

116TH CONGRESS
2D SESSION

H. R. 8736

To amend the Federal Food, Drug, and Cosmetic Act to allow the sponsor of a drug to use a non-animal test as an alternative to an animal test for purposes of demonstrating the safety and effectiveness of a drug if such approach satisfies the requirements of the applicable statutes and regulations.

IN THE HOUSE OF REPRESENTATIVES

NOVEMBER 12, 2020

Mr. BRENDAN F. BOYLE of Pennsylvania introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To amend the Federal Food, Drug, and Cosmetic Act to allow the sponsor of a drug to use a non-animal test as an alternative to an animal test for purposes of demonstrating the safety and effectiveness of a drug if such approach satisfies the requirements of the applicable statutes and regulations.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Alternatives to Ani-
5 mals for Regulatory Fairness Act of 2020” or the “AARF
6 Act of 2020”.

1 **SEC. 2. FINDINGS.**

2 The Congress finds that—

3 (1) the Food and Drug Administration (in this
4 section referred to as the “FDA”) often requires
5 pharmaceutical companies to conduct or commission
6 testing on dogs and other animals to assess the safe-
7 ty or effectiveness of new drugs, even though such
8 testing is inefficient, expensive, and ineffective;

9 (2) the National Institutes of Health states,
10 “Approximately 30 percent of promising medications
11 have failed in human clinical trials because they are
12 found to be toxic despite promising preclinical stud-
13 ies in animal models. About 60 percent of candidate
14 drugs fail due to lack of efficacy”;

15 (3) current FDA nonbinding pharmaceutical
16 testing guidelines support the use of alternatives to
17 animal testing to improve the effectiveness and effi-
18 ciency of drug development;

19 (4) current FDA drug testing guidance for the
20 pharmaceutical industry states, “consideration
21 should be given to use of new in vitro alternative
22 methods for safety evaluation”;

23 (5) the FDA’s drug testing guidance for indus-
24 try additionally states, “alternative approaches . . .
25 can also be used The use of any of these ap-

1 proaches can reduce overall animal use in drug de-
2 velopment”;

3 (6) the FDA writes that alternatives to animal
4 testing, “may help bring FDA-regulated products to
5 market faster, with improved efficacy, or prevent
6 products with increased toxicological risk from
7 reaching the market. Also critical is the potential for
8 these advances to replace, reduce, and/or refine ani-
9 mal testing”;

10 (7) pharmaceutical companies are reducing ani-
11 mal testing by investing in the development and use
12 of alternative methods, which studies show are often
13 more effective and efficient than traditional animal
14 use;

15 (8) the FDA states, “FDA encourages sponsors
16 to consult with us if they wish to use a non-animal
17 testing method they believe is suitable, adequate,
18 validated, and feasible”; and

19 (9) in some cases, drug manufacturers and
20 sponsors have not been allowed by the FDA to use
21 alternatives to animal testing to fulfill regulatory re-
22 quirements, despite the FDA’s support for this tech-
23 nology in its industry guidance document.

1 **SEC. 3. ALTERNATIVES TO ANIMAL TESTS.**

2 Section 505 of the Federal Food, Drug and Cosmetic
3 Act (21 U.S.C. 355) is amended by adding at the end the
4 following new subsection:

5 “(z) ALTERNATIVES TO ANIMAL TESTS.—The Sec-
6 retary shall allow the sponsor of a drug to use a non-ani-
7 mal test as an alternative to an animal test for purposes
8 of demonstrating the safety and effectiveness of a drug
9 under this section if such approach satisfies the require-
10 ments of the applicable statutes and regulations.”.
