- 6. Practical quantification limit. "Practical quantification limit" means the lowest concentration of a chemical that can be reliably measured within specified limits of precision, accuracy, representativeness, completeness and comparability during routine laboratory operating conditions.
 - **7. Restricted substance.** "Restricted substance" means the following:
- A. Heavy metals and heavy metal-containing compounds, including arsenic, cadmium, cadmium compounds, chromium, lead, lead compounds, nickel and selenium;
 - B. Parabens, including butylparaben, ethylparaben, isobutylparaben, isopropylparaben, methylparaben and propylparaben;
- C. Ortho-phthalates and their esters, including dibutyl phthalate, dicyclohexyl phthalate, hexyl phthalate, diisobutyl phthalate, diisodecyl phthalate, diisononyl phthalate, diisooctyl phthalate, diethylhexyl phthalate, diethyl phthalate and benzyl butyl phthalate;
- D. Formaldehyde and formaldehyde releasers, including formaldehyde, paraformaldehyde, quaternium-15, diazolidinyl urea, DMDM hydantoin, methylene glycol, imidazolidinyl urea and sodium hydroxymethylglycinate;
- E. Benzophenones, including benzophenone, benzophenone-1, benzophenone-2, benzophenone-3, dihydroxybenzophenone, resbenzophenone and oxybenzone;
- F. Known carcinogens, including benzene, carbon black, coal tar, ethylene oxide, toluene, naphthalene, metallic nickel, styrene and xylene;
- 21 G. Asbestos and asbestos-containing compounds, including tale;
- H. Butylated compounds, including butylated hydroxytoluene and butylated hydroxyanisole;
 - <u>I. Siloxanes, including cyclotetrasiloxane, cyclopentasiloxane,</u> octamethylcyclotetrasiloxane and cyclosiloxanes;
 - J. Phenylenediamines, including m-phenylenediamine, o-phenylenediamine and p-phenylenediamine, triclosan, triclocarban and nonylphenol; and
- 28 <u>K. Nitrosamine and nitrosamine releasers, including diethanolamine and triethanolamine.</u>

§3203. Prohibition on restricted substances as intentionally added chemicals

A person may not distribute, sell or offer for sale in this State a cosmetic product containing a restricted substance as an intentionally added chemical in any amount, including as a nonfunctional by-product or a nonfunctional contaminant above the practical quantification limit. The practical quantification limit must be based on scientifically defensible, standard analytical methods. The practical quantification limit for a given restricted substance may be different depending on the analytical method used.

§3204. Certificate of compliance

If the department has reason to believe that a cosmetic product contains a restricted substance as an intentionally added chemical and is being offered for sale in violation of section 3203, the department may issue a notice to the manufacturer of the cosmetic product to provide the department with a certificate of compliance attesting that the cosmetic

product does not contain a restricted substance as an intentionally added chemical no later
than the 30th day after the date of the notice. A manufacturer that does not provide a
certificate of compliance shall notify persons that sell that cosmetic product in this State
that the sale of that cosmetic product is prohibited in this State and provide the department
with a list of the names and addresses of those notified no later than the 30th day after the
date of the notice.

The department may adopt rules to implement this chapter. Rules adopted pursuant to this section are routine technical rules pursuant to Title 5, chapter 375, subchapter 2-A.

10 SUMMARY

This bill prohibits the distribution or sale in this State of a cosmetic product containing certain restricted substances as an intentionally added chemical in any amount, including as a nonfunctional by-product or a nonfunctional contaminant above the practical quantification limit.
