

116TH CONGRESS
2D SESSION

H. RES. 1142

Expressing support for the designation of September 4, 2020, as “National Polycystic Kidney Disease Awareness Day”, and raising awareness and understanding of polycystic kidney disease.

IN THE HOUSE OF REPRESENTATIVES

SEPTEMBER 23, 2020

Mr. CLEAVER (for himself and Mr. LUETKEMEYER) submitted the following resolution; which was referred to the Committee on Energy and Commerce

RESOLUTION

Expressing support for the designation of September 4, 2020, as “National Polycystic Kidney Disease Awareness Day”, and raising awareness and understanding of polycystic kidney disease.

Whereas designating September 4, 2020, as “National Polycystic Kidney Disease Awareness Day” will raise public awareness and understanding of polycystic kidney disease, one of the most prevalent genetic kidney disorders, which affects approximately 500,000 people in the United States;

Whereas National Polycystic Kidney Disease Awareness Day will help to foster an understanding of the impact polycystic kidney disease has on individuals and their families;

Whereas polycystic kidney disease is a progressive, genetic disorder of the kidneys that causes damage to the kidneys and the cardiovascular, endocrine, hepatic, and gastrointestinal organ systems;

Whereas polycystic kidney disease affects the health and finances of individuals, and equally affects individuals of all ages, races, ethnicities, and sexes;

Whereas, of the individuals diagnosed with polycystic kidney disease, approximately 10 percent have no family history of the disease, with the disease developing as a spontaneous mutation;

Whereas there are very few treatments and no cure for polycystic kidney disease, which is 1 of the 4 leading causes of kidney failure in the United States;

Whereas almost 50 percent of individuals with polycystic kidney disease experience kidney failure by age 60;

Whereas friends, loved ones, spouses, and caregivers of individuals with polycystic kidney disease can assist with the challenges created by polycystic kidney disease, including by helping such individuals maintain a healthy lifestyle and make regular visits to their health care providers;

Whereas the severity of the symptoms of polycystic kidney disease and limited public awareness of the disease may cause individuals to forgo regular visits to their physicians or avoid following the health recommendations of their doctors, which experts suggest could help prevent further complications should kidney failure occur;

Whereas individuals who have chronic, life-threatening diseases like polycystic kidney disease may experience depression;

Whereas the PKD Foundation and its more than 35,000 patient and family advocates around the United States are dedicated to—

- (1) conducting research to find treatments and a cure for polycystic kidney disease;
- (2) fostering public awareness and understanding of polycystic kidney disease;
- (3) educating individuals and their families about the disease to improve their treatment and care; and
- (4) providing support, including by sponsoring the annual “Walk for PKD”, to raise funds for polycystic kidney disease research, education, advocacy, and awareness; and

Whereas, on September 4, 2020, the PKD Foundation partnered with sister organizations in Canada, Australia, and other countries to increase international awareness of polycystic kidney disease: Now, therefore, be it

1 *Resolved*, That the House of Representatives—

2 (1) expresses support for the designation of
3 “National Polycystic Kidney Disease Awareness
4 Day”;

5 (2) supports the goals and ideals of National
6 Polycystic Kidney Disease Awareness Day to raise
7 public awareness and understanding of polycystic
8 kidney disease;

9 (3) recognizes the need for additional research
10 to find a cure for polycystic kidney disease; and

11 (4) encourages all people in the United States
12 and interested groups to support National Polycystic

1 Kidney Awareness Day through appropriate cere-
2 monies and activities to promote public awareness of
3 polycystic kidney disease and to foster an under-
4 standing of the impact of the disease on individuals
5 and their families.
