away from surrounding  
10 fence.

11 (j) Medical cannabis cultivation facilities may supply, but not limited  
12 be to, research programs, compassion centers and medical cannabis  
13 product manufacturers.

14 (k) Medical cannabis cultivation facilities must obtain and carry  
15 appropriate insurance and cannabis-crop-specific insurance, when  
16 available.

17 (l) Medical cannabis cultivation facilities selling clones and seedlings  
18 to compassion centers, researchers, patients, primary caregivers or  
19 cultivating caregivers are exempt from K.S.A. 2-2113 and K.S.A. 2-2120,  
20 and amendments thereto.

21 (m) Medical cannabis cultivation facilities may not obtain cannabis  
22 from outside the state of Kansas, except when collective medical cannabis  
23 cultivation facilities may negotiate for the use of proprietary strains from  
24 other states through seeds and cuttings.

25 (n) The medical cannabis cultivation facility's water supply shall be  
26 tested annually for contaminants and demonstrate results below the EPA  
27 maximum contaminant levels for organic and inorganic contaminants. If a  
28 water treatment system is needed, the department may require more  
29 frequent testing.

30 (o) Soil used to cultivate cannabis shall be tested annually and must  
31 meet the United States agency for toxic substance and disease registry's  
32 environmental media evaluation guidelines for residential soil levels.

33 (p) For each batch that water or soil fails to meet the standards, the  
34 cultivation facility shall perform and document both a root-cause analysis  
35 and any corrective action taken.

36 (q) The cultivation facility shall maintain the results of all testing for  
37 no less than five years.

38 (r) The cannabis compliance agency reserves the right to require  
39 additional testing. Copies of the results of such testing shall be sent to the  
40 cannabis compliance agency. The agency reserves the right to order recalls  
41 or destruction.

42 (s) All greenhouse infrastructure, hardware, and all other applicable  
43 structures or systems must be UL listed.

1 (t) All indoor cultivation facilities are bound by sustainability  
2 guidelines and must follow any cannabis compliance agency guidelines to  
3 reduce indoor pollution.

4 (u) Synthetic nutrients must be food grade and comply with  
5 guidelines in this section.

6 Sec. 10. (a) The purpose of this section is to establish guidelines  
7 regarding the cultivation of cannabis by cultivating caregivers and patient  
8 growers. It sets forth general standards and requirements for cultivation  
9 best practices, security, workforce education, and health and safety  
10 standards. This section is intended to help maintain an uninterrupted  
11 supply of pharmaceutical grade medical cannabis, establish standard  
12 operating procedures and safety standards, promote sustainable  
13 agricultural practices and prevent any diversion to the black market.

14 (b) All patient and caregiver cultivation sites should be clearly  
15 marked with signs on all sides denoting the site as a medical growing  
16 operation in compliance with this act.

17 (c) Patient growers may cultivate only as much as required for the  
18 patient's own medical use within the confines of the recommendation of  
19 their medical provider or the exceptions in section 8, and amendments  
20 thereto, taking into consideration the patient's chosen delivery method.

21 (d) Depending on the number of kinds of oils or plants the patient  
22 may need, and the patient dosing regimen, they may grow as many strains  
23 in various levels of growth to keep a continuous oil supply based on the  
24 recommendation of their medical provider or the exceptions defined in  
25 section 8, and amendments thereto.

26 (e) A copy of the provider's recommendations should be kept at the  
27 registered qualifying patient's home and the cultivating caregiver's home  
28 or at the cultivation site, if different from the cultivating caregiver's home.

29 (f) Caregiver cultivation must meet ecological standards set forth in  
30 section 9, and amendments thereto.

31 (g) Cultivating caregivers that exceed the five-patient limit must also  
32 adhere to the standards in section 9, and amendments thereto, and are  
33 subject to process inspections by the cannabis compliance agency for  
34 standard compliance.

35 (h) Cultivating caregivers that exceed 10 registered qualifying  
36 patients must apply for licensure as a cultivating facility, and if approved,  
37 will be bound by all the requirements set forth in section 9, and  
38 amendments thereto. If not approved, cultivating caregivers can appeal to  
39 the cannabis compliance agency. The cannabis compliance agency will  
40 consider the needs of patients served by the cultivating caregiver such as:

41 (1) Geographic hardship of patients;

42 (2) if the strain exclusivity dictates need of this cultivating caregiver;

43 (3) cultivating caregiver is excluded for qualifying as cultivation

1 facility because they cannot meet all requirements of section 9, and  
2 amendments thereto, and to do so would induce an undue financial  
3 hardship; and

4 (4) any other considerations deemed pertinent by the cannabis  
5 compliance agency.

6 If an appeal is denied, cultivating caregivers must conform to a patient-  
7 count limit of less than 10.

8 (i) Clean grow room standards and food handling standards also  
9 apply to cultivating caregiver growing operations.

10 (j) Cultivating caregivers must obtain and carry appropriate  
11 insurance, and cannabis crop specific insurance, when available.

12 (k) Cultivating caregivers cannot be denied a license for any offense  
13 consisting of conduct for which the Kansas safe access act would likely  
14 have prevented a conviction, but the conduct either occurred prior to the  
15 enactment of the Kansas safe access act or was prosecuted by an authority  
16 other than the state of Kansas, whether as a patient or caregiver.  
17 Candidates who can prove their past convictions would have been negated  
18 by the Kansas safe access act by providing to the cannabis compliance  
19 agency medical records from the time of the conviction for the patient, or  
20 records that the patient was receiving care from a caregiver, cannot be  
21 excluded from consideration.

22 Sec. 11. (a) Workforce education is mandatory for all cannabis  
23 industry positions. Required training information will be available through  
24 the cannabis compliance agency and the agency's webpages.

25 (b) Positions that require training, or an equivalent resume, are:

- 26 (1) Designated primary caregivers;  
27 (2) medical cannabis cultivation facility workers;  
28 (3) processors;  
29 (4) cultivating caregivers;  
30 (5) manufacturers; and  
31 (6) compassion center employees.

32 (c) Medical care medical provider training is considered separate  
33 from cannabis industry positions, and is covered under section 4, and  
34 amendments thereto.

35 Sec. 12. (a) The purpose of this section is to establish guidelines  
36 regarding the standards and regulations pertaining to public use of medical  
37 cannabis, prevention of impaired driving, establish employer, registered  
38 qualifying patient employees, business owner rights and the rights of  
39 students who are registered qualifying patients. Kansas safe access act  
40 shall not permit any person to do any of the following, nor shall it prevent  
41 the imposition of any civil, criminal or other penalties for any such  
42 actions:

- 43 (1) Undertake any task while impaired.

1 (2) Nothing in the Kansas safe access act shall be construed to require  
2 any person or establishment in lawful possession of a commercial business  
3 property to allow a guest, client, customer or other visitor to consume  
4 cannabis on or in that property. The Kansas safe access act shall not limit a  
5 person, or entity in lawful possession of a commercial business property,  
6 or an agent of such person or entity, from expelling a person who  
7 consumes cannabis without permission from such property owner.

8 (3) The Kansas safe access act does not prevent any employer from  
9 setting their own policies regarding the accommodation of employee's  
10 medical need to use cannabis in any workplace, or disciplining any  
11 employee working while impaired, so long as, a qualifying patient shall  
12 not be considered to be impaired solely because of the presence of  
13 metabolites or components of cannabis.

14 (4) Unless an employer establishes by a preponderance of the  
15 evidence that the lawful use of medical cannabis has impaired the  
16 employee's ability to perform the employee's job responsibilities, it shall  
17 be unlawful to take any adverse employment action against an employee  
18 who is an identification card-carrying patient using medical cannabis  
19 consistent with the provisions of the Kansas safe access act based on  
20 either:

21 (A) The employee's status as a registry identification cardholder; or

22 (B) the employee's positive drug test for cannabis components or  
23 metabolites.

24 (5) For the purposes of this section, an employer may consider an  
25 employee's ability to perform the employee's job responsibilities to be  
26 impaired when the employee manifests specific articulable symptoms of  
27 impairment while working that decreases or lessens the employee's  
28 performance of the duties or tasks of the employee's job position. If an  
29 employer has a drug testing policy and an employee or job applicant tests  
30 positive for cannabis, the employer shall offer the employee or job  
31 applicant an opportunity to present a legitimate medical explanation for  
32 the positive test result and shall provide written notice of the right to  
33 explain to the employee or job applicant. Within three working days after  
34 receiving notice the employee or job applicant may submit information to  
35 the employer to explain the positive test result. As part of an employee's or  
36 job applicant's explanation for the positive test result, the employee or job  
37 applicant may present a doctor's recommendation for medical cannabis or  
38 their patient identification card, or both.

39 (6) Nothing in this section shall restrict an employer's ability to  
40 prohibit or take adverse employment action for being impaired during  
41 work hours, or require an employer to commit any act that would cause the  
42 employer to be in violation of federal law or that would result in the loss of  
43 a federal contract or federal funding.

1 (7) Impaired drivers are not protected by the Kansas safe access act  
2 while operating, navigating or being in actual physical control of any  
3 motor vehicle, school bus, public transport, aircraft or motorboat. The  
4 following caveats apply:

5 (A) The presence of metabolites does not automatically denote  
6 impairment. Registered qualifying patients who medicate daily may have a  
7 high metabolite level and yet also have a higher tolerance to psychoactive  
8 effects.

9 (B) Current technologies, even those that can measure metabolite  
10 levels, cannot accurately gauge impairment.

11 (C) Roadside testing for impairment remains the best method to  
12 evaluate drivers.

13 (D) A registered qualifying patient's various disabilities may also  
14 impact roadside test results, and an effort should be made by law  
15 enforcement to set guidelines that include this consideration.

16 (8) Educational outreach to prevent driving while impaired will be  
17 posted on the cannabis compliance agency webpages via printable  
18 information and instructional videos, and educational materials will be  
19 available at each compassion center via posters and informational sheets.

20 (9) No registered qualifying patient may consumes medical cannabis  
21 on the grounds of any preschool, primary, secondary or post-secondary  
22 school.

23 (A) Juvenile registered qualifying patients receiving medication from  
24 the school nurse, parent or caregiver may receive medication on school  
25 grounds.

26 (B) Post-secondary registered qualifying patients shall not be  
27 impeded from medicating per their medical provider's recommendation,  
28 either individually or by the facilitation of their primary caregiver, if they  
29 have one, on school grounds as long as the delivery method does not  
30 violate section 12, and amendments thereto.

31 (C) Juvenile and post-secondary registered qualifying patients shall  
32 not be impeded from participation in any extracurricular activities, or  
33 regular school activities, simply because they are a registered qualifying  
34 patient.

35 (b) No patient may conumes cannabis in or on any form of public  
36 transportation.

37 Sec. 13. (a) This act establishes the compassion board, a volunteer  
38 advisory board. The compassion board will be responsible for guiding  
39 policy on behalf of patients, medical providers and the public, with focus  
40 on continuous process improvement to better serve the needs of all to  
41 facilitate research, work with researchers, liaison with other Kansas  
42 agencies and organizations, liaison with law enforcement and the cannabis  
43 compliance agency.

1 (b) There is hereby established a compassion board:

2 (1) The board shall consist of 11 members appointed by the secretary  
3 of health and environment, after a nomination and application process. The  
4 secretary, insofar as possible, shall appoint persons from different  
5 geographical areas and persons who represent various economic regions,  
6 preferably with experience in the health care field, social work field, not-  
7 for-profit patient care sector, the field of cannabis research, industry,  
8 advocacy or cannabis medicine.

9 (2) If a vacancy occurs on the board, the secretary shall appoint a  
10 person to fill the vacant position for the unexpired term, if any, within a  
11 period of not more than 30 days.

12 (3) Members of the board shall be appointed for renewable three-year  
13 terms.

14 (4) The public shall have an open communication path to comment  
15 on board member rulings and performance, as well as an appeals process  
16 established so that appeals of rulings can be heard.

17 (5) The board shall advise the secretary about the administration of  
18 the Kansas safe access act and shall perform such duties as are required by  
19 the act.

20 (6) Members of the board attending meetings of the board, or  
21 attending a subcommittee meeting thereof authorized by the board, shall  
22 be reimbursed amounts provided in K.S.A. 75-3223(e), and amendments  
23 thereto, from moneys appropriated to the department of revenue from the  
24 Kansas safe access act taxes from the cannabis tax fund established by  
25 section 14, and amendments thereto.

26 (7) Members of the board cannot be excluded for any offense  
27 consisting of conduct for which the Kansas safe access act would likely  
28 have prevented a conviction, but the conduct either occurred prior to the  
29 enactment of the Kansas safe access act or was prosecuted by an authority  
30 other than the state of Kansas, whether as a patient or caregiver.  
31 Candidates who can prove their past convictions would have been negated  
32 by the Kansas safe access act by providing to the cannabis compliance  
33 agency medical records from the time of the conviction for the patient or  
34 records that the patient was receiving care from a caregiver cannot be  
35 excluded from consideration.

36 Sec. 14. (a) This section establishes a cannabis tax fund under the  
37 Kansas department of revenue. The Kansas department of revenue shall  
38 work in conjunction with the cannabis compliance agency and the  
39 compassion board to implement fair tax policies established under this act.

40 (b) The cannabis tax fund is hereby established within the Kansas  
41 department of revenue.

42 (c) Medical cannabis patients will be taxed at a flat 6% rate at  
43 compassion center point of purchase for medical cannabis and medical

1 cannabis products only. All other products, such as delivery items, tools  
2 for use of medicine, storage containers and similar products may be  
3 subject to sales tax.

4 (d) Funds will be deposited into the cannabis tax fund managed by  
5 the Kansas department of revenue and distributed by the same at a  
6 distribution of 2% to the state, 2% to the county and 2% to the city. Funds  
7 from the cannabis tax fund, after meeting costs of Kansas safe access act  
8 infrastructure expenses, will be expended for medical cannabis research,  
9 public health, mental health, substance abuse, school health, school  
10 substance abuse and school mental health programs exclusively.

11 (e) As the cannabis industry is often forced to a cash only business  
12 model:

13 (1) Compassion centers and collectives may pay taxes by cash,  
14 cashier's checks and money orders at their local revenue office;

15 (2) compassion centers and collectives will need to be able to pay  
16 these taxes on a daily or weekly basis, so they are not accumulating large  
17 amounts of cash and being placed at a higher risk for crime;

18 (3) patients, compassion centers and collectives will not be assessed  
19 any excise tax or any sales tax and shall not be subject to K.S.A. 79-5210,  
20 and amendments thereto, for any medical cannabis, or medical cannabis  
21 product;

22 (4) any county, city, township or jurisdiction that opts out of  
23 participation in the Kansas safe access act will be excluded from any tax  
24 benefit, other than what is derived from state benefit from the Kansas safe  
25 access act;

26 (5) sales tax can be levied on any product, item or device in a  
27 compassion center that is not medical cannabis or a medical cannabis  
28 product; and

29 (6) medical cannabis edible products qualify as medicine, and shall  
30 not be taxed under the Kansas food sales tax K.S.A. 79-3633 through 79-  
31 3639, and amendments thereto.

32 Sec. 15. The purpose of this section is to establish guidelines and  
33 standards for packaging and labeling for medical cannabis and medical  
34 cannabis products to ensure all of the necessary and relevant information  
35 to be enforced by the cannabis compliance agency is included. While there  
36 are slight differences in the labeling requirements for each category of  
37 medical cannabis product, all include identical parameters that mandate  
38 the type of packaging for medical cannabis products. The Kansas safe  
39 access act requires that each package or container of medical cannabis,  
40 medical cannabis product and medical cannabis concentrate includes  
41 necessary and relevant information for consumers, does not include health  
42 and physical benefit claims, is easily accessible to consumers, and is clear,  
43 easy to read and noticeable. The cannabis compliance agency shall

1 develop a standardized package and label template and shall develop a  
2 standardized list of information to be included on labels, including, but not  
3 limited to, the following;

4 (1) Every medical cannabis product sold must leave the store in a  
5 package or container that is child-resistant.

6 (2) If the medical cannabis product packaging is not child-resistant,  
7 the compassion center must place that container within an exit package  
8 that is child resistant and opaque so that the product cannot be seen from  
9 outside the packaging, with the exception of brown glass and sublingual  
10 syringes.

11 (3) Identification and consumer warning labels must be affixed to  
12 every individual container of medical cannabis, medical cannabis-infused  
13 product or medical cannabis edible.

14 (b) Every compassion center must ensure the following information is  
15 affixed to every container holding a medical cannabis product:

16 (1) The license number of the medical cannabis cultivation facility  
17 where the medical cannabis product was grown;

18 (2) the license number of the medical cannabis product's  
19 manufacturing facility;

20 (3) the license number of the compassion center that sold the medical  
21 cannabis product to the registered qualified patient;

22 (4) the identity statement and standardized graphic symbol of the  
23 compassion center that sold the product to the registered qualified patient;

24 (5) the production batch lot number assigned to the medical cannabis  
25 concentrate used to produce the product;

26 (6) the production batch lot number assigned to the medical cannabis  
27 product;

28 (7) the date of sale to the consumer;

29 (8) the following warning statements:

30 (A) Body mass, age, metabolism, gender and body chemistry at time  
31 of consumption vary in the effectiveness of the medicine;

32 (B) the intoxicating effects of this medicine may be delayed by two or  
33 more hours;

34 (C) do not operate a vehicle or machinery, especially when first  
35 beginning the use of this medicine;

36 (D) may cause dizziness or drowsiness, and alcohol may intensify  
37 this effect. Avoid mixing with alcohol;

38 (E) keep out of reach of children and animals. Such statement shall be  
39 in bold print;

40 (F) please consult a medical provider when taken with other  
41 medications;

42 (G) for medical use only, to be consumed by registered qualifying  
43 patient only; and

1 (H) if you are pregnant, plan on becoming pregnant or are nursing,  
2 you should consult with your medical provider before using medical  
3 cannabis;

4 (9) The universal symbol, indicating that the container holds medical  
5 cannabis, which must be no smaller than  $\frac{1}{4}$  of an inch by  $\frac{1}{4}$  of an inch to  
6 be set forth by the cannabis compliance agency;

7 (10) a clear set of instructions for proper usage;

8 (11) packaging design must not have cartoons, or in any way attract  
9 interest from children;

10 (12) packaging must prominently display the following in clear and  
11 legible font:

12 (A) Display or inspection seal;

13 (B) patient name and patient ID number;

14 (C) a potency profile expressed in milligrams and the number of  
15 tetrahydrocannabinol servings within the container; and

16 (D) a recommended use by or expiration date for medical cannabis  
17 products;

18 (13) packages containing only dried flower must record the weight of  
19 medical cannabis.

20 Sec. 16. The purpose of this section is to establish guidelines and  
21 standards for packaging and labeling for medical cannabis edible products  
22 to ensure all of the necessary and relevant information to be enforced by  
23 the cannabis compliance agency is included. While there are slight  
24 differences in the labeling requirements for each category of medical  
25 cannabis edible products, all include identical parameters that mandate the  
26 type of packaging for medical cannabis edible products. The Kansas safe  
27 access act requires that each package or container of medical cannabis  
28 edible products includes necessary and relevant information for  
29 consumers, does not include health and physical benefit claims, is easily  
30 accessible to consumers, and is clear, easy to read and noticeable. The  
31 cannabis compliance agency shall develop a standardized label template or  
32 templates and shall develop a standardized list of information to be  
33 included on labels. Edible medical cannabis products must include the  
34 following information, in addition to the information required by the  
35 guidelines of section 15, and amendments thereto:

36 (1) This wording: "The intoxicating effects of this product may be  
37 delayed three to six hours.";

38 (2) an ingredient list including all ingredients used to manufacture the  
39 edible medical cannabis product;

40 (3) a statement regarding required refrigeration if the medical  
41 cannabis product is perishable

42 (4) that the standardized serving size for this product includes no  
43 more than 10 milligrams of active tetrahydrocannabinol and a list on the

1 package of all pharmacologically active ingredients; and

2 (5) if the product uses nuts or another known allergen, a suitable  
3 warning.

4 (b) Bundled, single-serving edible medical cannabis products that are  
5 individually packaged in child-resistant packaging and labeled can be  
6 placed into a larger package that also needs to be child resistant, and  
7 include a list on the package of all pharmacologically active ingredients  
8 contained within the bundled package, including tetrahydrocannabinol that  
9 does not exceed 100 milligrams.

10 (c) Single-serving-size medical cannabis products must list the  
11 following:

12 (1) The total amount of pharmacologically active ingredients in the  
13 package including, but not limited to, tetrahydrocannabinol and  
14 cannabidiol.

15 (2) the expiration date;

16 (3) dietary restriction label and nutritional fact panel;

17 (4) potency tests results for all medical cannabis edible products;

18 (5) only generic food names that describe edible medical cannabis  
19 products;

20 (6) recommended use by or expiration date for medical cannabis  
21 products; and

22 (7) if liquid edible medical cannabis products contains more than one  
23 standardized serving;

24 (d) Each product must be packaged in a child-resistant container that  
25 maintains its child-resistant effectiveness after multiple openings.

26 (e) All containers for liquids shall clearly demark each standardized  
27 serving of liquid edible in a way that enables a reasonable person to  
28 intuitively determine how much of the product constitutes a single serving  
29 of active tetrahydrocannabinol. The portion of the container that clearly  
30 demarks each standardized serving of liquid edible medical cannabis shall  
31 not be opaque.

32 (f) Liquid edible containers that include a dropper or measuring  
33 device shall ensure that the device allows a reasonable person to intuitively  
34 measure and serve a single serving of active tetrahydrocannabinol.

35 Sec. 17. The purpose of this section is to ensure that every medical  
36 cannabis cultivation facility and medical cannabis products manufacturing  
37 facility label each shipping container and container of medical cannabis  
38 with all of the necessary and relevant information for the receiving  
39 medical cannabis establishment. In addition, this section clarifies basic  
40 shipping container requirements. The purpose is to ensure the regulated  
41 community applies proper labeling techniques on all medical cannabis  
42 products.

43 (b) Every medical cannabis cultivation facility and medical cannabis

1 products manufacturing facility must ensure that all medical cannabis is  
2 placed within a sealed, tamper-evident shipping container that contains no  
3 more than one pound of medical cannabis prior to transport or transfer of  
4 any medical cannabis products to another medical cannabis establishment.

5 (c) Every medical cannabis cultivation facility or medical cannabis  
6 products manufacturing facility must ensure that a label is affixed to every  
7 shipping container holding medical cannabis that includes all of the  
8 information required by this section prior to transport or transfer to another  
9 medical cannabis establishment.

10 (d) Every medical cannabis cultivation facility or medical cannabis  
11 products manufacturing facility must ensure the following information is  
12 affixed to every shipping container holding medical cannabis:

13 (1) The license number of the medical cannabis cultivation facility  
14 where the medical cannabis was grown;

15 (2) the harvest batch lot number assigned to the medical cannabis;

16 (3) the net weight using a standard of measure compatible with the  
17 state standardized seed-to-sale tracking system of the medical cannabis  
18 prior to its placement in the shipping container;

19 (4) a complete list of all ecologically sustainable pesticides,  
20 fungicides and herbicides used during the cultivation of the medical  
21 cannabis; and

22 (5) that the results of the test that a medical cannabis testing facility  
23 has conducted on a harvest batch lot, the type of information that must be  
24 labeled shall be limited to the following:

25 (A) A cannabinoid potency profile expressed as a range of  
26 percentages that extends from the lowest percentage to the highest  
27 percentage of concentration for each cannabinoid listed in section 19, and  
28 amendments thereto, and any required by the cannabis compliance agency;

29 (B) every test conducted on that strain of medical cannabis cultivated  
30 by the same medical cannabis cultivation facility within the last three  
31 months; and

32 (C) a statement that the product was tested for contaminants, if tests  
33 for contaminants were conducted according to section 19, and  
34 amendments thereto, and any requirements made by the cannabis  
35 compliance agency.

36 (e) If a medical cannabis cultivation facility or a medical cannabis  
37 products manufacturing facility packages medical cannabis within a  
38 container that is placed within a shipping container, each container must be  
39 affixed with a label containing all of the information required by section  
40 19, and amendments thereto, and any requirements made by the cannabis  
41 compliance agency.

42 Sec. 18. (a) The purpose of this section is to ensure that every  
43 medical cannabis cultivation facility and medical cannabis products

1 manufacturing facility labels each shipping container and container of  
2 medical cannabis concentrates with all of the necessary and relevant  
3 information for the receiving medical cannabis establishment. In addition,  
4 this section clarifies basic shipping container requirements. The cannabis  
5 compliance agency shall ensure every medical cannabis cultivation facility  
6 and medical cannabis products manufacturing facility applies proper  
7 labeling techniques to all medical cannabis concentrates.

8 (b) Every medical cannabis cultivation facility and medical cannabis  
9 products manufacturing facility shall ensure that all medical cannabis  
10 concentrates are placed within a sealed, tamper-evident shipping container  
11 that has no more than one pound of medical cannabis concentrate within it  
12 prior to transport or transfer to another medical cannabis facility or  
13 compassion center.

14 (c) Every medical cannabis cultivation facility or medical cannabis  
15 products manufacturing facility shall ensure that a label is affixed to every  
16 shipping container holding a medical cannabis concentrate that includes all  
17 of the information required by section 19, and amendments thereto, and  
18 any requirements made by the cannabis compliance agency, prior to  
19 transport or transfer to another medical cannabis establishment.

20 (d) Every medical cannabis cultivation facility or medical cannabis  
21 products manufacturing facility shall ensure that the following information  
22 is affixed to every shipping container holding a medical cannabis  
23 concentrate:

24 (1) The license number of the medical cannabis cultivation facility  
25 where the medical cannabis used to produce the medical cannabis  
26 concentrate was grown;

27 (2) the license number of the medical cannabis cultivation facility or  
28 medical cannabis products manufacturing facility that produced the  
29 medical cannabis concentrate;

30 (3) the production batch lot number assigned to the medical cannabis  
31 concentrate contained within the shipping container;

32 (4) the net weight, using a standard of measure compatible with the  
33 seed-to-sale tracking system, of the medical cannabis concentrate prior to  
34 its placement in the shipping container;

35 (5) a complete list of all ecologically sustainable pesticides,  
36 fungicides and herbicides used during the cultivation of the medical  
37 cannabis used to produce the medical cannabis concentrate; and

38 (6) a complete list of solvents and chemicals used to create the  
39 medical cannabis concentrate.

40 (e) Every medical cannabis cultivation facility or medical cannabis  
41 products manufacturing facility shall affix a label to a shipping container  
42 in which a medical cannabis concentrate is placed. The label shall contain  
43 a statement asserting that the medical cannabis concentrate was tested

1 pursuant to section 19, and amendments thereto, and any requirements  
2 made by the cannabis compliance agency.

3 (f) A medical cannabis testing facility shall test every harvest batch  
4 lot used to produce the medical cannabis concentrate for molds, mildew,  
5 filth, microbials, herbicides, pesticides, fungicides, harmful chemicals and  
6 residual solvents, poisons or toxins.

7 (g) When a medical cannabis testing facility tests the production  
8 batch lots of the medical cannabis concentrate within a shipping container  
9 for potency, every medical cannabis cultivation facility or medical  
10 cannabis products manufacturing facility shall ensure that a label is affixed  
11 to the shipping container with a cannabinoid potency profile expressed as a  
12 percentage.

13 (h) When a medical cannabis cultivation facility or a medical  
14 cannabis products manufacturing facility packages a medical cannabis  
15 concentrate within a container that is then placed within a shipping  
16 container, each container shall be affixed with a label containing all of the  
17 information required by section 19, and amendments thereto, and any  
18 requirements made by the cannabis compliance agency.

19 Sec. 19. (a) The purpose of this section is to establish guidelines of  
20 independent testing and certification testing facilities for medical cannabis  
21 and medical cannabis products. The cannabis compliance agency shall  
22 require licensees to test medical cannabis to ensure, at a minimum, that  
23 products sold for human consumption do not contain contaminants that are  
24 injurious to health and to ensure correct labeling.

25 (b) No independent testing facility may handle, test or analyze  
26 cannabis or cannabis products unless the independent testing facility:

27 (1) Has been registered by the cannabis compliance agency;

28 (2) is independent from all other persons and entities involved in the  
29 medical cannabis industry, such that no board member, officer, manager,  
30 owner, partner, principal stakeholder or member of a registered  
31 organization has an interest or voting right in the testing facility  
32 performing medical cannabis testing;

33 (3) has a provisional registration from the cannabis compliance  
34 agency;

35 (4) has established standard operating procedures that provide for  
36 adequate chain of custody controls for samples transferred to the  
37 independent testing facility for testing; and

38 (5) is registered with a third-party accrediting body, such as the  
39 American association for laboratory accreditation (A2LA) or the ANSI-  
40 ASQ national accreditation board (ACLASS), and the assessment and  
41 accreditation process was carried out by a third-party accreditation body  
42 that is itself accredited to the ISO 17011 standard, certified under the  
43 clinical laboratory improvement act (CLIA) and participates in inter-

1 laboratory comparison proficiency testing (ILC/PT) and in association of  
2 commercial cannabis laboratories (ACCL).

3 (c) All testing facilities shall include all of their methods that have  
4 public health implications on their scope of accreditation. This includes, at  
5 a minimum, cannabinoids, pesticides, microbiology, residual solvents and  
6 water activity per the standards outlined in the American herbal  
7 pharmacopoeia cannabis inflorescence and leaf monograph, which shall be  
8 the standard for all testing facilities:

9 (A) Testing facilities shall pass rigorous and regular proficiency  
10 testing programs, covering all methods on the accreditation scope that  
11 carry public health implications. Proficiency testing must be administered  
12 by a body that is accredited to the ISO 17043 standard.

13 (B) Testing facilities shall be managed by a full-time onsite chemist,  
14 with a doctoral degree in a relevant field or at least four years of  
15 experience specific to analytical chromatography.

16 (C) Testing facilities shall notify the cannabis compliance agency  
17 within one business day after the testing facility obtains notice of any kind  
18 that the facility's accreditation has been denied, suspended or revoked.

19 (c) A medical cannabis cultivation facility shall:

20 (1) Collect a random, homogenous sample for testing by segregating  
21 harvest batch lots of individual strains of flowers and then selecting a  
22 random sample from various locations from within each harvest batch lot  
23 in an amount required by the medical cannabis testing facility and no less  
24 than 2.5 grams;

25 (2) designate an individual responsible for collecting each sample,  
26 and that individual shall:

27 (A) Prepare a signed statement showing that each sample has been  
28 randomly selected for testing;

29 (B) provide the signed statement to the medical cannabis testing  
30 facility; and

31 (C) maintain a copy as a business record;

32 (3) transport the sample to the medical cannabis testing facility's  
33 licensed premises in compliance with this section, and any requirements  
34 made by the cannabis compliance agency;

35 (d) A medical cannabis cultivation facility shall segregate the entire  
36 harvest batch lot from which the testing sample was selected until the  
37 medical cannabis testing facility reports the results from its tests:

38 (1) During this period of segregation, the medical cannabis  
39 cultivation facility that provided the sample shall maintain the harvest  
40 batch lot in a secure, cool and dry location to prevent the medical cannabis  
41 from becoming contaminated or losing its efficacy;

42 (2) the facility that provided the sample may not sell or transport any  
43 medical cannabis from the segregated batch lot until the medical cannabis

1 testing facility has completed its testing and provided those results in  
2 writing to the medical cannabis cultivation facility that provided the  
3 sample; and

4 (3) shall maintain the test results as a business record.

5 (e) A licensed testing facility shall issue a certificate of analysis for  
6 each harvest batch lot with supporting data to report both of the following:

7 (1) Listing the chemical profile, including, but not limited to, all of  
8 the following:

9 (A) Tetrahydrocannabinol (THC);

10 (B) tetrahydrocannabinolic acid (THCA);

11 (C) cannabidiol (CBD);

12 (D) cannabidiolic acid (CBDA);

13 (E) the terpenes described in the most current version of the cannabis  
14 inflorescence monograph published by the American herbal  
15 pharmacopoeia;

16 (F) cannabigerol (CBG);

17 (G) cannabinol (CBN); and

18 (H) any other compounds required by the cannabis compliance  
19 agency.

20 (2) That the presence of contaminants does not exceed the levels that  
21 are the lesser of either the most current version of the American herbal  
22 pharmacopoeia monograph or the cannabis compliance agency's standards.  
23 For purposes of this paragraph, contaminants includes, but is not limited to,  
24 all of the following:

25 (A) Residual solvent or processing chemicals;

26 (B) foreign material, including, but not limited to, hair, insects or  
27 similar or related adulterant;

28 (C) microbiological impurity, including total aerobic microbial count,  
29 total yeast mold count, *P. aeruginosa*, *aspergillus* spp., *S. aureus*, aflatoxin  
30 B1, B2, G1 or G2 or ochratoxin A;

31 (D) whether the batch is within specification for odor and appearance;

32 (E) residual levels of volatile organic compounds shall be below the  
33 lesser of either the specifications set by the United States pharmacopoeia  
34 (U.S.P. chapter 467) or those set by the cannabis compliance agency; and

35 (F) methods:

36 (i) High performance liquid chromatography in tandem with triple-  
37 quadruple mass spectrometry (HPLC-MS/MS) to identify and quantify  
38 trace pesticide, fungicide and PGR residues;

39 (ii) 3M petrifilm and real-time polymerase chain-reaction (qPCR)  
40 technology, gas chromatography with flame ionized detection (FID) to test  
41 over 35 commonly found terpenes; and

42 (iii) utilizing a combination of gas chromatography/FID, headspace  
43 analysis and mass spectrometry for residual solvent testing.

1 (f) The cannabis compliance agency shall require that a test batch be  
2 submitted to a specific medical cannabis testing facility for testing to  
3 verify compliance, perform investigations, compile data or address a  
4 public health and safety concern through test batch samples:

5 (1) A medical cannabis testing facility shall establish a standard  
6 minimum weight of medical cannabis and medical cannabis concentrate  
7 that must be included in a test batch for every type of test that it conducts,  
8 but must be at least 2.5 grams;

9 (2) a medical cannabis testing facility must establish a standard  
10 number of finished product it requires to be included in each test batch of  
11 medical cannabis-infused product for every type of test that it conducts;

12 (3) a medical cannabis testing facility may not accept a test batch that  
13 is smaller than its standard minimum amount; and

14 (4) a medical cannabis testing facility may not accept a test batch or  
15 sample that it knows was not taken in accordance with the Kansas safe  
16 access act or any additional cannabis compliance agency sampling  
17 procedures or was not collected by qualified personnel.

18 (g) If medical cannabis, medical cannabis concentrate or medical  
19 cannabis-infused product fails a contaminant test, then the medical  
20 cannabis testing facility shall immediately notify the medical cannabis  
21 cultivation facility or medical cannabis product manufacturer that  
22 submitted the sample for testing and report the failure in accordance with  
23 all cannabis compliance agency procedures.

24 (h) If medical cannabis, medical cannabis concentrate or medical  
25 cannabis-infused product is found to have a contaminant in levels  
26 exceeding those established as permissible under this section, then it shall  
27 be considered to have failed contaminant testing. Notwithstanding the  
28 permissible levels established in this section, the cannabis compliance  
29 agency may determine, upon good cause and reasonable grounds, that a  
30 particular test batch presents a risk to the public health or safety and  
31 therefore shall be considered to have failed a contaminant test.

32 (i) For purposes of the microbiological test a CO2 and solvent-based  
33 extracts sample shall be deemed to have passed if it satisfies the  
34 recommended microbial and fungal limits for cannabis products in colony  
35 forming units per gram (CFU/g) set out in the American herbal  
36 pharmacopoeia monograph as follows:

37	Total viable aerobic bacteria.....	104
38	Total yeast and mold.....	103
39	Total coliforms bile-tolerant gram-negative bacteria.....	102
40	E. coli (pathogenic strains) and salmonella spp.....	not detected in 1 gram

41 (j) Unprocessed materials include minimally processed crude  
42 cannabis preparations such as inflorescences, accumulated resin glands  
43 (kief) and compressed resin glands (hashish).

1 (k) Processed materials include various solid or liquid-infused edible  
2 preparations, oils, topical preparations and water-processed resin glands  
3 (bubble hash).

4 (l) For purposes of the mycotoxin test, a cannabis sample shall be  
5 deemed to have passed if it meets the following standards for tests and  
6 specifications:

7 Aflatoxin B1.....	<20 µg/kg of substance
8 Aflatoxin B2.....	<20 µg/kg of substance
9 Aflatoxin G2.....	<20 µg/kg of substance
10 Ochratoxin A.....	<20 µg/kg of substance

11 (m) Testing facilities shall contact the cannabis compliance agency  
12 when STEC and salmonella are detected beyond the acceptable limits.

13 (n) These named solvents and pesticides are not permitted for use  
14 under this act, but must be tested for as contaminants. Testing shall be for  
15 specific pesticides listed in section 19, and amendments thereto, any and  
16 all solvents, permitted or not permitted, under section 20, and amendments  
17 thereto:

- 18 (A) Butanes;
- 19 (B) heptanes;
- 20 (C) benzene;
- 21 (D) toluene;
- 22 (E) hexane;
- 23 (F) total xylenes (m,p, o-xylenes);
- 24 (G) azadirachtin;
- 25 (H) myclobutanil;
- 26 (I) imidacloprid;
- 27 (J) avermectin;
- 28 (K) bifenazate; and
- 29 (L) etoxazole; and
- 30 (M) metals substance:

31 Arsenic max limit.....	<10 PPM
32 Cadmium max limit.....	<4.1 PPM
33 Lead max limit.....	<10 PPM
34 Mercury max limit.....	<2.0 PPM

35 (o) A medical cannabis testing facility shall notify the cannabis  
36 compliance agency if a test batch lot is found to contain levels of a  
37 contaminant not listed within this section that could be injurious to human  
38 health if consumed.

39 Sec. 20. (a) A medical cannabis testing facility shall test and report  
40 results for any cannabinoid, provided the test is conducted in accordance  
41 with the cannabis compliance agency's medical cannabis testing facility  
42 certification policy statement.

43 (b) For potency tests:

1 (1) Conducted on medical cannabis and medical cannabis  
2 concentrate, results must be reported by listing a single percentage  
3 concentration for each cannabinoid that represents an average of all  
4 samples within the test batch lot;

5 (2) conducted on medical cannabis-infused product results, results  
6 must be reported by listing the total number of milligrams contained  
7 within a single medical cannabis-infused product unit for sale for each  
8 cannabinoid and affirming the tetrahydrocannabinol content is  
9 homogeneous; and

10 (3) conducted on medical cannabis, testing must occur on dried and  
11 cured medical cannabis that is ready for sale.

12 (c) If the tetrahydrocannabinol content of a medical cannabis-infused  
13 product is determined through testing not to be homogeneous then it shall  
14 be considered to have failed potency testing.

15 (d) A medical cannabis-infused product shall be considered not to be  
16 homogeneous if 10% of the infused portion of the medical cannabis-  
17 infused product contains more than 20% of the total tetrahydrocannabinol  
18 contained within the entire medical cannabis-infused product.

19 (e) Potency levels of edibles must meet standards set forth in section  
20 19, and amendments thereto.

21 (f) A potency variance for cannabis-infused products and edibles of  
22 no more than plus or minus 5% is allowed.

23 (g) The cannabis compliance agency shall determine procedures to  
24 address potency misrepresentations.

25 (h) (1) If the sample failed the testing, the entire batch lot from which  
26 the sample was taken, the sample shall, if applicable, be recalled as  
27 provided for by standards set forth by the cannabis compliance agency,  
28 and disposed of in accordance with section 22, and amendments thereto;

29 (2) if the sample failed any test other than pesticides and metals, the  
30 batch lot may be used to make a CO<sub>2</sub> or solvent-based extract. After  
31 processing, the CO<sub>2</sub> or solvent-based extract must still pass all required  
32 tests.

33 (i) The testing facility shall file with the cannabis compliance agency  
34 an electronic copy of each testing facility test result for any test batch that  
35 does not pass the microbiological, mycotoxin, metals or pesticide chemical  
36 residue test at the same time that it transmits those results to the cultivation  
37 center.

38 (j) In addition, the testing facility shall maintain the test results for at  
39 least five years and make them available at the cannabis compliance  
40 agency's request.

41 (k) A medical cannabis manufacturer must develop and implement a  
42 written quality assurance program that assesses the chemical and  
43 microbiological composition of medical cannabis.

1 (l) Assessment includes a profile of the active ingredients, including  
2 shelf life, and the presence of inactive ingredients and contaminants. A  
3 medical cannabis manufacturer shall use these testing results to determine  
4 appropriate storage conditions and expiration dates.

5 (m) The testing facilities shall develop procedures and the  
6 manufacturer must follow written procedures for sampling medical  
7 cannabis that require the manufacturer to:

8 (1) Conduct sample collection in a manner that provides analytically  
9 sound and representative samples;

10 (2) document every sampling event and provide this documentation  
11 to the cannabis compliance agency upon request;

12 (3) describe all sampling and testing plans in written procedures that  
13 include the sampling method and the number of units per batch to be  
14 tested;

15 (4) ensure that random samples from each batch:

16 (A) Are taken in an amount necessary to conduct the applicable test;

17 (B) are labeled with the batch unique identifier;

18 (C) are submitted for testing;

19 (D) have their results retained for at least five years;

20 (E) are rejected, if a medical cannabis batch fails to meet established  
21 standards, specifications, and any other relevant quality control criteria;

22 (F) follow the cannabis compliance agency guidelines for responding  
23 to results indicating contamination, and determining the source of  
24 contamination; and

25 (G) have the documentation of test results, assessments and  
26 destruction of medical cannabis retained for at least five years; and

27 (5) the quality assurance program must include procedures for  
28 performing stability testing of each product type produced to determine  
29 product shelf life that addresses:

30 (A) Sample size and test intervals based on statistical criteria for each  
31 attribute examined to ensure valid stability estimates;

32 (B) storage conditions for samples retained for testing; and

33 (C) reliable and specific test methods; and

34 (6) stability studies must include:

35 (A) Medical cannabis testing at appropriate intervals;

36 (B) medical cannabis testing in the same container-closure system in  
37 which the product is marketed; and

38 (C) testing medical cannabis for reconstitution at the time of  
39 dispensing, as directed in the labeling, and after the samples are  
40 reconstituted.

41 (n) If shelf-life studies have not been completed before the  
42 implementation of this act, a medical cannabis manufacturer may assign a  
43 tentative expiration date, based on any available stability information. The

1 manufacturer must concurrently conduct stability studies to determine the  
2 actual product expiration date.

3 (o) After the manufacturer verifies the tentative expiration date or  
4 determines the appropriate expiration date, the medical cannabis  
5 manufacturer must include that expiration date on each batch of medical  
6 cannabis products, and provide supporting documentation to the cannabis  
7 compliance agency. Stability testing must be repeated if the manufacturing  
8 process or the product's chemical composition is changed.

9 (p) A medical cannabis manufacturer must retain a uniquely labeled  
10 reserve sample that represents each batch of medical cannabis and store it  
11 under conditions consistent with product labeling. The reserve sample  
12 must be stored in the same immediate container-closure system in which  
13 the medical cannabis is marketed, or in one that has similar characteristics.  
14 The reserve sample must consist of at least twice the quantity necessary to  
15 perform all the required tests. A medical cannabis manufacturer must  
16 retain the reserve for at least one year following the batch's expiration date.

17 (q) If the cannabis compliance agency deems that public health may  
18 be at risk, the cannabis compliance agency may require the manufacturer  
19 to retest any sample of plant material or medical cannabis product.

20 (r) A cultivation facility shall not be required to sample and test  
21 cannabis, if the batch was previously sampled, and the sample was tested  
22 by another cultivation facility and determined to have passed the testing  
23 requirements of this section and can provide such documentation to the  
24 cannabis compliance agency.

25 (s) If a sample does not pass testing, the producer shall determine  
26 whether remediation is appropriate, and test another sample from the batch  
27 at issue or identify processes that will render the dried cannabis or  
28 cannabis-derived product safe and retest in accordance with the  
29 requirements of this section. If the batch cannot be remediated to where it  
30 meets the testing requirements of this section, the cultivation facility shall  
31 notify the cannabis compliance agency within 24 hours, and confirm the  
32 destruction and disposal of the dried cannabis or concentrated cannabis-  
33 derived product per the guidelines laid out in section 22, and amendments  
34 thereto.

35 (t) A testing facility must submit its quality control manual to the  
36 cannabis compliance agency.

37 (1) The manual may be mailed to the cannabis compliance agency or  
38 may be sent electronically via the cannabis compliance agency's website.

39 (2) The cannabis compliance agency shall create a list of laboratories  
40 that have submitted a quality control manual by the deadline assigned by  
41 the cannabis compliance agency and post the list on the cannabis  
42 compliance agency's website.

43 (3) A compassion center may only accept test results from a testing

1 facility listed on the cannabis compliance agency's website.

2 (4) The manual must be signed by an directing official of the testing  
3 facility with an attestation that the results are accurate and that testing was  
4 done using valid testing methodologies and a quality system as required in  
5 this section.

6 (5) If the cannabis compliance agency determines that a testing  
7 facility is not using valid testing methodologies, does not have a quality  
8 system or is not producing test result reports in accordance with this  
9 section, the cannabis compliance agency may remove the name of the  
10 testing facility from the list on the cannabis compliance agency's website.

11 (u) The cannabis compliance agency may conduct audit testing of a  
12 medical cannabis cultivation facility or medical cannabis product  
13 manufacturer to access whether they are operating within the guidelines of  
14 this act.

15 (v) The testing facility shall require each testing facility employee to  
16 complete and execute an application for employment on a form provided  
17 by the the cannabis compliance agency:

18 (1) The testing facility shall establish and follow written procedures  
19 for verifying the experience and education of testing facility employees;

20 (2) the testing facility shall submit the registration information for  
21 each testing facility employee within 15 days after the date the testing  
22 facility employee was hired; and

23 (3) upon termination of the association of the registered independent  
24 testing facility employee with the testing facility, the independent testing  
25 facility shall:

26 (A) Obtain any keys or other entry devices from the terminated  
27 testing facility employee;

28 (B) ensure the terminated testing facility employee no longer has  
29 access to the testing facility premises; and

30 (C) within one business day of the termination of the testing facility  
31 employee, the independent testing facility notifies the cannabis compliance  
32 agency of the termination.

33 (w) Candidates for testing and laboratory personnel positions shall  
34 not be excluded for any conviction for an offense consisting of conduct  
35 that would not have been considered an offensive subsequent to the  
36 conduct of the Kansas safe access act or was prosecuted as a patient or  
37 caregiver by an authority other than the state of Kansas. Candidates who  
38 can demonstrate that their past convictions would have been negated by  
39 the Kansas safe access act may provide the cannabis compliance agency  
40 medical records from the time of the conviction sharing that such  
41 candidate was a patient receiving care from a caregiver and shall not be  
42 excluded from consideration.

43 Sec. 21. (a) The purpose of this section is to establish guidelines

1 regarding the manufacture of medical cannabis products, to ensure that  
2 such products do not contain harmful contaminants and to protect public  
3 safety through the use of best practices.

4 (b) The following methods of oil, tincture and extract production  
5 prohibited are:

- 6 (1) Butane;
- 7 (2) alcohol cook methods over open flame; and
- 8 (3) propane.

9 (c) Solvents banned for all products sold or purchased by compassion  
10 centers include all petroleum based products. Compassion centers shall not  
11 purchase or sell solvents, including petroleum-based products.

12 (d) The following extract methods are allowed:

- 13 (1) Tabletop infusing machines;
- 14 (2) slow cooker;
- 15 (3) rosin heat press and machines;
- 16 (4) ice water;
- 17 (5) food-grade glycerin;
- 18 (6) grain alcohol methods;
- 19 (7) supercritical closed loop CO<sub>2</sub> extraction machines, including  
20 tabletop machines;
- 21 (8) dry ice; and
- 22 (9) all other non-explosive, non-toxic solvents and new technologies  
23 or methods as long as such methods comply with the requirements of this  
24 act.

25 Sec. 22. (a) The cannabis compliance agency is hereby established as  
26 a division of the department of health and environment. The cannabis  
27 compliance agency shall oversee licensing, compliance and enforcement.  
28 The agency shall work in consultation with the compassion board.

29 (b) All license applicants shall be residents of Kansas for at least two  
30 years upon the date of their license application.

31 (c) The cannabis compliance agency shall submit an annual report to  
32 the legislature that includes all of the following information:

- 33 (1) The number of applications and renewals filed for identification  
34 cards;
- 35 (2) the number of qualifying patients and designated primary  
36 caregivers approved in each county;
- 37 (3) the nature of the medical conditions of the qualifying patients;
- 38 (4) the number of identification cards revoked;
- 39 (5) the number of medical providers providing written certifications  
40 for qualifying patients;
- 41 (6) the number of registered compassion centers; and
- 42 (7) the number of compassion center employees.
- 43 (e) Such report shall not contain any personally identifiable

1 information.

2 (e) It shall be a class B misdemeanor for any person, including an  
3 employee or official of the cannabis compliance agency or other state  
4 agency or local governmental agency, to breach the confidentiality of  
5 information obtained pursuant to section 7(j), and amendments thereto.  
6 This section shall not prevent the following notifications:

7 (1) Cannabis compliance agency employees may notify law  
8 enforcement about falsified or fraudulent information submitted to the  
9 cannabis compliance agency, so long as the employee who suspects that  
10 falsified or fraudulent information has been submitted confers with such  
11 employee's supervisor and both agree that circumstances exist that warrant  
12 reporting;

13 (2) the cannabis compliance agency employees may notify state or  
14 local law enforcement about apparent criminal violations of the Kansas  
15 safe access act, if the employee who suspects the offense confers with such  
16 employee's supervisor and both agree that circumstances exist that warrant  
17 reporting; and

18 (3) compassion center employees may notify the cannabis compliance  
19 agency of a suspected violation or attempted violation of the Kansas safe  
20 access act or the rules and regulations adopted hereunder, if the employee  
21 who suspects the offense confers with such employee's supervisor and  
22 both agree that circumstances exist that warrant reporting.

23 (g) (1) The cannabis compliance agency shall maintain a website  
24 which shall include the following information:

25 (A) The full text of the act;

26 (B) information on application processes and regulations for:

27 (i) Registered qualified patients;

28 (ii) compassion center licenses;

29 (iii) primary caregivers;

30 (iv) cultivating caregivers;

31 (v) cultivation facility licenses;

32 (vi) manufacturing facility licenses;

33 (vii) testing facility certification; and

34 (viii) workforce education;

35 (C) information for law enforcement, including:

36 (i) Information on a verification system; and

37 (ii) all pertinent contacts to provide support;

38 (D) information and contacts for health inspections, environmental  
39 inspections, compliance inspections and third party ecological  
40 sustainability inspections;

41 (E) food handling guidelines;

42 (F) information on the ecologically sustainable certification process,  
43 regulations and contact information;

- 1 (G) educational outreach and incentive program information, videos  
2 and printable information sheets for the driving under the influence of  
3 alcohol or drugs outreach program and information directing patients who  
4 are pregnant, planning on becoming pregnant or nursing to consult their  
5 medical provider before use;
- 6 (H) information for medical providers and first responders on training  
7 seminars, research materials and continuing education unit courses;
- 8 (I) information on workforce education and online courses for  
9 compassion center employees, growers, processors, trimmers, primary  
10 caregivers, cultivating caregivers and registered qualifying patient  
11 growers;
- 12 (J) contact information for all related agencies;
- 13 (K) registered qualifying patient section with a:
- 14 (i) medical provider search;
- 15 (ii) caregiver search;
- 16 (iii) compassion center or collective search;
- 17 (iv) information on ecologically sustainable and sustainable growing  
18 practices and products;
- 19 (v) customer service phone number and email address;
- 20 (vi) information and contacts for the appeals process; and
- 21 (vii) links for ancillary businesses.
- 22 (2) The cannabis compliance agency shall establish an edibles  
23 educational outreach and incentive program that shall include:
- 24 (A) Printable guidelines and instructional videos on the cannabis  
25 compliance agency webpages;
- 26 (B) materials at compassion centers, including posters and  
27 instructional sheets; and
- 28 (C) lockbox storage for medical cannabis products offered at cost  
29 through the compassion centers, including:
- 30 (i) purchase will qualify patients for discounts on renewal fees; and
- 31 (ii) compassion centers that meet cannabis compliance agency goals  
32 of lockbox sales to edible sales target ratios can qualify for discounts on  
33 renewal fees.
- 34 (h) The agency shall establish an educational outreach on safe extract  
35 production methods. Such outreach shall include printable guidelines and  
36 instructional videos on the cannabis compliance agency website, materials  
37 at compassion centers, including posters and instructional sheets and  
38 information and forms to report any and all changes from patients,  
39 caregivers or compassion centers.
- 40 (i) A process shall be implemented for customer service to register  
41 and track questions and complaints with a clearly outlined procedure to  
42 escalate questions and complaints.
- 43 (j) The agency shall establish rules and regulations or the storage and

1 transportation of medical cannabis and medical cannabis products. The  
2 agency shall also develop a universal symbol indicating the package  
3 contains medical cannabis.

4 (k) (1) The agency may refuse or deny a license issuance, renewal or  
5 reinstatement for good cause. As used in this subsection, "good cause"  
6 means:

7 (A) The licensee or applicant has violated, does not meet or has failed  
8 to comply with any of the terms, conditions or provisions of this act, any  
9 rules and regulations adopted hereunder;

10 (B) the licensee or applicant has failed to comply with any special  
11 terms or conditions that were placed on its license pursuant to an order of  
12 the cannabis compliance agency; or

13 (C) the licensed premises has operated in a manner that adversely  
14 affects the public health or the safety of the immediate neighborhood in  
15 which the premises is located.

16 (2) If the cannabis compliance agency denies a license pursuant to  
17 this subsection, the applicant shall be entitled to proceedings conducted in  
18 accordance with the Kansas administrative procedure act. The cannabis  
19 compliance agency shall provide written notice of the grounds for denial to  
20 the applicant and to the local jurisdiction at least 15 days prior to the  
21 hearing.

22 (l) The cannabis compliance agency shall not issue a license to any  
23 person unless such person's character, record and reputation are  
24 satisfactory to the agency. The cannabis compliance agency shall consider  
25 if the applicant has provided a false application, committed a fraudulent  
26 act or a criminal history record not covered by exemptions listed in  
27 sections 6, 7, 10 and 13, and amendments thereto. This act does not  
28 preclude applicants convicted of a felony or other offenses involving moral  
29 turpitude from applying for and receiving a license. The fact that such  
30 applicant has been convicted of a felony or other offense involving moral  
31 turpitude and pertinent circumstances connected with such conviction shall  
32 be given consideration in determining whether the applicant is of good  
33 moral character. Consideration shall be given based upon the ability of the  
34 applicant to show:

35 (1) Rehabilitation;

36 (2) educational achievements;

37 (3) financial solvency;

38 (4) good community standing;

39 (5) lack of arrest or conviction;

40 (6) lack of parole violation;

41 (7) current payment on taxes;

42 (8) lack of other statutory violations; and

43 (9) residency in Kansas for at least two years prior to the date of

1 application.

2 (m) In investigating the qualifications of an applicant or a licensee,  
3 the cannabis compliance agency may have access to criminal history  
4 record information furnished by a criminal justice agency subject to any  
5 restrictions imposed by such agency. In the event the cannabis compliance  
6 agency considers the applicant's criminal history, the cannabis compliance  
7 agency shall also consider any information provided by the applicant  
8 regarding such criminal history record, including, but not limited to,  
9 evidence of rehabilitation, character references and educational  
10 achievements, especially those items pertaining to the time between the  
11 applicant's last criminal conviction and the application date.

12 (n) At the time of filing an application for a state medical cannabis  
13 establishment license, applicants shall submit a set of fingerprints and  
14 personal information history on forms prepared by the cannabis  
15 compliance agency. The cannabis compliance agency shall submit the  
16 fingerprints to the Kansas bureau of investigation for the purpose of  
17 conducting fingerprint-based criminal history record checks. An applicant  
18 who has previously submitted fingerprints for state licensing purposes may  
19 request the cannabis compliance agency use the fingerprints on file. The  
20 cannabis compliance agency shall use the information resulting from the  
21 criminal history record check to investigate and determine whether an  
22 applicant is qualified to hold a state license pursuant to guidelines outlined  
23 in this section:

24 (1) The cannabis compliance agency may verify any of the  
25 information an applicant is required to submit;

26 (2) the cannabis compliance agency shall not approve an application  
27 for the issuance of a state license:

28 (A) If the application for the license concerns a particular location  
29 that is the same as a location for which, within two year immediately  
30 preceding the date of the application, the cannabis compliance agency  
31 denied; or

32 (B) until it is established that the applicant is, or will be entitled to  
33 possession of the premises for which the application is made under a lease,  
34 rental agreement, or other arrangement for possession of the premises.

35 (o) A state license granted under the provisions of this act are not  
36 transferable except as provided in this section, but this section does not  
37 prevent a change of location:

38 (1) For a transfer of ownership, a license holder shall apply to the  
39 cannabis compliance agency or a transfer of ownership a license holder  
40 shall apply to the cannabis compliance agency on forms prepared and  
41 furnished by the cannabis compliance agency, the cannabis compliance  
42 agency shall consider only the requirements of this act and any rules and  
43 regulations promulgated by the cannabis compliance agency and any other

1 local restrictions.

2 (2) The new owner applicant must pass a fingerprint based criminal  
3 history check as required by the cannabis compliance agency and obtain  
4 the required identification prior to owning the operation.

5 (3) Each license issued under this act is separate and distinct. It is  
6 unlawful for a person to exercise any privileges granted under a license  
7 other than the license that the person holds or for a licensee to allow any  
8 other person to exercise the privileges granted under the licensee's license.  
9 A separate license shall be required for each specific business or business  
10 entity and each geographical location.

11 (4) At all times a licensee shall possess and maintain possession of  
12 the premises for which the license is issued by ownership, lease, rental or  
13 other arrangement for possession of the premises.

14 (5) The licenses issued pursuant to this act must specify the date of  
15 issuance, the period of licensure, the name of the licensee and the premises  
16 licensed. The licensee shall conspicuously place the license at all times on  
17 the licensed premises.

18 (6) A licensee may move the permanent location to any other place in  
19 Kansas once permission to do so is granted by the state and local  
20 jurisdiction provided for in this act. Upon receipt of an application for  
21 change of location, the cannabis compliance agency shall within seven  
22 days, submit a copy of the application to the local jurisdiction to determine  
23 whether the transfer complies with all local restrictions on change of  
24 location.

25 (7) In permitting a change of location, the local jurisdiction shall  
26 consider all reasonable restrictions that are or may be placed upon the  
27 location by the governing board of the municipality, city and county, and  
28 any such change in location shall be in accordance with all requirements of  
29 this act and rules and regulations promulgated pursuant to this act.

30 (8) Ninety days prior to the expiration date of an existing license, the  
31 cannabis compliance agency shall notify the licensee of the expiration date  
32 by first class mail at the licensee's address of record with the cannabis  
33 compliance agency. A licensee may apply for the renewal of an existing  
34 license to the state licensing authority not less than 30 days prior to the  
35 date of expiration. Upon receipt of an application for renewal of an  
36 existing license, and any applicable fees, the state cannabis compliance  
37 agency shall, within seven days, submit a copy of the application to the  
38 local jurisdiction to determine whether the application complies with all  
39 local restrictions on renewal of license. The cannabis compliance agency  
40 shall not accept an application for renewal after the date of expiration  
41 except as provided in this section.

42 (9) The cannabis compliance agency may extend the expiration date  
43 of the license application and accept a late application for renewal of a

1 license. The cannabis compliance agency, in its discretion, subject to the  
2 requirements of this subsection and based upon reasonable grounds, may  
3 waive the 30-day time requirement set forth in this subsection, for a  
4 licensee whose license has been expired for not more than 90 days may  
5 file a late renewal application upon the payment of a non refundable late  
6 application fee of \$200. If a licensee completes a late renewal application  
7 and pays the requisite fees, they may continue to operate until the cannabis  
8 compliance agency takes final action to approve or deny the licensee's late  
9 renewal unless the cannabis compliance agency summarily suspends the  
10 license pursuant to this section and rules and regulations promulgated  
11 pursuant to this act. The cannabis compliance agency may administratively  
12 continue the license and accept a later application for renewal of a license  
13 at the discretion of the cannabis compliance agency.

14 (10) The cannabis compliance agency, in its discretion, may revoke or  
15 elect not to renew any license if it determines that the licensed premises  
16 have been inactive, without good cause, for at least one year.

17 (11) The cannabis compliance agency shall require a complete  
18 disclosure of all persons having a direct or indirect financial interest, and  
19 the extent of such interest, in each license issued under this section.

20 (12) This section is intended to prohibit and prevent the control of the  
21 outlets for the sale of medical cannabis or medical cannabis products by a  
22 person or party other than the persons licensed pursuant to the provisions  
23 of this section.

24 (13) For the purpose of regulating the cultivation, manufacture,  
25 distribution, sale and testing of medical cannabis and medical cannabis  
26 products the cannabis compliance agency in its discretion upon receipt of  
27 an application in the prescribed form may issue and grant to the applicant a  
28 license from any of the following classes, subject to the provisions and  
29 restrictions provided by this act:

30 (A) Compassion center license;  
31 (B) medical cannabis cultivation facility license;  
32 (C) medical cannabis products manufacturing license;  
33 (D) medical cannabis testing facility license; and  
34 (E) occupational licenses and registrations for owners, managers,  
35 operators, employees, contractors, and other support employees employed  
36 by, working in, or having access to restricted areas of the licensed  
37 premises, as determined by the cannabis compliance agency.

38 (14) A licensee may operate a licensed medical cannabis center, an  
39 optional cultivation facility, a medical cannabis-infused products  
40 manufacturing facility, and any medical cannabis establishment at the  
41 same location if the local jurisdiction permits a dual operation.

42 (15) A compassion center:  
43 (A) license shall be issued only to a person selling medical cannabis

1 or medical cannabis products pursuant to the terms and conditions of this  
2 section;

3 (B) may cultivate its own medical cannabis if it obtains a medical  
4 cannabis cultivation facility license or it may purchase medical cannabis  
5 from a licensed medical cannabis cultivation facility;

6 (C) may purchase not more than 30% of its total on-hand inventory of  
7 medical cannabis from another licensed medical cannabis establishment  
8 not owned by the compassion center or another medical cannabis  
9 cultivation facility; and

10 (D) may sell no more than 30% of its total on-hand inventory to  
11 another Kansas licensed medical cannabis establishment.

12 (p) The cannabis compliance agency may grant a temporary waiver to  
13 a compassion center or applicant if the compassion center or applicant  
14 suffers a catastrophic event related to its inventory or to a new compassion  
15 center licensee for a period not to exceed 90 days so the new licensee can  
16 cultivate the necessary medical cannabis to comply with this subsection.

17 (q) The cannabis compliance agency shall work with the office of the  
18 state bank commissioner of Kansas, the Kansas department of revenue and  
19 any other pertaining departments or offices, to establish a list of all state-  
20 chartered banks, trust companies, mortgage businesses, supervised lenders,  
21 credit service organizations and money transmitters that do business in the  
22 state of Kansas and are willing to establish methods of transactions and  
23 commerce streams for the compassion centers, medical cannabis  
24 cultivation facilities and medical cannabis product manufacturers.

25 (r) The cannabis compliance agency shall keep record of and  
26 establish guidelines for security employees for compassion centers,  
27 cultivation facilities, cannabis product manufacturers and transport crews,  
28 including:

29 (1) Security professional positions shall be given preference to  
30 verified veterans of the armed services;

31 (2) the minimum age for employees shall be 25 years, but exceptions  
32 may be made for outstanding service record or other distinguishing  
33 factors;

34 (3) all training documents, qualifications, experience and personal  
35 resumes should be turned over or made available to cannabis compliance  
36 agency, as well as employing entities;

37 (4) employees shall be Kansas residents, or stationed in Kansas;

38 (5) equipment shall be in minimum serviceable condition without  
39 defects;

40 (6) established methods and protocols for:

41 (A) Supervision of construction; or

42 (B) law enforcement liaison;

43 (C) procuring all equipment;

- 1 (D) scheduling training and records of training received;
- 2 (E) logistics of training;
- 3 (F) personnel scheduling;
- 4 (G) alarm monitoring;
- 5 (H) complete hiring process, including oral boards and background
- 6 checks including social media platform reviews;
- 7 (I) employee surveillance or investigations;
- 8 (J) procuring proper insurance;
- 9 (K) twenty-four-hour response to any issues with either facility and
- 10 personal security of any employees if needed;
- 11 (L) visual monitoring, utilizing:
  - 12 (i) Grow monitoring;
  - 13 (ii) remote check-in;
  - 14 (iii) IP video, including full high-definition resolution;
  - 15 (iv) wide dynamic range;
  - 16 (v) protective housing; and
  - 17 (vi) NVR or video management software.
- 18 (7) location and site security characteristics;
- 19 (8) secured employee parking;
- 20 (9) around the clock coverage;
- 21 (10) security systems;
- 22 (11) maintenance of security systems;
- 23 (12) access control, including ingress and egress;
- 24 (13) perimeter security;
- 25 (14) product security;
- 26 (15) security threats and contingency planning;
- 27 (16) transnational security;
- 28 (17) delivery security;
- 29 (18) human resource policies;
- 30 (19) employee security training;
- 31 (20) inventory control;
- 32 (21) guest, media and visitor procedures;
- 33 (22) neighborhood involvement;
- 34 (23) emergency response;
- 35 (24) loss prevention; or
- 36 (25) employee theft.
- 37 (s) The cannabis compliance agency is authorized to develop all
- 38 parameters and qualifications for philanthropic equity investors seeking to
- 39 supply collective nonprofits with development capital.
- 40 (t) The cannabis compliance agency website shall list travel
- 41 information, including:
  - 42 (1) Medicine not allowed on federal lands or sites; and
  - 43 (2) travel by air, boat, train and bus may each have their own

1 guidelines, and fall under federal jurisdiction.

2 (u) Compassion center license fees, renewal fees and application fees  
3 shall be in accordance with the following parameters:

- 4 Compassion center license fees may not exceed .....\$1,000
- 5 Compassion center license renewal fees may not exceed.....\$1,000
- 6 Compassion center application fee.....\$500
- 7 Compassion center license renewal fee.....\$50

8 (1) Payment may be made as follows:

9 (A) In full; or

10 (B) one half of the license fee plus the entire renewal fee, with the  
11 second half of the license fee and an additional 10% of the license fee due  
12 one year later.

13 (2) License renewal shall be required every two years.

14 (v) Medical cultivation facilities license fees, renewal fees and  
15 application fees shall be in accordance with the following parameters:

- 16 1-25 pounds per month .....\$200 license fee
- 17 License renewal fees .....may not exceed \$200
- 18 Application fee .....\$100
- 19 6-100 pounds per month .....\$500 license fee
- 20 License renewal fees .....may not exceed \$500
- 21 Application fee.....\$250
- 22 101-500 pounds per month.....\$1,000 license fee
- 23 License renewal fees.....may not exceed \$1,000
- 24 Application fee.....\$500
- 25 501-1,000 pounds per month.....\$2,000 license fee
- 26 License renewal fees.....may not exceed \$2,000
- 27 Application fee.....\$1,000
- 28 1,001-5,000 pounds per month.....\$3,500 license fee
- 29 License renewal fees.....may not exceed \$3,500
- 30 Application fee.....\$1,250
- 31 5,001-10,000 pounds per month.....\$7,000 license fee
- 32 License renewal fees.....may not exceed \$7,000
- 33 Application fee.....\$3,500
- 34 10,001-15,000 pounds per month.....\$10,000 license fee
- 35 License renewal fees.....may not exceed \$10,000
- 36 Application fee.....\$5,000

37 (1) Payment may be made as follows:

38 (A) In full; or

39 (B) one half of the license fee plus the entire renewal fee, with the  
40 second half of the license fee and an additional 10% of the license fee due  
41 one year later.

42 (2) License renewal shall be required every two years.

43 (w) Medical cannabis manufacturing license fees, renewal fees and

- 1 application fees shall be in accordance with the following parameters:
- 2 Medical cannabis product manufacturing license fees..... may not exceed
- 3 \$2,200
- 4 Medical cannabis product manufacturing license renewal fees.....may not
- 5 exceed \$2,200
- 6 Medical cannabis product manufacturing application fee.....\$1,100
- 7 Medical cannabis product manufacturing license renewal fee.....\$50
- 8 (1) Payment may be made as follows:
- 9 (A) In full; or
- 10 (B) one half of the license fee plus the entire renewal fee, with the
- 11 second half of the license fee and an additional 10% of the license fee due
- 12 one year later.
- 13 (2) License renewal shall be required every two years.
- 14 (x) Medical cannabis-infused product manufacturing license fees,
- 15 renewal fees and application fees shall be in accordance with the following
- 16 parameters:
- 17 Manufacturing license fees .....may not exceed \$2,200
- 18 Manufacturing license renewal fee.....may not exceed \$2,200
- 19 Manufacturing application fee.....\$1,100
- 20 Manufacturing license renewal fee.....\$50
- 21 (1) Payment may be made as follows:
- 22 (A) In full; or
- 23 (B) one half of the license fee plus the entire renewal fee, with the
- 24 second half of the license fee and an additional 10% of the license fee due
- 25 one year later.
- 26 (2) License renewal shall be required every two years.
- 27 (y) Medical cannabis testing facility license fees, renewal fees and
- 28 application fees shall be in accordance with the following parameters:
- 29 License fees.....may not exceed \$2,200
- 30 License renewal fees.....may not exceed \$2,200
- 31 Application fee.....\$1,100
- 32 License renewal fee.....\$50
- 33 (1) Payment may be made as follows:
- 34 (A) In full; or
- 35 (B) one half of the license fee plus the entire renewal fee, with the
- 36 second half of the license fee and an additional 10% of the license fee due
- 37 one year later.
- 38 (2) License renewal shall be required every two years.
- 39 (z) Administrative service fees shall be in accordance with the
- 40 following parameters:
- 41 Background investigations.....\$150
- 42 Modification of license premises.....\$120
- 43 Duplicate business license.....\$40

- 1 Duplicate occupational license.....\$10
- 2 Duplicate vendor registration.....\$40
- 3 Off-premise-storage permit.....\$500
- 4 Subpoena fee.....\$200
- 5 Change of location applicant fee – same local jurisdiction only.....\$150
- 6 Change of trade name.....\$50
- 7 Change of corporation of structure per person.....\$25
- 8 (aa) The cannabis compliance agency shall issue a statement of
- 9 understanding outlining guidelines and responsibilities to compassion
- 10 centers, cultivators and manufacturers.
- 11 Sec. 23. (a) Medical cannabis and medical cannabis-infused product
- 12 waste shall be stored, secured and managed in accordance with all
- 13 applicable state and local statutes, rules and regulations, ordinances or
- 14 other requirements.
- 15 (b) Liquid waste from medical cannabis businesses shall be disposed
- 16 of in compliance all applicable federal, state and local laws, rules and
- 17 regulations and other requirements.
- 18 (c) Disposal of chemical, dangerous or hazardous waste shall be
- 19 conducted in a manner consistent with federal, state and local laws, rules
- 20 and regulations or other requirements.
- 21 (d) Medical cannabis and medical cannabis-infused product waste
- 22 shall be made unusable and unrecognizable prior to leaving the licensed
- 23 premises.
- 24 (e) Medical cannabis and medical cannabis-infused product waste
- 25 shall be rendered unusable and unrecognizable through one grinding and
- 26 incorporating the medical cannabis waste with non-consumable, solid
- 27 wastes listed below such that the resulting mixture is at least 50% non-
- 28 cannabis waste:
- 29 (1) Paper waste;
- 30 (2) plastic waste;
- 31 (3) cardboard waste;
- 32 (4) food waste;
- 33 (5) grease or other compostable oil waste;
- 34 (6) bokashi or other compost activators;
- 35 (7) other wastes approved by the cannabis compliance agency that
- 36 will render the medical cannabis and medical cannabis-infused product
- 37 waste unusable and unrecognizable as cannabis; or
- 38 (8) soil.
- 39 (f) After the medical cannabis and medical cannabis-infused product
- 40 waste is made unusable and unrecognizable, the rendered waste shall be:
- 41 (1) Disposed of at a solid waste site and disposal facility that has a
- 42 certificate of designation from the local governing body;
- 43 (2) deposited at a compost facility that has a certificate of designation

1 from the department of health and environment; or

2 (3) composted on-site at a facility owned by the generator of the  
3 waste and operated in compliance with the regulations pertaining to solid  
4 waste under the department of health and environment.

5 (g) A licensee shall not dispose of medical cannabis and medical  
6 cannabis-infused product waste in an unsecured waste receptacle not in  
7 possession and control of the licensee.

8 (h) Inventory tracking requirements:

9 (1) In addition to all other tracking requirements set forth in these act,  
10 a licensee shall utilize the tracking system to ensure its post-harvest waste  
11 materials are identified, weighed and tracked while on the licensed  
12 premises until disposed of.

13 (2) All medical cannabis waste shall be weighed before leaving any  
14 medical cannabis business. A scale used to weigh medical cannabis waste  
15 prior to entry into the tracking system shall be certified;

16 (3) A medical cannabis cultivation facility shall be required to  
17 maintain accurate and comprehensive records regarding waste material  
18 that accounts for, reconciles and evidences all waste activity related to the  
19 disposal of cannabis.

20 (4) Medical cannabis cultivation facilities shall be required to  
21 maintain accurate and comprehensive records regarding any waste  
22 material produced through the trimming or pruning of a medical cannabis  
23 plant prior to harvest, including weighing and documenting all waste.  
24 Records of waste produced prior to harvest shall be maintained on the  
25 licensed premises. All waste, whether produced prior or subsequent to  
26 harvest, shall be disposed of in accordance with this section and be made  
27 unusable and unrecognizable.

28 Sec. 24. (a) The purpose of this section is to establish minimum  
29 health and safety regulation for compassion centers. It sets forth general  
30 standards and basic sanitary requirements for compassion centers. It  
31 covers the physical premises where the products are made as well as the  
32 individuals handling the products. This section also authorizes the  
33 cannabis compliance agency to require an independent consultant conduct  
34 a health, and sanitary audit of a compassion center. This section explains  
35 when an independent health and sanitary audit may be deemed necessary  
36 and sets forth possible consequences of a medical cannabis business'  
37 refusal to cooperate, or pay for the audit. The cannabis compliance agency  
38 modeled this section after those adopted by the department of health and  
39 environment. This section is intended to help maintain the integrity of  
40 Kansas compassion centers.

41 (b) Health and safety regulations, compassion center, local safety  
42 inspections or licensees may be subject to inspection of the compassion  
43 center by the local fire department, building inspector or code enforcement

1 officer to confirm that no health or safety concerns are present. The  
2 inspection may result in additional specific standards to meet local  
3 jurisdiction restrictions related to medical cannabis. An annual fire safety  
4 inspection may result in the required installation of fire suppression  
5 devices or other means necessary for adequate fire safety.

6 (c) The licensee shall take all reasonable measures and precautions to  
7 ensure that:

8 (1) Any person who, by medical examination or supervisory  
9 observation, is shown to have, or appears to have, an illness, open lesion,  
10 including boils, sores, or infected wounds, or any other abnormal source of  
11 microbial contamination for whom there is a reasonable possibility of  
12 contact with medical cannabis and medical cannabis-infused product shall  
13 be excluded from any operations that may be expected to result in  
14 contamination until the condition is corrected;

15 (2) hand-washing facilities shall be adequate and convenient and be  
16 furnished with running water at a suitable temperature. Hand-washing  
17 facilities shall be located in the licensed premises and where good sanitary  
18 practices require employees to wash or sanitize their hands, and provide  
19 effective hand-cleaning and sanitizing preparations and sanitary towel  
20 service or suitable drying devices; and

21 (3) all persons working in direct contact with medical cannabis and  
22 medical cannabis-infused product shall conform to hygienic practices  
23 while on duty, including, but not limited to:

24 (A) Maintaining adequate personal cleanliness;

25 (B) washing hands thoroughly in an adequate hand-washing area  
26 before starting work and at any other time when the hands may have  
27 become soiled or contaminated;

28 (C) refraining from having direct contact with medical cannabis and  
29 medical cannabis-infused product if the person has or may have an illness,  
30 open lesion, including boils, sores, or infected wounds, or any other  
31 abnormal source of microbial contamination, until such condition is  
32 corrected;

33 (D) that litter and waste are properly removed and the operating  
34 systems for waste disposal are maintained in an adequate manner so that  
35 they do not constitute a source of contamination in areas where medical  
36 cannabis and medical cannabis-infused product are exposed;

37 (E) that floors, walls and ceilings are constructed in such a manner  
38 that they may be adequately cleaned and each is kept clean and in good  
39 repair;

40 (F) that there is adequate lighting in all areas where medical cannabis  
41 and medical cannabis-infused product are stored or sold and where  
42 equipment or utensils are cleaned;

43 (G) that the licensee provides adequate screening or other protection

1 against the entry of pests. Rubbish shall be disposed of so as to minimize  
2 the development of odor and minimize the potential for the waste  
3 becoming an attractant, harborage or breeding place for pests;

4 (H) that any buildings, fixtures and other facilities are maintained in a  
5 sanitary condition;

6 (I) that toxic cleaning compounds, sanitizing agents and other  
7 chemicals shall be identified, held, stored and disposed of in a manner that  
8 protects against contamination of medical cannabis or medical cannabis-  
9 infused product and in a manner that is in accordance with any applicable  
10 local, state or federal law, rules and regulations or ordinance;

11 (J) that all operations in the receiving, inspecting, transporting,  
12 segregating, preparing, manufacturing, packaging and storing of medical  
13 cannabis or medical cannabis-infused product shall be conducted in  
14 accordance with adequate sanitation principles;

15 (K) that each compassion center provides its employees with  
16 adequate and readily accessible toilet facilities that are maintained in a  
17 sanitary condition and good repair; and

18 (L) that medical cannabis and medical cannabis-infused product that  
19 can support the rapid growth of undesirable microorganisms are held in a  
20 manner that prevents the growth of these microorganisms.

21 (d) When the cannabis compliance agency determines a health and  
22 sanitary audit by an independent consultant is necessary, the agency may  
23 require a compassion center to undergo such an audit. The scope of the  
24 audit may include, but shall not be limited to, whether the compassion  
25 center is in compliance with the requirements set forth in this section and  
26 other applicable health, sanitary or food handling laws or rules and  
27 regulations:

28 (1) In such instances, the cannabis compliance agency may attempt to  
29 mutually agree upon the selection of the independent consultant with a  
30 compassion center. However, the cannabis compliance agency shall always  
31 retain the authority to select the independent consultant regardless of  
32 whether mutual agreement can be reached; and

33 (2) the compassion center shall be responsible for all costs associated  
34 with the independent health and sanitary audit.

35 (e) The cannabis compliance agency shall determine when an audit  
36 by an independent consultant is necessary. The following is a non-  
37 exhaustive list of examples that may justify an independent audit:

38 (1) The cannabis compliance agency has reasonable grounds to  
39 believe that the compassion center is in violation of one or more of the  
40 requirements set forth in this section or other applicable public health or  
41 sanitary laws, rules or regulations; and

42 (2) the cannabis compliance agency has reasonable grounds to  
43 believe that the compassion center was the cause or source of

1 contamination of medical cannabis, medical cannabis concentrate, or  
2 medical cannabis-infused product;

3 (f) A compassion center must pay for and timely cooperate with the  
4 cannabis compliance agency's requirement that it undergo an independent  
5 health and sanitary audit in accordance with this section, and the cost of  
6 audit must be comparable to audit fees across industries.

7 (g) If the cannabis compliance agency has objective and reasonable  
8 grounds to believe, and finds upon reasonable ascertainment of the  
9 underlying facts, that the public health, safety, or welfare, imperatively  
10 requires emergency action, and incorporates such findings into its order, it  
11 may order summary suspension of the compassion center's license. Prior to  
12 or immediately following the issuance of such an order, the compassion  
13 center may attempt to come to a mutual agreement with the cannabis  
14 compliance agency to suspend its operations until the completion of the  
15 independent audit and the implementation of any required remedial  
16 measures.

17 (h) If an agreement cannot be reached or the cannabis compliance  
18 agency, in its sole discretion, determines that such an agreement is not in  
19 the best interests of the public health, safety or welfare, then the cannabis  
20 compliance agency will promptly institute license suspension or  
21 revocation procedures.

22 (i) If an agreement to suspend operations is reached, then the  
23 compassion center may continue to care for its inventory, and conduct any  
24 necessary internal business operations, but it may not sell any medical  
25 cannabis, medical cannabis concentrate, or medical cannabis-infused  
26 product, to a patient or other medical cannabis business, during the period  
27 of time specified in the agreement.

28 Sec. 25. (a) Failure to comply with this section may constitute a  
29 license violation affecting public safety. The purpose of this section is to  
30 establish minimum health and safety regulation for optional premises  
31 cultivation operations. The section prohibits an optional premises  
32 cultivation operation from treating, or otherwise adulterating medical  
33 cannabis with any chemical, or other compound whatsoever to alter its  
34 color, appearance, weight or smell. The cannabis compliance agency may  
35 require an independent consultant conduct an independent health and  
36 sanitary audit of an optional premises cultivation operation. This section  
37 explains when an independent health and sanitary audit may be deemed  
38 necessary and sets forth possible consequences of a medical cannabis  
39 business' refusal to cooperate or pay for the audit. The cannabis  
40 compliance agency intends this section to help maintain the integrity of  
41 Kansas' medical cannabis businesses.

42 (b) An optional premises cultivation operation may be subject to  
43 inspection of its licensed premises by the local fire department, building

1 inspector or code enforcement officer to confirm that no health or safety  
2 concerns are present. The inspection may result in additional specific  
3 standards to meet local licensing authority restrictions related to medical  
4 cannabis or other local businesses. An annual fire safety inspection may  
5 result in the required installation of fire suppression devices or other  
6 means necessary for adequate fire safety.

7 (c) General sanitary requirements. An optional premises cultivation  
8 operation shall take all reasonable measures and precautions to ensure the  
9 following:

10 (1) That any person who, by medical examination or supervisory  
11 observation, is shown to have, or appears to have, an illness, open lesion,  
12 including boils, sores, or infected wounds or any other abnormal source of  
13 microbial contamination for whom there is a reasonable possibility of  
14 contact with medical cannabis shall be excluded from any operations  
15 which may be expected to result in such contamination until the condition  
16 is corrected;

17 (2) that all persons working in direct contact with medical cannabis  
18 shall conform to hygienic practices while on duty, including, but not  
19 limited to:

20 (A) Maintaining adequate personal cleanliness;

21 (B) washing hands thoroughly in an adequate hand-washing area  
22 before starting work and at any other time when the hands may have  
23 become soiled or contaminated;

24 (C) hand-washing facilities shall be adequate and convenient and be  
25 furnished with running water at a suitable temperature. Hand-washing  
26 facilities shall be located in the licensed premises and where good sanitary  
27 practices require employees to wash or sanitize their hands, and provide  
28 effective hand-cleaning and sanitizing preparations and sanitary towel  
29 service or suitable drying devices; and

30 (D) refraining from having direct contact with medical cannabis if the  
31 person has or may have an illness, open lesion, including boils, sores, or  
32 infected wounds, or any other abnormal source of microbial  
33 contamination, until such condition is corrected;

34 (3) that litter and waste are properly removed and the operating  
35 systems for waste disposal are maintained in an adequate manner so that  
36 they do not constitute a source of contamination in areas where medical  
37 cannabis is exposed;

38 (4) that floors, walls and ceilings are constructed in such a manner  
39 that they may be adequately cleaned and kept clean and kept in good  
40 repair;

41 (5) that there is adequate lighting in all areas where medical cannabis  
42 is stored and where equipment or utensils are cleaned;

43 (6) that the licensee provides adequate screening or other protection

1 against the entry of pests. Rubbish shall be disposed of so as to minimize  
2 the development of odor and minimize the potential for the waste  
3 becoming an attractant, harborage, or breeding place for pests;

4 (7) that any buildings, fixtures and other facilities are maintained in a  
5 sanitary condition;

6 (8) that toxic cleaning compounds, sanitizing agents and distillation  
7 process materials shall be identified, held, stored and disposed of in a  
8 manner that protects against contamination of medical cannabis or medical  
9 cannabis concentrate, and in a manner that is in accordance with any  
10 applicable local, state or federal law, rules and regulations or ordinances.  
11 All ecologically sustainable pesticide must be stored and disposed of in  
12 accordance with the information provided on the product's label;

13 (9) that all contact surfaces, including utensils and equipment used  
14 for the preparation of medical cannabis or medical cannabis concentrate  
15 shall be cleaned and sanitized as frequently as necessary to protect against  
16 contamination. Equipment and utensils shall be so designed and of such  
17 material and workmanship as to be adequately cleanable, and shall be  
18 properly maintained. Only sanitizers and disinfectants registered with the  
19 environmental protection agency shall be used in an optional premises  
20 cultivation operation and used in accordance with labeled instructions;

21 (10) that the water supply shall be sufficient for the operations  
22 intended and shall be derived from a source that is a regulated water  
23 system. Private water supplies shall be derived from a water source that is  
24 capable of providing a safe, and adequate supply of water to meet the  
25 licensed premises needs;

26 (11) that plumbing shall be of adequate size and design and  
27 adequately installed and maintained to carry sufficient quantities of water  
28 to required locations throughout the plant, and shall properly convey  
29 sewage and liquid disposable waste from the licensed premises. There  
30 shall be no cross connections between the potable and wastewater lines;

31 (12) that all operations in the receiving, inspecting, transporting,  
32 segregating, preparing, manufacturing, packaging and storing of medical  
33 cannabis or medical cannabis-infused product shall be conducted in  
34 accordance with adequate sanitation principles;

35 (13) that each optional premises cultivation operation shall provide its  
36 employees with adequate and readily accessible toilet facilities that are  
37 maintained in a sanitary condition and good repair; and

38 (14) that medical cannabis that can support the rapid growth of  
39 undesirable microorganisms shall be held in a manner that prevents the  
40 growth of these microorganisms.

41 (d) (1) An optional premises cultivation operation shall establish  
42 written standard operating procedures for the cultivation of medical  
43 cannabis. The standard operating procedures shall at least include when,

1 and the manner in which, all ecologically sustainable pesticide and other  
2 sustainable agricultural chemicals are to be applied during its cultivation  
3 process. A copy of all standard operating procedures shall be maintained  
4 on the licensed premises of the optional premises cultivation operation.

5 (2) If an optional premises cultivation operation makes a material  
6 change to its cultivation procedures, it shall document the change and  
7 revise its standard operating procedures accordingly. Records detailing the  
8 material change shall be maintained on the relevant licensed premises.

9 (3) An optional premises cultivation operation shall obtain a material  
10 safety data sheet for any ecologically sustainable pesticide or other  
11 sustainable agricultural chemicals used or stored on its licensed premises.  
12 An optional premises cultivation operation shall maintain a current copy of  
13 the material safety data sheet for any ecologically sustainable pesticide or  
14 other sustainable agricultural chemicals on the licensed premises where the  
15 product is used or stored.

16 (4) An optional premises cultivation operation shall have the original  
17 label or a copy thereof at its licensed premises for all ecologically  
18 sustainable pesticide and other sustainable agricultural chemicals used  
19 during its cultivation process.

20 (5) An optional premises cultivation operation that applies any  
21 ecologically sustainable pesticide or other sustainable agricultural  
22 chemical to any portion of a medical cannabis plant, water or feed used  
23 during cultivation or generally within the licensed premises shall  
24 document, and maintain a record on its licensed premises, of the following  
25 information:

26 (A) The name, signature and occupational license number of the  
27 individual who applied the ecologically sustainable pesticide or other  
28 sustainable agricultural chemical;

29 (B) the applicator certification number, if the applicator is licensed  
30 through the department of agriculture;

31 (C) the date and time of the application;

32 (D) the United States environmental protection agency registration  
33 number of the ecologically sustainable pesticide or CAS number of any  
34 other sustainable agricultural chemical applied;

35 (E) any of the active ingredients of the ecologically sustainable  
36 pesticide or other sustainable agricultural chemical applied;

37 (F) the brand name and product name of the ecologically sustainable  
38 pesticide or other sustainable agricultural chemical applied;

39 (G) the restricted entry interval from the product label of any  
40 ecologically sustainable pesticide or other sustainable agricultural  
41 chemical applied; and

42 (H) the RFID tag number of the medical cannabis plant that the  
43 ecologically sustainable pesticide or other sustainable agricultural

1 chemical was applied to or if applied to all plants throughout the licensed  
2 premises, a statement to that effect.

3 (e) The total amount of each ecologically sustainable pesticide or  
4 other sustainable agricultural chemical applied.

5 (f) The chemicals shall described in sections 9 and 19, and  
6 amendments thereto, shall not be used in medical cannabis cultivation.  
7 Possession of chemicals and containers from prohibited chemicals upon  
8 the licensed premises shall be a violation of this section.

9 (g) An optional premises cultivation operation shall not treat or  
10 otherwise adulterate medical cannabis with any chemical or other  
11 compound whatsoever to alter its color, appearance, weight or smell.

12 (h) Independent health and sanitary audit for cultivation facilities,  
13 cannabis compliance agency may require a health and sanitary audit.  
14 When the cannabis compliance agency determines a health and sanitary  
15 audit by an independent consultant is necessary, it may require an optional  
16 premises cultivation operation to undergo such an audit.

17 (1) The scope of the audit may include, but shall not be limited to,  
18 whether the optional premises cultivation operation is in compliance with  
19 the requirements set forth in this section and other applicable public health  
20 or sanitary laws and rules and regulations:

21 (A) In such instances, the cannabis compliance agency may attempt  
22 to mutually agree upon the selection of the independent consultant with an  
23 optional premises cultivation operation. However, the cannabis compliance  
24 agency always retains the authority to select the independent consultant  
25 regardless of whether mutual agreement can be reached; and

26 (B) the optional premises cultivation operation will be responsible for  
27 all costs associated with the independent health and sanitary audit.

28 (2) The cannabis compliance agency has discretion to determine  
29 when an audit by an independent consultant is necessary. The following is  
30 a non-exhaustive list of examples that may justify an independent audit:

31 (A) An optional premises cultivation operation does not provide  
32 requested records related to the use of ecologically sustainable pesticide or  
33 other sustainable agricultural chemicals during in the cultivation process;

34 (B) the cannabis compliance agency has reasonable grounds to  
35 believe that the optional premises cultivation operation is in violation of  
36 one or more of the requirements set forth in this section or other applicable  
37 public health or sanitary laws, rules or regulations;

38 (C) the cannabis compliance agency has reasonable grounds to  
39 believe that the optional premises cultivation operation was the cause or  
40 source of contamination of medical cannabis or medical cannabis  
41 concentrate; or

42 (D) multiple harvest batch lots or production batch lots produced by  
43 the optional premises cultivation operation failed contaminant testing.

1 (3) An optional premises cultivation operation must pay for and  
2 timely cooperate with the cannabis compliance agency's requirement that it  
3 undergo an independent health and sanitary audit in accordance with this  
4 section, and the cost of audit must be comparable to audit fees across  
5 industries.

6 (i) (1) If the cannabis compliance agency has objective, and  
7 reasonable grounds to believe, and finds upon reasonable ascertainment of  
8 the underlying facts that the public health, safety, or welfare imperatively  
9 requires emergency action, and incorporates such findings into its order, it  
10 may order summary suspension of the optional premises cultivation  
11 operation's license.

12 (2) Prior to or following the issuance of such an order, optional  
13 premises cultivation operation may attempt to come to a mutual agreement  
14 with the cannabis compliance agency to suspend its operations until the  
15 completion of the independent audit and the implementation of any  
16 required remedial measures.

17 (3) If an agreement cannot be reached or the cannabis compliance  
18 agency, in its sole discretion, determines that such an agreement is not in  
19 the best interests of the public health, safety or welfare, then the cannabis  
20 compliance agency will promptly institute license suspension or  
21 revocation procedures.

22 (4) If an agreement to suspend operations is reached, then the  
23 optional premises cultivation operation may continue to care for its  
24 inventory and conduct any necessary internal business operations but it  
25 may not sell, transfer or wholesale medical cannabis or medical cannabis  
26 concentrate to other medical cannabis business during the period of time  
27 specified in the agreement.

28 (j) Violation affecting public safety. Failure to comply with this  
29 section may constitute a license violation affecting public safety.

30 Sec. 26. (a) The purpose of this section is to establish the categories  
31 of medical cannabis concentrate that may be produced at an optional  
32 premises cultivation operation and standards for the production of those  
33 concentrate.

34 (b) An optional premises cultivation operation may produce medical  
35 cannabis concentrate on its licensed premises and only in an area clearly  
36 designated for concentrate production on the current diagram of the  
37 licensed premises. All production must be in compliance with sections 15,  
38 16, 17, 18 and 19, and amendments thereto, and any requirements made by  
39 the cannabis compliancy agency. No other method of production or  
40 extraction for medical cannabis concentrate may be conducted within the  
41 licensed premise, or an optional premises cultivation operation, unless the  
42 owner of the optional premises cultivation operation also has a valid  
43 medical cannabis-infused products manufacturer license, and the room in

1 which medical cannabis concentrate is to be produced is physically  
2 separated from all cultivation areas and has clear signage identifying the  
3 room.

4 (c) If an optional premises cultivation operation produces medical  
5 cannabis concentrate, then all areas in which those concentrate are  
6 produced and all owners and occupational licensees engaged in the  
7 production of those concentrate shall be subject to all of requirements  
8 imposed upon a medical cannabis-infused products manufacturer that  
9 produces medical cannabis concentrate, including general requirements.

10 (d) It shall be considered a violation of this section if an optional  
11 premises cultivation operation possess a medical cannabis concentrate  
12 other than a compliant form of medical cannabis concentrate on its  
13 licensed premises, unless the owner of the optional premises cultivation  
14 operation also has a valid medical cannabis-infused products manufacturer  
15 license.

16 Sec. 27. (a) The purpose of this section is to establish minimum  
17 health and safety regulations for medical cannabis-infused products  
18 manufacturers. It requires all owners and occupational licensees to attend a  
19 food handler training course prior to manufacturing any edible medical  
20 cannabis product. This section also authorizes the cannabis compliance  
21 agency to require that an independent consultant conduct an independent  
22 food safety audit of a medical cannabis products manufacturing facility.  
23 This section explains when an independent food safety audit may be  
24 deemed necessary and sets forth possible consequences of a medical  
25 cannabis-infused products manufacturers' refusal to cooperate, or pay for  
26 the audit. It sets forth general standards and basic sanitary requirements for  
27 medical cannabis-infused products manufacturers. It covers the physical  
28 premises where the products are made as well as the individuals handling  
29 the products. The cannabis compliance agency modeled this section after  
30 those adopted by the department of health and environment. The cannabis  
31 compliance agency intends this section to help maintain the integrity of  
32 Kansas's medical cannabis businesses and the safety of the public training.

33 (b) Prior to engaging in the manufacture of any edible medical  
34 cannabis-infused product each owner or occupational licensee must:

35 (1) Have a currently valid food establishment license obtained  
36 through the successful completion of an online assessment or print exam;  
37 or

38 (2) take a food safety course that includes basic food handling  
39 training by county public health agencies, and must maintain a status of  
40 good standing in accordance with the course requirements, including  
41 attending any additional classes if necessary. Any course taken pursuant to  
42 this section must last at least two hours and cover the following subjects:

43 (A) Causes of foodborne illness, highly susceptible populations and

- 1 worker illness;
- 2 (B) personal hygiene and food handling practices;
- 3 (C) approved sources of food;
- 4 (D) potentially hazardous foods and food temperatures;
- 5 (E) sanitization and chemical use;
- 6 (F) emergency procedures, including fire, flood or sewer backup;
- 7 (G) a medical cannabis-infused products manufacturer must obtain
- 8 documentation evidencing that each owner or occupational licensee has
- 9 successfully completed the examination or course required by this section
- 10 and is in good standing. A copy of the documentation must be kept on file
- 11 at any licensed premises where that owner, or occupational licensee is
- 12 engaged in the manufacturing of an edible medical cannabis-infused
- 13 product; and
- 14 (H) general standards.
- 15 (c) A medical cannabis-infused products manufacturer may be subject
- 16 to inspection by the local fire department, building inspector or code
- 17 enforcement officer to confirm that no health or safety concerns are
- 18 present. The inspection could result in additional specific standards to
- 19 meet local jurisdiction restrictions related to medical cannabis. An annual
- 20 fire safety inspection may result in the required installation of fire
- 21 suppression devices or other means necessary for adequate fire safety.
- 22 (d) A medical cannabis-infused products manufacturer that
- 23 manufacturers edible medical cannabis-infused product shall comply with
- 24 all kitchen-related health and safety standards of the relevant local
- 25 licensing authority and, to the extent applicable, with all department of
- 26 health and environment health and safety regulations applicable to retail
- 27 food establishments. The licensee shall take all reasonable measures and
- 28 precautions to ensure the following:
- 29 (1) Any person who, by medical examination or supervisory
- 30 observation, is shown to have, or appears to have, an illness, open lesion,
- 31 including boils, sores, or infected wounds, or any other abnormal source of
- 32 microbial contamination for whom there is a reasonable possibility of
- 33 contact with preparation surfaces for medical cannabis or medical
- 34 cannabis-infused product shall be excluded from any operations which
- 35 may be expected to result in such contamination until the condition is
- 36 corrected;
- 37 (2) hand-washing facilities shall be adequate and convenient and be
- 38 furnished with running water at a suitable temperature. Hand-washing
- 39 facilities shall be located in the licensed premises and/or in medical
- 40 cannabis-infused product preparation areas and where good sanitary
- 41 practices require employees to wash and/or sanitize their hands, and
- 42 provide effective hand-cleaning and sanitizing preparations and sanitary
- 43 towel service or suitable drying devices;

- 1 (3) all persons working in direct contact with preparation of medical  
2 cannabis or medical cannabis-infused product shall conform to hygienic  
3 practices while on duty, including, but not limited to:
- 4 (A) Maintaining adequate personal cleanliness;
- 5 (B) washing hands thoroughly in an adequate hand-washing area  
6 before starting work, prior to engaging in the production of a medical  
7 cannabis concentrate or manufacture of a medical cannabis-infused  
8 product and at any other time when the hands may have become soiled or  
9 contaminated; and
- 10 (C) refraining from having direct contact with preparation of medical  
11 cannabis or medical cannabis-infused product if the person has or may  
12 have an illness, open lesion, including 27 boils, sores, or infected wounds,  
13 or any other abnormal source of microbial contamination, until such  
14 condition is corrected;
- 15 (4) there is sufficient space for placement of equipment and storage  
16 of materials as is necessary for the maintenance of sanitary operations for  
17 production of medical cannabis or medical cannabis-infused product;
- 18 (5) litter and waste are properly removed and the operating systems  
19 for waste disposal are maintained in an adequate manner so that they do  
20 not constitute a source of contamination in areas where medical cannabis  
21 or medical cannabis-infused product are exposed;
- 22 (6) floors, walls and ceilings are constructed in such a manner that  
23 they may be adequately cleaned and kept clean and kept in good repair;
- 24 (7) there is adequate safety-type lighting in all areas where medical  
25 cannabis or medical cannabis-infused product are processed or stored and  
26 where equipment or utensils are cleaned;
- 27 (8) the licensed premises provides adequate screening or other  
28 protection against the entry of pests. Rubbish shall be disposed of so as to  
29 minimize the development of odor and minimize the potential for the  
30 waste becoming an attractant, harborage or breeding place for pests;
- 31 (9) any buildings, fixtures and other facilities are maintained in a  
32 sanitary condition;
- 33 (10) all contact surfaces, including utensils and equipment used for  
34 the preparation of medical cannabis, medical cannabis concentrate or  
35 medical cannabis-infused product, shall be cleaned and sanitized as  
36 frequently as necessary to protect against contamination. Equipment and  
37 utensils shall be so designed and of such material and workmanship as to  
38 be adequately cleanable, and shall be properly maintained. Only sanitizers  
39 and disinfectants registered with the environmental protection agency shall  
40 be used in a medical cannabis-infused products manufacturer and used in  
41 accordance with labeled instructions;
- 42 (11) toxic cleaning compounds, sanitizing agents, distillation process  
43 materials used in the production of medical cannabis concentrate and other

1 chemicals shall be identified, held, stored and disposed of in a manner that  
2 protects against contamination of medical cannabis, medical cannabis  
3 concentrate or medical cannabis-infused product, and in a manner that is in  
4 accordance with any applicable local, state, or federal law, rule and  
5 regulation or ordinance;

6 (12) the water supply shall be sufficient for the operations intended  
7 and shall be derived from a source that is a regulated water system. Private  
8 water supplies shall be derived from a water source that is capable of  
9 providing a safe, potable, and adequate supply of water to meet the  
10 licensed premises needs;

11 (13) plumbing shall be of adequate size and design and adequately  
12 installed and maintained to carry sufficient quantities of water to required  
13 locations throughout the plant and that shall properly convey sewage and  
14 liquid disposable waste from the licensed premises. There shall be no cross  
15 connections between the potable and wastewater lines;

16 (14) each medical cannabis-infused products manufacturer shall  
17 provide its employees with adequate and readily accessible toilet facilities  
18 that are maintained in a sanitary condition and good repair;

19 (15) all operations in the receiving, inspecting, transporting,  
20 segregating, preparing, manufacturing, packaging and storing of medical  
21 cannabis or medical cannabis-infused product shall be conducted in  
22 accordance with adequate sanitation principles;

23 (16) medical cannabis or medical cannabis-infused product that can  
24 support the rapid growth of undesirable microorganisms shall be held in a  
25 manner that prevents the growth of these microorganisms; and

26 (17) storage and transport of finished medical cannabis-infused  
27 product shall be under conditions that will protect products against  
28 physical, chemical, and microbial contamination as well as against  
29 deterioration of any container.

30 (e) A medical cannabis-infused products manufacturer shall have  
31 written standard operating procedures for each category of medical  
32 cannabis concentrate and type of medical cannabis-infused product that it  
33 produces.

34 (f) All standard operating procedures for the production of a medical  
35 cannabis concentrate shall follow the following requirements:

36 (1) A copy of all standard operating procedures shall be maintained  
37 on the licensed premises of the medical cannabis-infused products  
38 manufacturer; and

39 (2) if a medical cannabis-infused products manufacturer makes a  
40 material change to its standard medical cannabis concentrate or medical  
41 cannabis-infused product production process, it shall document the change  
42 and revise its standard operating procedures accordingly. Records detailing  
43 the material change must be maintained on the relevant licensed premises.

1       Sec. 28. (a) The cannabis compliance agency may require an  
2 independent health and sanitary audit.

3       (b) When the cannabis compliance agency determines a health and  
4 sanitary audit by an independent consultant is necessary, it may require a  
5 medical cannabis-infused products manufacturer to undergo such an audit.  
6 The scope of the audit may include, but shall not be limited to, whether the  
7 medical cannabis-infused products manufacturer is in compliance with the  
8 requirements set forth in this section or other applicable food handling  
9 laws and rules and regulations and in compliance with the concentrate  
10 production rules and regulations or other applicable laws or rules and  
11 regulations:

12       (1) In such instances, the cannabis compliance agency may attempt to  
13 mutually agree upon the selection of the independent consultant with a  
14 medical cannabis-infused products manufacturer. However, the cannabis  
15 compliance agency shall retain the authority to select the independent  
16 consultant regardless of whether mutual agreement can be reached.

17       (2) The medical cannabis-infused products manufacturer will be  
18 responsible for all direct costs associated with the independent health and  
19 sanitary audit.

20       (3) The cannabis compliance agency has discretion to determine  
21 when an audit by an independent consultant is necessary. The following is  
22 a non-exhaustive list of examples that may justify an independent audit:

23       (A) A medical cannabis-infused products manufacturer does not  
24 provide requested records related to the food handling training required for  
25 owners and occupational licensees engaged in the production of edible  
26 medical cannabis-infused products to the cannabis compliance agency;

27       (B) a medical cannabis-infused products manufacturer does not  
28 provide requested records related to the production of medical cannabis  
29 concentrate, including but not limited to, certification of its licensed  
30 premises, equipment or standard operating procedures, training of owners  
31 or employees, or production batch lots specific records;

32       (C) the cannabis compliance agency has reasonable grounds to  
33 believe that the medical cannabis-infused products manufacturer is in  
34 violation of one or more of the requirements set forth in this section; or

35       (D) the cannabis compliance agency has reasonable grounds to  
36 believe that the medical cannabis-infused products manufacturer was the  
37 cause or source of contamination of medical cannabis, medical cannabis  
38 concentrate or medical cannabis-infused product; or

39       (E) multiple production batch lots of medical cannabis concentrate or  
40 medical cannabis-infused product produced by the medical cannabis-  
41 infused products manufacturer failed contaminant testing.

42       (c) A medical cannabis-infused products manufacturer shall pay for  
43 and timely cooperate with the cannabis compliance agency's requirement

1 that it undergo an independent health and sanitary audit in accordance with  
2 this section.

3 (d) If the cannabis compliance agency has objective and reasonable  
4 grounds to believe and finds upon reasonable ascertainment of the  
5 underlying facts that the public health, safety or welfare imperatively  
6 requires emergency action and incorporates such findings into its order, it  
7 may order summary suspension of the medical cannabis-infused products  
8 manufacturer's license.

9 (e) Prior to or following the issuance of such an order, the medical  
10 cannabis-infused products manufacturer may attempt to come to a mutual  
11 agreement with the cannabis compliance agency to suspend its operations  
12 until the completion of the independent audit and the implementation of  
13 any required remedial measures:

14 (1) If an agreement cannot be reached or the cannabis compliance  
15 agency, in its sole discretion, determines that such an agreement is not in  
16 the best interests of the public health, safety or welfare, then the cannabis  
17 compliance agency will promptly institute license suspension or  
18 revocation procedures.

19 (2) If an agreement to suspend operations is reached, then the medical  
20 cannabis-infused product manufacturer may continue to care for its  
21 inventory and conduct any necessary internal business operations but it  
22 may not sell, transfer or wholesale medical cannabis, medical cannabis  
23 concentrate or medical cannabis-infused product to another medical  
24 cannabis business during the period of time specified in the agreement.  
25 Depending on the condition of the licensed premises and required remedial  
26 measures, the cannabis compliance agency may permit a medical  
27 cannabis-infused products manufacturer to produce medical cannabis  
28 concentrate or manufacture medical cannabis-infused product while  
29 operations have been suspended.

30 Sec. 29. (a) Failure to comply with this section may constitute a  
31 license violation affecting public safety. The purpose of this section is to  
32 establish the categories of medical cannabis concentrate that may be  
33 produced at a medical cannabis-infused products manufacturer and  
34 establish standards for the production of those concentrate.

35 (b) Permitted categories of medical cannabis concentrate production.

36 (1) A medical cannabis-infused products manufacturer may produce  
37 medical cannabis concentrate and food-based medical cannabis  
38 concentrate.

39 (2) A medical cannabis-infused products manufacturer that engages  
40 in the production of medical cannabis concentrate, regardless of the  
41 method of extraction or category of concentrate being produced, must:

42 (A) Ensure that the space in which any medical cannabis concentrate  
43 is to be produced is a fully enclosed room and clearly designated on the

- 1 current diagram of the licensed premises;
- 2 (B) ensure that all applicable sanitary rules and regulations are  
3 followed;
- 4 (C) ensure that the standard operating procedure for each method  
5 used to produce a medical cannabis concentrate on its licensed premise  
6 includes, but need not be limited to, step-by-step instructions on how to  
7 safely and appropriately:
- 8 (i) Conduct all necessary safety checks prior to commencing  
9 production;
- 10 (ii) prepare medical cannabis for processing;
- 11 (iii) extract cannabinoids and other essential components of medical  
12 cannabis;
- 13 (iv) purge any distillation process material or other unwanted  
14 components from a medical cannabis concentrate,
- 15 (v) clean all equipment, counters and surfaces thoroughly; and
- 16 (vi) dispose of any waste produced during the processing of medical  
17 cannabis in accordance with all applicable local, state and federal laws or  
18 rules and regulations;
- 19 (D) establish written and documentable quality control procedures  
20 designed to maximize safety for owners and occupational licensees and  
21 minimize potential product contamination;
- 22 (E) establish written emergency procedures to be followed by owners  
23 or occupational licensees in case of a fire, chemical spill or other  
24 emergency;
- 25 (F) have a comprehensive training manual that provides step-by-step  
26 instructions for each method used to produce a medical cannabis  
27 concentrate on its licensed premises. The training manual must include,  
28 but need not be limited to, the following topics:
- 29 (i) All standard operating procedures for each method of concentrate  
30 production used at that licensed premises;
- 31 (ii) the medical cannabis-infused products manufacturer's quality  
32 control procedures;
- 33 (iii) the emergency procedures for that licensed premises;
- 34 (iv) the appropriate use of any necessary safety or sanitary  
35 equipment;
- 36 (v) the hazards presented by all distillation process materials used  
37 within the licensed premises as described in the material safety data sheet  
38 for each distillation process material;
- 39 (vi) clear instructions on the safe use of all equipment involved in  
40 each process and in accordance with manufacturer's instructions, where  
41 applicable; and
- 42 (vii) any additional periodic cleaning required to comply with all  
43 applicable sanitary rules and regulations;

1 (G) provide adequate training to every owner or occupational licensee  
2 prior that to that individual undertaking any step in the process of  
3 producing a medical cannabis concentrate:

4 (i) Adequate training must include, but need not be limited to,  
5 providing a copy of the training manual for that licensed premises and live,  
6 in-person instruction detailing at least all of the topics required to be  
7 included in the training manual; and

8 (ii) the individual training an owner or occupational licensee must  
9 sign and date a document attesting that all required aspects of training  
10 were conducted and that he or she is confident that the owner or  
11 occupational licensee can safely produce a medical cannabis concentrate;  
12 and

13 (iv) The owner or occupational licensee that received the training  
14 must sign and date a document attesting that he or she can safely  
15 implement all standard operating procedures, quality control procedures,  
16 and emergency procedures, operate all closed loop extraction systems, use  
17 all safety, sanitary and other equipment and understands all hazards  
18 presented by the distillation process materials to be used within the  
19 licensed premises and any additional period cleaning required to maintain  
20 compliance with all applicable sanitary rules and regulations.

21 (H) maintain clear and comprehensive records of the name, signature,  
22 and owner or occupational license number of every individual who  
23 engaged in any step related to the creation of a production batch lots of  
24 medical cannabis concentrate and the step that individual performed.

25 (c) Medical cannabis concentrate, food-based medical cannabis  
26 concentrate and medical cannabis-infused products manufacturer that  
27 engages in the production of a water-based medical cannabis concentrate  
28 or a food-based medical cannabis concentrate shall:

29 (1) Ensure that all equipment, counters and surfaces used in the  
30 production of a water-based medical cannabis concentrate or a food-based  
31 medical cannabis concentrate is food-grade including ensuring that all  
32 counters and surface areas were constructed in such a manner that it  
33 reduces the potential for the development of microbials, molds and fungi  
34 and can be easily cleaned;

35 (2) ensure that all equipment, counters, and surfaces used in the  
36 production of a water-based medical cannabis concentrate or a food-based  
37 medical cannabis concentrate are thoroughly cleaned after the completion  
38 of each production batch lots;

39 (3) ensure that any room in which dry ice is stored or used in the  
40 processing medical cannabis into a medical cannabis concentrate is well  
41 ventilated to prevent against the accumulation of dangerous levels of CO<sub>2</sub>;

42 (4) ensure that the appropriate safety or sanitary equipment, including  
43 personal protective equipment, is provided to, and appropriately used by,

1 each owner or occupational licensee engaged in the production of a water-  
2 based medical cannabis concentrate or food-based medical cannabis  
3 concentrate;

4 (5) ensure that only finished drinking water and ice made from  
5 finished drinking water is used in the production of a medical cannabis  
6 concentrate;

7 (6) ensure that if glycerin is used in the production of a food-based  
8 medical cannabis concentrate, then the glycerin to be used is food-grade;  
9 and

10 (7) follow all of the rules and regulations related to the production of  
11 a medical cannabis concentrate if a pressurized system is used in the  
12 production of a medical cannabis concentrate or a food-based medical  
13 cannabis concentrate.

14 (d) A medical cannabis-infused products manufacturer that engages  
15 in the production of medical cannabis concentrate using food grade  
16 alcohol, or CO2 extraction shall:

17 (1) Obtain a report from a certified industrial hygienist or a  
18 professional engineer that certifies that the equipment, licensed premises  
19 and standard operating procedures comply with these sections and all  
20 applicable local and state building codes, fire codes, electrical codes and  
21 other laws. If a local jurisdiction has not adopted a local building code or  
22 fire code or if local regulations do not address a specific issue, then the  
23 certified industrial hygienist or professional engineer shall certify  
24 compliance with the international building code of 2012, the international  
25 fire code of 2012 or the national electric code of 2014, as appropriate. The  
26 cannabis compliance agency shall maintain a copy of each code, and shall  
27 make a copy of each code available to the public;

28 (2) if food-grade alcohol or CO2 is to be used in the processing of  
29 medical cannabis into a medical cannabis concentrate, then the certified  
30 industrial hygienist or professional engineer shall:

31 (A) Establish a maximum amount of distillation process material  
32 materials that may be stored within that licensed premises in accordance  
33 with applicable laws, rules and regulations;

34 (B) determine what type of electrical equipment, which may include  
35 but need not be limited to outlets, lights, junction boxes, must be installed  
36 within the room in which medical cannabis concentrate are to be produced,  
37 or distillation process material materials are to be stored in accordance  
38 with applicable laws, rules and regulations;

39 (C) determine whether a gas monitoring system must be installed  
40 within the room in which medical cannabis concentrate are to be produced  
41 or distillation process material materials are to be stored, and if required  
42 the system's specifications, in accordance with applicable laws, rules and  
43 regulations; and

1 (D) determine whether fire suppression system must be installed  
2 within the room in which medical cannabis concentrate are to be produced,  
3 or distillation process material materials are to be stored, and if required  
4 the system's specifications, in accordance with applicable laws, rules and  
5 regulations;

6 (3) if CO<sub>2</sub> is used at the licensed premises, then the certified industrial  
7 hygienist or professional engineer shall determine whether a CO<sub>2</sub> gas  
8 monitoring system must be installed within the room in which medical  
9 cannabis concentrate are to be produced or CO<sub>2</sub> is stored, and if required  
10 the system's specifications, in accordance with applicable laws and rules  
11 and regulations:

12 (A) Exhaust system determination. The certified industrial hygienist  
13 or professional engineer must determine whether a fume vent hood or  
14 exhaust system must be installed within the room in which medical  
15 cannabis concentrate are to be produced, and if required the system's  
16 specifications, in accordance with applicable laws, rules and regulations;

17 (B) material change. If a medical cannabis-infused products  
18 manufacturer makes a material change to its licensed premises, equipment  
19 or a concentrate production procedure, in addition to all other  
20 requirements, it must obtain a report from a certified industrial hygienist,  
21 or professional engineer re-certifying its standard operating procedures  
22 and, if changed, its licensed premises and equipment as well;

23 (C) manufacturer's instructions. The certified industrial hygienist or  
24 professional engineer may review and consider any information provided  
25 to the medical cannabis-infused products manufacturer by the designer or  
26 manufacturer of any equipment used in the processing of medical cannabis  
27 into a medical cannabis concentrate; and

28 (D) records retention. A medical cannabis-infused products  
29 manufacturer must maintain copy of all reports received from a certified  
30 industrial hygienist and professional engineer on its licensed premises.  
31 Notwithstanding any other law, section or regulation, compliance with this  
32 section is not satisfied by storing these reports outside of the licensed  
33 premises. Instead the reports must be maintained on the licensed premises  
34 until the licensee ceases production of medical cannabis concentrate on the  
35 licensed premises;

36 (4) ensure that all equipment, counters and surfaces used in the  
37 production of a medical cannabis concentrate must be food-grade and must  
38 not react adversely with any of the distillation process materials to be used  
39 in the licensed premises. Additionally, all counters and surface areas must  
40 be constructed in a manner that reduces the potential development of  
41 microbials, molds and fungi and can be easily cleaned;

42 (5) ensure that the room in which medical cannabis concentrate shall  
43 be produced must contain an emergency eye-wash station;

1 (6) ensure that a professional grade, closed-loop extraction system  
2 capable of recovering the food grade alcohol used to produce CO2 medical  
3 cannabis concentrate:

4 (A) UL or ETL Listing;

5 (B) if the system is UL or ETL listed, then a medical cannabis-  
6 infused products manufacturer may use the system in accordance with the  
7 manufacturer's instructions; and

8 (C) if the system is not UL or ETL listed, then there must a designer  
9 of record. If the designer of record is not a professional engineer, then the  
10 system must be peer reviewed by a professional engineer. In reviewing the  
11 system, the professional engineer shall review and consider any  
12 information provided by the system's designer or manufacturer;

13 (7) Ensure that all materials used in the extraction process are food-  
14 grade or at least 99% pure:

15 (A) A medical cannabis-infused products manufacturer must obtain a  
16 material safety data sheet for each distillation process material used or  
17 stored on the licensed premises. A medical cannabis-infused products  
18 manufacturer must maintain a current copy of the material safety data  
19 sheet and a receipt of purchase for all distillation process materials used or  
20 to be used in an extraction process; and

21 (B) a medical cannabis-infused products manufacturer is prohibited  
22 from using denatured alcohol to produce a medical cannabis concentrate;

23 (8) ensure that all distillation process material distillation process  
24 materials or other distillation process material materials, chemicals and  
25 waste are stored in accordance with all applicable laws, rules and  
26 regulations. At no time may a medical cannabis-infused products  
27 manufacturer store more distillation process material on its licensed  
28 premises than the maximum amount established for that licensed premises  
29 by the certified industrial hygienist or professional engineer;

30 (9) ensure that the appropriate safety and sanitary equipment,  
31 including personal protective equipment, is provided to, and appropriately  
32 used by, each owner or occupational licensee engaged in the production of  
33 a distillation process medical cannabis concentrate; and

34 (10) ensure that an occupational licensee is present at all times during  
35 the production of a distillation process material based medical cannabis  
36 concentrate whenever an extraction process requires the use of pressurized  
37 equipment.

38 (e) Ethanol and isopropanol. If a medical cannabis-infused products  
39 manufacturer only produces distillation process material based medical  
40 cannabis concentrate using ethanol or isopropanol at its licensed premises  
41 and no other distillation process material, then it shall be considered  
42 exempt from the requirements in paragraph 4 of this section and instead  
43 must follow the requirements in paragraph 3 of this rule. Regardless of

1 which section is followed, the ethanol or isopropanol must be food grade  
2 or at least 99% pure and denatured alcohol cannot be used.

3 (f) Violation affecting public safety. Failure to comply with this  
4 section may constitute a license violation affecting public safety.

5 Sec. 30. Any provision or section of this act being held invalid as to  
6 any person or circumstances shall not affect the application of any other  
7 provision or section of this act that can be given full effect without the  
8 invalid provision or section or application, and to this end, the provisions  
9 of this act are severable.

10 Sec. 31. This act shall take effect and be in force from and after its  
11 publication in the statute book.
