  - Except for exploration activities governed by chapter 38-08.1, the mineral developer shall give the surface owner written notice of the drilling operations contemplated at least twentydays prior to the commencement of the operationsthirty days before applying for a drilling permit, unless waived by mutual agreement of both parties. The notice also must contain a plat map showing the location of the well. When feasible, the mineral developer shall work with the surface owner to locate the well so that the well does not unreasonably interfere with the surface owner's operations.
