

116TH CONGRESS
2D SESSION

H. R. 8215

To establish a governmentwide approach to improving digital identity, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

SEPTEMBER 11, 2020

Mr. FOSTER (for himself, Mr. KATKO, Mr. LANGEVIN, and Mr. LOUDERMILK) introduced the following bill; which was referred to the Committee on Oversight and Reform, and in addition to the Committees on Science, Space, and Technology, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To establish a governmentwide approach to improving digital identity, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*

2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Improving Digital

5 Identity Act of 2020”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

1 (1) The lack of an easy, affordable, and reliable
2 way for organizations, businesses, and government
3 agencies to identify whether an individual is who
4 they claim to be online creates an attack vector that
5 is widely exploited by adversaries in cyberspace, and
6 precludes many high-value transactions from being
7 available online.

8 (2) Incidents of identity theft and identity
9 fraud continue to rise in the United States, where
10 more than 164,000,000 consumer records containing
11 personally identifiable information were breached in
12 2019, increasing the total number of data breaches
13 by 17 percent from the previous year.

14 (3) In 2019, losses resulting from identity
15 fraud amounted to \$16,900,000,000.

16 (4) In 2019, the Director of the Treasury De-
17 partment Financial Crimes Enforcement Network
18 stated, “The abuse of personally identifiable infor-
19 mation, and other building blocks of identity, is a
20 key enabler behind much of the fraud and cyber-
21 crime affecting our nation today.”

22 (5) Trustworthy digital identity solutions can
23 help under-banked and unbanked individuals better
24 access to digital financial services through innovative
25 delivery channels that promote financial inclusion.

1 (6) The inadequacy of current digital identity
2 solutions degrades security and privacy for all Amer-
3 icans, and next generation solutions are needed that
4 improve both security and privacy.

5 (7) Government entities, as authoritative
6 issuers of identity in the United States, are uniquely
7 positioned to deliver critical components that ad-
8 dress deficiencies in our digital identity infrastruc-
9 ture and augment private sector digital identity and
10 authentication solutions.

11 (8) State governments are particularly well
12 suited to play a role in enhancing digital identity so-
13 lutions used by both the public and private sectors,
14 given the role of State governments as the issuers of
15 driver's licenses and other identity documents com-
16 monly used today.

17 (9) The private sector drives much of the inno-
18 vation around digital identity in the United States
19 and has an important role to play in delivering dig-
20 ital identity solutions.

21 (10) The 2016 bipartisan Commission on En-
22 hancing National Cybersecurity called for the Fed-
23 eral government to "create an interagency task force
24 directed to find secure, user-friendly, privacy-centric
25 ways in which agencies can serve as one authori-

1 tative source to validate identity attributes in the
2 broader identity market. This action would enable
3 government agencies and the private sector to drive
4 significant risk out of new account openings and
5 other high-risk, high-value online services, and it
6 would help all citizens more easily and securely en-
7 gage in transactions online.”

8 (11) The public and private sectors should col-
9 laborate to deliver solutions that promote confidence,
10 privacy, choice, and innovation.

11 (12) It should be the policy of the Government
12 to use the authorities and capabilities of the Govern-
13 ment to enhance the security, reliability, privacy,
14 and convenience of digital identity solutions that
15 support and protect transactions between individ-
16 uals, government entities, and businesses, and that
17 enable Americans to prove who they are online.
