IN THE HOUSE OF REPRESENTATIVES

NOVEMBER 3, 2011

Mr. KIND introduced the following bill; which was referred to the Committee on Natural Resources, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To authorize the Secretary of the Interior to carry out programs and activities that connect Americans, especially children, youth, and families, with the outdoors.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Healthy Kids Outdoors
5 Act of 2011”.

6 **SEC. 2. FINDINGS.**

7 Congress finds as follows:

1 (1) Children today are spending less time out-
2 doors than any generation in human history, as evi-
3 denced by studies that show children enjoy half as
4 much time outdoors today as they did just 20 years
5 ago, while spending more than 7½ hours every day
6 in front of electronic media.

7 (2) The health of our children is at risk as evi-
8 denced by the growing obesity crisis where, during
9 the 20-year period between 1991 and 2011, the
10 childhood obesity rate has more than doubled and
11 the adolescent obesity rate has tripled, costing the
12 economy of the United States billions of dollars each
13 year.

14 (3) Our military readiness is declining as nearly
15 1 in 4 applicants to the military is rejected for being
16 overweight or obese, which is the most common rea-
17 son for medical disqualification.

18 (4) Research has shown that military children
19 and families are facing increased stress and mental
20 strain and challenges due to multiple, extended de-
21 ployments. Military family service organizations have
22 developed programs that connect military children
23 and families with positive, meaningful outdoor expe-
24 riences that benefit mental and physical health, but

1 they lack sufficient resources to meet increasing de-
2 mand.

3 (5) In addition to the negative economic impact
4 of childhood obesity, the outdoor retail industry,
5 many local tourist destinations or “gateway commu-
6 nities”, and State fish and wildlife agencies rely on
7 revenue generated when individuals spend time out-
8 doors to create jobs in local communities.

9 (6) Over the past several years, urbanization,
10 changing land use patterns, increasing road traffic,
11 and inadequate solutions to addressing these chal-
12 lenges in the built environment have combined to
13 make it more difficult for many Americans to walk
14 or bike to schools, parks, and play areas or experi-
15 ence the natural environment in general.

16 (7) Visitation to our Nation’s public lands has
17 declined or remained flat in recent years, and yet,
18 connecting with nature and the great outdoors in
19 our communities is critical to fostering the next gen-
20 eration of outdoor enthusiasts who will visit, appre-
21 ciate, and become stewards of our Nation’s public
22 lands.

23 (8) It takes many dedicated men and women to
24 work to preserve, protect, enhance, and restore
25 America’s natural resources, and with an aging

1 workforce in the natural resource professions, it is
2 critical for the next generation to have an apprecia-
3 tion for nature and be ready to take over these re-
4 sponsibilities.

5 (9) Spending time outdoors in nature is bene-
6 ficial to our children’s physical, mental, and emo-
7 tional health and has been proven to decrease symp-
8 toms of attention deficit and hyperactivity disorder,
9 stimulate brain development, improve motor skills,
10 result in better sleep, reduce stress, increase cre-
11 ativity, improve mood, and reduce children’s risk of
12 developing myopia.

13 (10) Children who spend time playing outside
14 are more likely to take risks, seek out adventure, de-
15 velop self-confidence, and respect the value of na-
16 ture.

17 (11) Spending time in green spaces outside the
18 home, including parks, play areas, and garden, can
19 increase concentration, inhibition of initial impulses,
20 and self-discipline and has been shown to reduce
21 stress and mental fatigue. In one study, children
22 who were exposed to greener environments in a pub-
23 lic housing area demonstrated less aggression, vio-
24 lence, and stress.

1 (12) As children become more disconnected
2 from the natural world, the hunting and angling
3 conservation legacy of America is at risk.

4 (13) Conservation education and outdoor recre-
5 ation experiences such as camping, hiking, boating,
6 hunting, fishing, archery, recreational shooting, wild-
7 life watching, and others are critical to engaging
8 young people in the outdoors.

9 (14) Hunters and anglers play a critical role in
10 reconnecting young people with nature, protecting
11 our natural resources, and fostering a lifelong un-
12 derstanding of the value of conserving the natural
13 world.

14 (15) Research demonstrates that hunters who
15 become engaged in hunting as children are among
16 the most active and interested hunters as adults.
17 The vast majority of hunters report they were intro-
18 duced to hunting between the ages of 10 and 12,
19 and the overwhelming majority of children are intro-
20 duced to hunting by an adult.

21 (16) A direct childhood experience with nature
22 before the age of 11 promotes a long-term connec-
23 tion to nature.

24 (17) Parks and recreation, youth-serving, serv-
25 ice-learning, conservation, health, education, and

1 built-environment organizations, facilities, and per-
2 sonnel provide critical resources and infrastructure
3 for connecting children and families with nature.

4 (18) Place-based service-learning opportunities
5 use our lands and waters as the context for learning
6 by engaging students in the process of exploration,
7 action, and reflection. Physical activity outdoors con-
8 nected with meaningful community service to solve
9 real-world problems, such as removing invasive
10 plants or removing trash from a streambed,
11 strengthens communities by engaging youth as cit-
12 izen stewards.

13 (19) States nationwide and their community
14 based partners have some notable programs that
15 connect children and families with nature; however,
16 most States lack sufficient resources and a com-
17 prehensive strategy to effectively engage State agen-
18 cies across multiple fields.

19 (20) States need to engage in cross-sector agen-
20 cy and nonprofit collaboration that involves public
21 health and wellness, parks and recreation, transpor-
22 tation and city planning, and other sectors focused
23 on connecting children and families with the out-
24 doors to increase coordination and effective imple-
25 mentation of the policy tools and programs that a

1 State can bring to bear to provide healthy outdoor
2 opportunities for children and families.
