

116TH CONGRESS
2D SESSION

S. RES. 716

Designating the week of October 5 through October 9, 2020, as “Malnutrition Awareness Week”.

IN THE SENATE OF THE UNITED STATES

SEPTEMBER 24, 2020

Mr. MURPHY (for himself, Mr. GRASSLEY, Mrs. FEINSTEIN, Ms. HASSAN, Mr. BOOKER, Ms. SMITH, Ms. SINEMA, Mr. MANCHIN, Mr. KING, Mr. BLUMENTHAL, Mr. VAN HOLLEN, Mr. CRAMER, Mr. WYDEN, Mr. CARDIN, Mr. COONS, Mr. LANKFORD, Mr. TILLIS, Mr. ROBERTS, Ms. COLLINS, Mrs. CAPITO, Ms. ERNST, Ms. ROSEN, and Mr. SCOTT of South Carolina) submitted the following resolution; which was referred to the Committee on the Judiciary

NOVEMBER 12, 2020

Committee discharged; considered and agreed to

RESOLUTION

Designating the week of October 5 through October 9, 2020, as “Malnutrition Awareness Week”.

Whereas malnutrition is the condition that occurs when a person does not get enough protein, calories, or nutrients;

Whereas the 2020 Coronavirus Disease 2019 (COVID–19) pandemic (referred to in this preamble as the “2020 coronavirus pandemic”)—

(1) has resulted in a significant increase in food insecurity, which is linked to malnutrition; and

(2) has nearly doubled food insufficiency rates since 2019;

Whereas the 2020 coronavirus pandemic has had a disproportionate impact on children, as 13,900,000 children live in a household characterized by child food insufficiency, and the rate of households with food insufficient children in 2020 was more than 5 times the rate of households with food insufficient children in 2019;

Whereas the impact of the 2020 coronavirus pandemic on the chronically ill has forced the examination of chronic disease prevention, especially through nutrient consumption and absorption, which is examined in the 2020–2030 Strategic Plan for NIH Nutrition Research published by the National Institutes of Health;

Whereas malnutrition is a significant problem in the United States and around the world, crossing all age, racial, class, gender, and geographic lines;

Whereas infants, older adults, people with chronic diseases, and other vulnerable populations are particularly at risk for malnutrition;

Whereas the American Academy of Pediatrics has found that failure to provide key nutrients during early childhood may result in lifelong deficits in brain function;

Whereas disease-associated malnutrition affects between 30 and 50 percent of patients admitted to hospitals, and the medical costs of hospitalized patients with malnutrition can be 300 percent more than the medical costs of properly nourished patients;

Whereas, according to the National Blueprint: Achieving Quality Malnutrition Care for Older Adults, 2020 Up-

date, as many as ½ of older adults living in the community are malnourished or at risk for malnutrition;

Whereas disease-associated malnutrition in older adults alone costs the United States more than \$51,300,000,000 each year; and

Whereas the American Society for Parenteral and Enteral Nutrition established Malnutrition Awareness Week to raise awareness and promote prevention of malnutrition across the lifespan: Now, therefore, be it

1 *Resolved*, That the Senate—

2 (1) designates the week of October 5 through
3 October 9, 2020, as “Malnutrition Awareness
4 Week”;

5 (2) recognizes registered dietitian nutritionists
6 and other nutrition professionals, health care pro-
7 viders, social workers, advocates, caregivers, and
8 other professionals and agencies for their efforts to
9 advance awareness, treatment, and prevention of
10 malnutrition;

11 (3)(A) recognizes the importance of existing
12 Federal nutrition programs for their role in com-
13 bating malnutrition; and

14 (B) supports emergency funding for those crit-
15 ical Federal nutrition programs for the duration of
16 the Coronavirus Disease 2019 (COVID–19) pan-
17 demic;

18 (4) recognizes—

1 (A) the importance of medical nutrition
2 therapy under the Medicare program under title
3 XVIII of the Social Security Act (42 U.S.C.
4 1395 et seq.); and

5 (B) the need for vulnerable populations to
6 have access to nutrition counseling;

7 (5) recognizes the importance of the innovative
8 research conducted by the National Institutes of
9 Health on—

10 (A) nutrition, dietary patterns, and the
11 human gastrointestinal microbiome; and

12 (B) how those factors influence the preven-
13 tion or development of chronic disease through-
14 out the lifespan; and

15 (6)(A) supports access to a malnutrition screen-
16 ing and assessment; and

17 (B) encourages the Centers for Medicare &
18 Medicaid Services to evaluate—

19 (i) the provision of a malnutrition screen-
20 ing and assessment through telehealth during
21 the Coronavirus Disease 2019 (COVID-19)
22 public health emergency; and

23 (ii) the adoption of malnutrition electronic
24 clinical quality measures.
