2             to motor vehicles upon request from survivors of domestic abuse, human  
3             trafficking, and related acts.

### *Analysis by the Legislative Reference Bureau*

This bill creates a requirement that motor vehicle manufacturers suspend a motor vehicle's remote access abilities upon request from survivors of domestic abuse, human trafficking, and related acts. "Remote access" is defined in the bill as a feature of a motor vehicle that allows individuals access to a motor vehicle using the Internet, including the ability to remotely lock and unlock the motor vehicle, start and stop the motor vehicle's engine, adjust temperature settings, and track the motor vehicle's location.

Under the bill, a motor vehicle manufacturer must, within two business days after receiving a completed remote access suspension request, suspend the remote access ability of an abuser to a motor vehicle in the possession of a survivor.

Under the bill, a "survivor" means an individual who is 18 years of age and either 1) against whom a covered act has been committed or allegedly committed or 2) who cares for another individual against whom a covered act has been committed or allegedly committed, provided that the individual providing care did not commit or allegedly commit the covered act. Under the bill, a "covered act" means conduct that constitutes domestic abuse, sexual assault, stalking, or human trafficking. A criminal conviction or any other determination of a court is not required for conduct to be a "covered act." Under the bill, an "abuser" means an individual who committed or allegedly committed a covered act.

**ASSEMBLY BILL 1135**

A remote access suspension request under the bill must verify that an individual who has remote access to a motor vehicle in the possession of the survivor has committed or allegedly committed a covered act against the survivor or an individual under the survivor's care by providing either 1) a signed affidavit from a licensed medical or mental health care provider, social worker, victim service provider, or employee of a court, or 2) a copy of a police report, statements provided by police, charging documents, protective or restraining orders, or another official record documenting the covered act.

Under the bill, a motor vehicle manufacturer may not make remote access suspension contingent on any other requirement other than those described above, including payment of a fee and approval of separation by a motor vehicle title holder who is not the survivor.
