A BILL

To amend title XVIII of the Social Security Act to increase diagnosis of Alzheimer's disease and related dementias, leading to better care and outcomes for Americans living with Alzheimer's disease and related dementias.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Health Outcomes,
3 Planning, and Education for Alzheimer’s Act”.

4 **SEC. 2. FINDINGS AND PURPOSE.**

5 (a) FINDINGS.—Congress makes the following find-
6 ings:

7 (1) As many as half of the estimated 5.2 mil-
8 lion Americans with Alzheimer’s disease have never
9 received a diagnosis.

10 (2) An early and documented diagnosis and ac-
11 cess to care planning services leads to better out-
12 comes for individuals with Alzheimer’s disease and
13 other dementias and their caregivers.

14 (3) Combining the existing Medicare benefits of
15 a diagnostic evaluation and care planning into a sin-
16 gle package of services would help ensure that indi-
17 viduals receive an appropriate diagnosis as well as
18 critical information about the disease and available
19 care options, which leads to better outcomes.

20 (4) An accurate diagnosis allows for better
21 management of other known chronic conditions and
22 more efficient utilization of medical resources, in-
23 cluding reducing complications and the number of
24 costly emergency room visits and hospitalizations.

25 (5) A formal diagnosis allows individuals and
26 their caregivers to have access to available medical

1 and non-medical treatments, build a care team, par-
2 ticipate in support services, and enroll in clinical
3 trials.

4 (6) Undertaking the diagnostic process poten-
5 tially allows cognitive impairment to be reversed, as
6 the cognitive impairment of nine percent of individ-
7 uals experiencing dementia-like symptoms is due to
8 a potentially reversible cause, such as depression or
9 vitamin deficiency.

10 (b) PURPOSE.—The purpose of this Act is to increase
11 diagnosis of Alzheimer’s disease and related dementias,
12 leading to better care and outcomes for Americans living
13 with Alzheimer’s disease and related dementias.
